Sidebar text: "We think that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio designed to perform well through a variety of market conditions."

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

Dear
SHAREHOLDER

I am very pleased to report that for the period ended January 31, 2004, your Nuveen Fund continued to provide you with attractive monthly tax-free income. Your Fund is managed with a value investing strategy that puts an emphasis on finding securities that we think are undervalued or underrated. We believe there are always some municipal bonds that the market is not properly valuing, and that by using a consistent, research-oriented management approach we have the opportunity to find them for your Fund.

In the current environment, many have begun to wonder whether interest rates will soon start to rise, and whether that possibility should cause them to adjust their holdings of fixed-income investments. We believe that by constructing a carefully balanced portfolio with the help of a trusted investment professional you may be able to reduce your overall investment risk and give yourself a better chance to meet your financial goals. We think that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio designed to perform well through a variety of market conditions.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

Portfolio Managers'
COMMENTS

Portfolio managers Scott Romans and Dan Solender review national and state economic and market conditions, key investment strategies, and the recent performance of these Funds. Scott, who joined Nuveen in 2000, assumed portfolio management responsibility for the four Arizona Funds in November 2003. With eleven years of investment experience, including seven at Nuveen, Dan took over management responsibility for NTX in November 2003.

WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE REPORTING PERIOD ENDED JANUARY 31, 2004?

During this period, the greatest influences on the general economy and the

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

municipal market continued to be historically low interest rates, a generally modest rate of inflation and the overall pace of economic improvement. Since its last credit easing in June 2003, the Federal Reserve has maintained the fed funds rate at 1.0%, the lowest level since 1958. Inflation remained under control, with the 1.1% annual change in the core CPI rate for 2003 representing the smallest gain in more than 40 years. The gross domestic product growth rate in 2003 was a respectable 3.1%, the fastest pace since 2000.

The combination of low interest rates, the absence of inflationary pressures, and a slowly improving economy created generally favorable conditions for municipal bonds. In 2003, municipal bond new issue supply reached \$382 billion nationally, a 7% increase over the previous new issue record set in 2002. However, the pace of issuance slowed somewhat during the last half of 2003 and the slow pace continued into the first month of 2004.

HOW WERE CONDITIONS IN ARIZONA AND TEXAS?

Arizona's economy continued to recover during this reporting period, with steady job growth in the services industry, positive developments in the high-tech and biotech sector, and increased defense-related manufacturing. In terms of total jobs gained in 2003, Arizona ranked third in the nation (behind Florida and Georgia). As of January 2004, Moody's rated Arizona's debt A1 with a negative outlook, while Standard & Poor's rated the state AA with a negative outlook. These negative outlooks reflected the fact that, despite the state's current economic rebound, Arizona's surplus funds were depleted in 2002 and, according to the rating agencies, budget imbalances could continue over the next several fiscal years.

In Texas, low oil and gas inventories and rising prices gave a boost to the state's energy industry, while employment in the financial services sector rose, supported by a rapidly growing population and increased demand for mortgage financing. As home to more than 200,000 military personnel, the state also continued to benefit from new defense contracts and increased military activity. Texas ranked fourth in the nation, behind Arizona, in jobs added during 2003. Both Moody's and S&P maintained their Aa1/AA general obligation rating and stable outlook for Texas.

HOW DID THESE FUNDS PERFORM OVER THE 12-MONTH PERIOD ENDED JANUARY 31, 2004?

Individual results for these Arizona and Texas Funds, as well as for relevant benchmarks, are presented in the accompanying table.

For additional information, see the individual Performance Overview for your Fund in this report.

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses. You cannot invest directly in an index.
- 2 The total returns of these Nuveen Funds are compared with the average annualized return of the 44 funds in the Lipper Other States Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends. It should be noted that the performance of the Lipper Other States category represents the overall average of annual returns for funds from 10 different states with a wide variety of economic and municipal market conditions.
- 3 The taxable-equivalent yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. With respect to investments that generate qualified dividend income that is taxable at a maximum rate of 15%, the taxable-equivalent yield is lower. The taxable-equivalent yield is calculated using the current yield and a federal income tax rate of 28% plus the applicable state income tax rate. Because Texas has no state income tax, NTX's taxable-equivalent yield is calculated using the current market yield and a federal income tax rate of 28%, while the combined federal and state tax rate used for Arizona is 31.5%. The yields shown for Arizona highlight the added value of owning shares that are exempt from state as well as federal income taxes.

2

For the 12 months ended January 31, 2004, the total returns of all five of the Funds in this report outperformed the unleveraged national Lehman Brothers Municipal Bond Index. The Funds' use of leverage was a primary factor that influenced their total return performance relative to the Lehman index. Leveraging can add volatility to a Fund's net asset value, share price and income. However, during periods of low short-term interest rates and low or falling long-term interest rates, such as the environment during much of this 12-month period, this strategy also can provide opportunities for net asset value appreciation and enhanced income for common shareholders.

In addition to leverage, factors such as bond calls and the price movement of specific sectors and holdings also had an impact on each Fund's relative performance during this period. For example, NTX benefited from its holdings of bonds backed by American Airlines, as airline-backed bonds rebounded strongly in the last part of 2003. The Texas Fund was also helped by the fact that Texas municipal bonds were, on average, the nation's best performers in 2003, as ranked by Lehman.

Among the Arizona Funds, NAZ marked its 10-year anniversary in November 2002, a point in a Fund's life cycle that often signals an increased potential for bond calls from the portfolio. Through the year, NAZ held a relatively large group of bonds that were priced to near-term call dates, which limited their upside price potential in the period's generally declining interest rate environment. In addition, as these bonds were called from NAZ's portfolio, the proceeds were reinvested in the lower-yielding securities reflecting current market rates. Both of these factors acted to restrain the performance of this Fund relative to the other Arizona Funds in this report.

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

Over the 12-month period, increased investor demand for higher-yielding securities caused the yield spreads between higher- and lower-rated bonds to narrow as the market yields for all bonds generally fell. Since the yields of lower-rated bonds generally fell more than higher-rated bonds, and the prices of lower-rated bonds rose accordingly, some of the Funds' lower-rated holdings were among their best performers. For example, all four Arizona Funds also held bonds issued for Catholic Healthcare West, which showed improved financial performance during the period and began a bond buyback to reduce its outstanding debt. In addition, both NAZ and NXE held industrial development revenue bonds issued by Yavapai County, which has been repurchasing its outstanding bonds as it converts from a standard utility to a telecommunications company. In some cases, we took advantage of these narrowed credit spreads to sell some of our positions in lower-rated bonds at what we believed were very attractive prices.

WHAT ABOUT DIVIDENDS AND SHARE PRICES?

With short-term interest rates at historically low levels, the dividend-paying capabilities of all these Funds benefited from their use of leverage. The extent of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. Low short-term rates can enable the Funds to reduce the amount of income paid to MuniPreferred shareholders, which can leave more earnings to support common share dividends. During the 12 months ended January 2004, continued low short-term rates enabled us to implement two dividend increases in NFZ and one in NTX. Leverage also

3

helped to support the dividend of NAZ, which as of January 31, 2004, had offered shareholders 44 consecutive months of steady or increasing dividends. NKR and NXE, which were introduced in 2002, had provided 21 and 15 months, respectively, of stable, attractive dividends.

Each Fund seeks to pay a stable dividend at a rate that reflects the Fund's past results and projected future performance. A Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If the Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's net asset value (NAV). Conversely, if the Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of January 31, 2004, all of the Funds in this report had positive UNII.

Over the 12-month period ended January 31, 2004, the share prices of these Funds generally performed well, with most ending the period higher than they began. The lone exception was NKR, which saw its share price decline. As of January 31, 2004, NAZ and NFZ were trading at premiums, while NKR, NXE and NTX were trading at discounts to their NAV (see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE PERIOD ENDED JANUARY 31, 2004?

Over this reporting period, a major focus continued to be management of the Funds' durations⁴ in an attempt to make the interest rate risk more consistent across funds. Interest rate risk is the risk that the value of a Fund's portfolio will decline when market interest rates rise (since bond prices move in the opposite direction of interest rates). The longer the duration of a Fund's portfolio, the greater its interest rate risk. Overall, our goal was to

properly calibrate each Fund's interest rate risk. In NAZ, this meant working to extend the Fund's duration, as we reinvested proceeds from a number of bond calls and the sale of issues with relatively short effective maturities into bonds with longer maturities.

In the other Funds, our objective was to shorten the Funds' durations. Generally, we focused on selling 30-year bonds and replacing them with bonds in the 20-year maturity range and with 8 to 10 years of call protection. In many cases, we believed that bonds in this part of the yield curve offered yields similar to those of longer-term bonds but had better total return potential.

Although the heavy volume of municipal issuance during 2003 provided some opportunities to make trades that we believed would benefit the Funds, in recent months we have seen supply soften. This was true in both Arizona and Texas, where issuance during August 2003-January 2004

4 Duration is a measure of a Fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund. References to duration in this commentary are intended to indicate Fund duration unless otherwise noted.

4

declined 17% and 10%, respectively, from levels of the previous six months. Both markets presented challenges in finding issues with the types of structures we prefer and the potential to add value. In Texas, our focus was on purchasing higher quality issues, particularly in the general obligation category, reflecting the increased issuance in this sector. For the Arizona Funds, we looked for bonds that had the potential to enhance the Fund's income while maintaining diversity and overall credit quality. We found the majority of our yield opportunities in the healthcare, utilities, and-- to a lesser degree--higher education sectors.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF JANUARY 31, 2004?

We believe that, given the current geopolitical and economic climate, maintaining strong credit quality is a vital requirement. As of January 31, 2004, all of these Funds offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 75% to 87%.

As of January 31, 2004, potential call exposure over the 2004 - 2006 period ranged from zero in NKR and NXE to 14% in NTX. The actual number of bond calls these Funds will face in the coming months will depend largely on current and anticipated changes in market interest rates.

In general, we believe that these Funds can continue to serve as attractive sources of tax-free income, while simultaneously offering the potential for portfolio diversification. In our opinion, they represent a quality component within a well-balanced core investment portfolio that can continue to benefit shareholders over time.

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

1 Taxable-equivalent yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. With respect to investments that generate qualified dividend income that is taxable at a maximum rate of 15%, the taxable-equivalent yield is lower. The taxable-equivalent yield is calculated using the current market yield and a federal income tax rate of 28%. The rate shown for federal and state highlights the added value of owning shares that are also exempt from state income taxes. It is based on a combined federal and state income tax rate of 31.5%.

2 The Fund also paid shareholders capital gains and net ordinary income distributions in December 2003 of \$0.0441 per share.

FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding common share stock exchange symbols are Nuveen Arizona Premium Income Municipal Fund, Inc. (NAZ), Nuveen Arizona Dividend Advantage Municipal Fund (NFZ), Nuveen Arizona Dividend Advantage Municipal Fund 2 (NKR), Nuveen Arizona Dividend Advantage Municipal Fund 3 (NXE) and Nuveen Texas Quality Income Municipal Fund (NTX). Common shares of Arizona Premium Income (NAZ) and Texas Quality Income (NTX) are traded on the New York Stock Exchange while Common shares of Arizona Dividend Advantage (NFZ), Arizona Dividend Advantage 2 (NKR) and Arizona Dividend Advantage 3 (NXE) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to the commencement of operations of Arizona Dividend Advantage 3 (NXE), the Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., and the recording of the organization expenses (\$11,500) and its reimbursement by Nuveen Investments, LLC, also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, where applicable, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Funds' Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors/Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At January 31, 2004, Arizona Dividend Advantage 2 (NKR) had an outstanding when-issued purchase commitment of \$1,205,425. There were no such outstanding purchase commitments in any of the other Funds.

Notes to
FINANCIAL STATEMENTS (Unaudited) (continued)

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its share holders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, where applicable, to retain such tax-exempt status when distributed to shareholders of the Funds.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

	ARIZONA PREMIUM INCOME (NAZ)	ARIZONA DIVIDEND ADVANTAGE (NFZ)	ARIZONA DIVIDEND ADVANTAGE 2 (NKR)	ARIZONA DIVIDEND ADVANTAGE 3 (NXE)	TEXAS QUALITY INCOME (NTX)

Number of shares:

Series T	--	480	--	--	--
Series W	--	--	740	--	--
Series TH	1,200	--	--	--	2,000

Total	1,200	480	740	880	2,760
=====					

Arizona Dividend Advantage 3 (NXE) issued the Preferred shares listed above on November 15, 2002.

38

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap, and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the six months ended January 31, 2004.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments, LLC has agreed to pay all common share offering costs (other than the sales load) that exceed \$.03 per Common share for Arizona Dividend Advantage 3 (NXE). Arizona Dividend Advantage 3's (NXE) share of common share offering costs of (\$91,800) was recorded as a reduction of the proceeds from the sale of common shares.

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

Costs incurred by Arizona Dividend Advantage 3 (NXE) in connection with its offering of Preferred shares (\$572,201) were recorded as a reduction to paid-in surplus.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Build Your Wealth
AUTOMATICALLY

Sidebar text: Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

commissions usually will be lower than those charged on individual transactions.

FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

POLICY CHANGE

On February 25, 2004, the Board approved policies that would allow each Fund, at the discretion of the Adviser, to engage in certain types of derivative transactions for the purpose of hedging interest rate risk. There is no guarantee that the Adviser will cause a Fund to enter into such transactions. If a Fund were to engage in hedging, there is no guarantee that such hedging will be successful or that it will not reduce the Fund's total return.

PROXY VOTING POLICIES AND PROCEDURES

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling Nuveen Investments at (800) 257-8787; and (ii) on the Commission's website at <http://www.sec.gov>.

GLOSSARY OF TERMS USED IN THIS REPORT

AVERAGE ANNUAL TOTAL RETURN: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

AVERAGE EFFECTIVE MATURITY: The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

LEVERAGE-ADJUSTED DURATION: Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD): An investment's current annualized dividend divided by its current market price.

NET ASSET VALUE (NAV): A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

TAXABLE-EQUIVALENT YIELD: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

Each Fund intends to repurchase shares of its own common or preferred stock in

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the period ended January 31, 2004. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
