Dear

SHAREHOLDER

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSR

Once again, I am pleased to report that over the most recent reporting period your Fund continued to provide you with attractive tax-free monthly income and the opportunity for increased portfolio diversification. For more specific information about the performance of your Fund, please see the Portfolio Manager's Comments and Performance Overview sections of this report.

With interest rates at historically low levels, many have begun to wonder whether interest rates will rise, and whether that possibility should cause them to adjust their holdings of fixed-income investments. No one knows what the future will bring, which is why we think a well-balanced portfolio that is structured and carefully monitored with the help of an investment professional is an important component in achieving your long-term financial goals. A well-diversified portfolio may actually help to reduce your overall investment risk, and we believe that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio crafted to perform well through a variety of market conditions.

I'd also like to direct your attention to the inside front cover of this report, which explains the quick and easy process to begin receiving Fund reports like this via e-mail and the internet. Thousands of Nuveen Fund shareholders already have signed-up, and they are getting their Fund information faster and more conveniently than ever. I urge you to consider joining them.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

Portfolio Manager's
COMMENTS

Portfolio manager Rick Huber discusses economic and market conditions, key investment strategies, and the recent performance of the Funds. With 18 years of investment experience, Rick assumed portfolio management responsibility for these Funds in January 2003.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE TWELVE-MONTH PERIOD ENDED JULY 31, 2003?

In June 2003, the Federal Reserve cut the fed funds rate to 1.0%, its lowest level since 1958. Also in June, the GDP growth rate for the first quarter of 2003 was revised downward to 1.4%. The preliminary second-quarter growth rate, announced in July, was 2.4%, which continued to lag the 3% level some economists

consider to be indicative of a recovery.

This was just the latest evidence of the two factors that, in our opinion, continued to have the greatest influence on the performance of the U.S. economy and the municipal market over the course of this reporting period - historically low interest rate levels and the sluggish pace of economic growth. In addition, inflation remained dormant through the period, while comments by the Fed kept the topic of potential deflation in the news.

In combination, the slow rate of economic recovery, low interest rates and lack of inflationary pressures created conditions that helped many municipal bonds perform well during much of this reporting period. However, in July 2003 some stronger-than-expected economic data raised the specter of a tighter monetary policy sooner rather than later. This, along with volatility in the mortgage-backed securities market, precipitated a spike in bond yields and a corresponding drop in bond prices that impacted all fixed-income markets. One barometer of the volatility experienced in the bond markets during the month of July was the yield on the benchmark 10-year U.S. Treasury, which jumped approximately 150 basis points from 45-year lows in June to its highest point in more than a year by July 31, 2003.

During the first seven months of 2003, the municipal market followed up the record issuance of 2002 with continued strong supply, issuing \$230 billion in new bonds. This represented an increase of 18% over the same period in 2002. Much of the increase in supply reflected issuance intended to address the fiscal problems facing many states as the result of slow growth, rising costs (especially for healthcare and pensions), and sharp declines in the collection of income and capital gains taxes. Matching the increased supply, demand for municipal bonds also remained strong from both individual and institutional investors, particularly insurance companies.

HOW WERE ECONOMIC AND MARKET CONDITIONS IN ARIZONA AND TEXAS?

Boosted by an improving tourism industry, reviving demand in the high-tech and biotech areas, and increased defense-related spending, Arizona's economy continued on the path to recovery during the reporting period. Healthy population trends, affordable housing and low business costs also contributed to the state's economic rebound. In June 2003, a \$6.4 billion fiscal 2004 state budget was approved. While Arizona's rainy day fund was depleted in 2002, the state's pension liabilities are fully funded, and its debt burden remained relatively low. During the first seven months of 2003, Arizona issued just under \$4 billion in new municipal bonds, down 18% from the same period in 2002. As of July 31, 2003, the state's credit rating remained at A1/AA-, with negative outlooks, from Moody's and Standard & Poor's, respectively. The negative outlooks reflected the state's declining sales and income tax collections last year as well as the rating agencies' expectations that, despite the economic recovery projected for the second half of 2003, significant budgetary imbalances could continue over the next several cycles.

Like Arizona, Texas has also benefited from positive demographic trends, a large and diverse high-tech

and research sector, and relatively low costs of business and housing. As home to more than 200,000 military personnel, the state's economic growth has been helped by new defense spending contracts and increased activity at Texas military bases. Many of the state's major metropolitan areas were returning to healthy growth during the reporting period, including Houston (aided by a booming energy industry), Austin (with its high-tech and government base), and San Antonio. Northern Texas, including Dallas and Fort Worth, did not fare as

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSR

well, as this area's economy continued to be constrained by problems in the airline and telecom industries. For the 2004-2005 biennium, the state balanced its \$117.4 billion budget by closing a \$10 billion gap through across-the-board spending cuts of 1.5%, fee increases, a drawdown of the state's \$1 billion rainy day fund, and a new tax amnesty program that is expected to increase collections. While the state's debt levels remained relatively low, pension liabilities were not fully funded. During the first seven months of 2003, Texas retained its position as the third largest state issuer behind California and New York, with \$14.6 billion in new municipal bonds, up 9% over January-July 2002. The state's general obligation debt continued to be rated Aa1/AA with a stable outlooks by Moody's and Standard & Poor's, respectively.

HOW DID THE FUNDS PERFORM OVER THE YEAR ENDED JULY 31, 2003?

For additional information, see the individual Performance Overview for your Fund in this report.

For the twelve months ended July 31, 2003, both NFZ and NKR outperformed the national, unleveraged Lehman Brothers Municipal Bond Index, while the returns of NAZ and NTX trailed this benchmark over the period. While all four older Funds trailed the Lipper Other States Municipal Debt Funds average, we believe this comparison has more limited value since the Lipper average includes the results of Funds from 10 different states, each with its own unique market environment.

The results of each of the Nuveen Funds over this reporting period were directly affected by the performance of specific securities within their portfolios. For example, for much of the reporting period, both NAZ and NTX had relatively large positions in bonds with short call provisions. These bonds had relatively short durations,⁴ which tended to restrain their performance in a market generally more favorable to longer duration bonds. Over the course of the reporting period, these callable bonds were replaced with longer maturity, longer duration bonds. However, as the Funds worked through their call schedules, their ability to benefit from the generally favorable interest rate environment in existence over much of the reporting period was limited.

In addition, at the start of the reporting period, NTX held over \$11 million (par value) in bonds issued for Alliance and Dallas/Fort Worth airports and backed by American Airlines. Over the reporting period, the market value of most airline-backed bonds fell, due in part to a decline in passenger volume and in part to the well-documented financial struggles of many carriers. Although we

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSR

significantly trimmed NTX's position in airline-backed bonds during the course of the reporting period, the depreciation of these bonds over the twelve-month period had a negative impact on NTX's total return.

NAZ's performance also was affected by its holdings of bonds issued for Phoenix Children's Hospital and Winslow Memorial Hospital, which

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of the Nuveen Arizona and Texas Funds are compared with the average annualized return of the 36 funds in the Lipper Other States Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends. It should be noted that the performance of the Lipper Other States category represents the overall average of annual returns for funds from 10 different states with a wide variety of economic and municipal market conditions and investment guidelines, making direct comparisons less applicable.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 28% plus the applicable state income tax rate. The combined federal and state tax rate used for Arizona is 31.5%. Because Texas has no state income tax, NTX's taxable-equivalent yield is based on a federal income tax rate of 28%.
- 4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. References to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

3

depreciated in value as these two credits experienced financial and management difficulties. With new managements in place, both Phoenix Children's and Winslow are currently working to resolve problems and achieve a potential turnaround. NKR and NXE also held smaller positions in the Phoenix Children's Hospital bonds.

NAZ, NXE, and NTX had less than 3% of their portfolios invested in bonds backed by the 1998 master tobacco settlement agreement. In recent months, the prices of these bonds weakened as the result of lawsuits involving the major tobacco companies as well as the increased issuance of such bonds by states planning to use the proceeds to help close budget gaps. Although the sector as a whole produced negative returns over the twelve months ended July 31, 2003, tobacco-backed bonds showed some recovery toward the end of the period. As of the end of this reporting period, our strategy was to maintain our tobacco holdings while we continued to regularly evaluate the situation.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

With short-term interest rates at historically low levels during the reporting period, the dividend-paying capabilities of these Funds benefited from their use

of leverage. The amount of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. Low short-term rates can enable the Funds to reduce the amount of income paid to MuniPreferred shareholders, which can potentially leave more earnings to support common share dividends.

During the twelve months ended July 31, 2003, the continued low level of short-term interest rates enabled us to implement three dividend increases in NFZ and one in NTX. As of July 2003, NAZ had paid steady or increasing dividends for 38 consecutive months, while NKR had offered shareholders stable, attractive dividends for 15 consecutive months. NXE, which was introduced in September 2002, declared its first monthly distribution in November 2002.

Although the share prices and net asset values of these Funds performed well during much of this twelve-month reporting period, the increased volatility that led to a general weakening of bond prices during July 2003 resulted in share prices and NAVs that were lower on July 31, 2003, than they had been one year earlier. As of July 31, 2003, NAZ, NFZ, NXE and NTX were trading at premiums to their common share NAVs, while NKR had moved to trading at a slight discount (see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE PERIOD ENDED JULY 31, 2003?

Over this reporting period, we continued to place strong emphasis on diversifying the portfolios, improving call protection and enhancing each Fund's dividend-paying capabilities. Strategically, our main focus centered on systematically controlling the Funds' durations, which we believed would enhance our ability to mitigate the Funds' interest rate risk and produce more consistent returns over time. Interest rate risk is the risk that the value of a Fund portfolio will decline when market interest rates rise (since bond prices move in the opposite direction of interest rates). The longer the duration of a Fund's portfolio, the greater its interest rate risk.

In line with our duration strategy, we concentrated on finding value in the intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years), particularly in the Funds with longer durations that we were seeking to moderate. In many cases, bonds in this part of the curve offered yields similar to those of longer-term bonds but, in our opinion, had less inherent interest rate risk. In NAZ and NTX, the need to replace shorter duration bonds that were called from the portfolio with current bonds having longer durations served to extend the Fund's duration over this reporting period.

4

In general, issuance in the Texas municipal market over the past year increased our opportunities to make purchases for NTX, while finding appropriate bonds among the tighter supply provided by the Arizona market was more difficult. In both markets, we continued to look for individual issues that we thought would perform relatively well regardless of the future direction of interest rates. In carrying out trades, we watched for opportunities to take losses on selected securities in order to offset the generation of capital gains. Over the past year, we increased the Arizona Funds' exposure to limited tax obligation bonds, which were more plentiful in the Arizona market, with the goal of enhancing the diversification of these Funds.

NXE, our newest Arizona Fund introduced in September 2002, is now fully invested and, as mentioned earlier, began declaring regular monthly dividends in November 2002. As attractive opportunities appeared in the market, we added Arizona securities to this Fund to replace bonds from Puerto Rico that were purchased

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSR

during the initial investment phase last fall. As of July 31, 2003, approximately 95% of NXE's portfolio was invested in Arizona bonds, up from 90% last fall.

Given the current geopolitical and economic climate, we believed that maintaining strong credit quality remained a vital requirement. As of July 31, 2003, the Arizona and Texas Funds offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 73% to 89%. In general, our weightings in insured and AAA bonds benefited the performance of these Funds during the past year.

WHAT IS YOUR OUTLOOK FOR THESE FUNDS?

We continue to believe that the U.S. economy is slowly headed for a recovery. We also think that inflation and interest rates will remain relatively low over the near term. However, an eventual rise in interest rates remains a distinct risk, and we plan to keep a careful watch on the Funds' durations and holdings in order to be as well positioned as possible if and when this happens.

Looking ahead at potential bond calls for these Funds, the newer Arizona Funds (NFZ, NKR, and NXE) should not experience any significant call exposure for several years. Despite our actions to mitigate the call risks in NAZ and NTX, these Funds still face potential calls on 22% and 11% of their portfolios, respectively, through 2005. The number of actual calls in all of these Funds will depend largely on market interest rates in coming months.

We will continue to manage the Funds' durations and seek to enhance their income-generating capabilities. We also plan to continue closely monitoring the budgetary situations in both states. We believe that these Nuveen Funds remain attractive sources of tax-free income, and continue to offer the potential for considerable portfolio diversification.

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state funds (the "Funds") covered in this report and their corresponding common share stock exchange symbols are Nuveen Arizona Premium Income Municipal

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSR

Fund, Inc. (NAZ), Nuveen Arizona Dividend Advantage Municipal Fund (NFZ), Nuveen Arizona Dividend Advantage Municipal Fund 2 (NKR), Nuveen Arizona Dividend Advantage Municipal Fund 3 (NXE), and Nuveen Texas Quality Income Municipal Fund (NTX). Common shares of Arizona Premium Income (NAZ), and Texas Quality Income (NTX) are traded on the New York Stock Exchange while Common shares of Arizona Dividend Advantage (NFZ), Arizona Dividend Advantage 2 (NKR), and Arizona Dividend Advantage 3 (NXE) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to the commencement of operations of Arizona Dividend Advantage 2 (NKR), and Arizona Dividend Advantage 3 (NXE), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 per Fund by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company), and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC (formerly, Nuveen Investments), also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Funds' Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors/Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At July 31, 2003, there were no such outstanding purchase commitments in any of the Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its share holders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Funds. All monthly tax-exempt income dividends paid during the fiscal year ended July 31, 2003, have been designated Exempt Interest Dividends.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding, for each Fund is as follows:

	ARIZONA PREMIUM INCOME (NAZ)	ARIZONA DIVIDEND ADVANTAGE (NFZ)	ARIZONA DIVIDEND ADVANTAGE 2 (NKR)	ARIZONA DIVIDEND ADVANTAGE 3 (NXE)
Number of shares:				
Series M	--	--	--	880
Series T	--	480	--	--
Series W	--	--	740	--
Series TH	1,200	--	--	--
Total	1,200	480	740	880

Effective November 15, 2002, Arizona Dividend Advantage 3 (NXE) issued 880 Series M, \$25,000 stated value Preferred shares.

FINANCIAL STATEMENTS (continued)

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the fiscal year ended July 31, 2003.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments, LLC has agreed to pay all common share offering costs (other than the sales load) that exceed \$.03 per Common share for Arizona Dividend Advantage 2 (NKR), and Arizona Dividend Advantage 3 (NXE). Arizona Dividend Advantage 2's (NKR), and Arizona Dividend Advantage 3's (NXE) share of common share offering costs (\$72,150, and \$91,800, respectively) were recorded as a reduction of the proceeds from the sale of common shares.

Costs incurred by Arizona Dividend Advantage 2 (NKR), and Arizona Dividend Advantage 3 (NXE) in connection with their offering of Preferred shares (\$304,168, and \$556,001, respectively) were recorded as a reduction to paid-in surplus.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Build Your Wealth
AUTOMATICALLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSR

or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

POLICY CHANGE

On November 14, 2002, the Board adopted a policy that allows these Funds, in

addition to investments in municipal bonds, to invest up to 5% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Trustees without vote of the shareholders.

GLOSSARY OF TERMS USED IN THIS REPORT

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the fiscal year ended July 31, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.

Serving Investors
FOR GENERATIONS

Since 1898, financial advisors and their clients have relied on Nuveen Investments to provide dependable investment solutions. For the past century, Nuveen Investments has adhered to the belief that the best approach to investing is to apply conservative risk-management principles to help minimize volatility.

Building on this tradition, we today offer a range of high quality equity and

ITEM 2. CODE OF ETHICS.

As of the end of the period covered by this report, the registrant has adopted a code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. The registrant has posted such code of ethics on its website at www.nuveen.com/etf.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The registrant's board of directors has determined that the registrant has at least one "audit committee financial expert" (as defined in Item 3 of Form N-CSR) serving on its audit committee. The registrant's audit committee financial expert is William E. Bennett, who is "independent" for purposes of Item 3 of Form N-CSR.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

Not applicable at this time.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

Not applicable at this time.

ITEM 6. [RESERVED]

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES

In the rare event that a municipal issuer held by the Fund were to issue a proxy or that the Fund were to receive a proxy issued by a cash management security, Nuveen Advisory Corp. (the "Adviser") would either engage an independent third party to determine how the proxy should be voted or vote the proxy with the

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSR

consent, or based on the instructions, of the Fund's Board of Directors or Trustees or its representative. A member of the Adviser's legal department would oversee the administration of the voting, and ensure that records were maintained in accordance with Rule 206(4)-6, reports were filed with the SEC on Form N-PX, and the results provided to the Board of Directors or Trustees and made available to shareholders as required by applicable rules.

ITEM 8. [RESERVED]

ITEM 9. CONTROLS AND PROCEDURES.

- (a) The registrant's principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the "1940 Act") (17 CFR 270.30a-3(c))) are effective, as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of these controls and procedures required by Rule 30a-3(b) under the 1940 Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Exchange Act (17 CFR 240.13a-15(b) or 240.15d-15(b)).
- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d))) that occurred during the registrant's last fiscal half-year (the registrant's second fiscal half-year in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 10. EXHIBITS.

File the exhibits listed below as part of this Form. Letter or number the exhibits in the sequence indicated.

(a)(1) Any code of ethics, or amendment thereto, that is the subject of the disclosure required by Item 2, to the extent that the registrant intends to satisfy the Item 2 requirements through filing of an exhibit: Not applicable because posted on registrant's website.

(a)(2) A separate certification for each principal executive officer and principal financial officer of the registrant as required by Rule 30a-2(a) under the Act (17 CFR 270.30a-2(a)) in the exact form set forth below: Ex-99.CERT Attached hereto.

(b) If the report is filed under Section 13(a) or 15(d) of the Exchange Act, provide the certification required by Rule 30a-2(b) under the Act (17 CFR 270.30a-2(b), Rule 13a-14(b) or Rule 15d-14(b) under the Exchange Act (17 CFR 240.13a-14(b) or 240.15d-14(b))), and Section 1350 of Chapter 63 of Title 18 of the United States Code (18 U.S.C. 1350) as an exhibit. A certification furnished pursuant to this paragraph will not be deemed "filed" for purposes of Section 18 of the Exchange Act (15 U.S.C. 78r), or otherwise subject to the liability of that section. Such certification will not be deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Exchange Act, except to the extent that the registrant specifically incorporates it by reference. Ex-99.906 CERT attached hereto.
