Chairman's
Letter to Shareholders

Once again, I am pleased to report that over the six-month period covered by this report your Fund continued to provide you with attractive monthly tax-free income. For more details about the management strategy and performance of your Fund, please read the Portfolio Managers' Comments, the Distribution and Share Price Information, and the Performance Overview sections of this report.

Municipal bonds can be an important building block in a well balanced investment portfolio. In addition to providing attractive tax-free monthly income, a municipal bond investment like your Fund may help you achieve and benefit from greater portfolio diversification. Portfolio diversification is a recognized way to try to reduce some of the risk that comes with investing. I encourage you to contact your personal financial advisor who can explain the advantages of diversification in more detail.

Portfolio Managers'
Comments

Portfolio managers Scott Romans and Cathryn Steeves review key investment strategies and the semiannual performance of these five Nuveen Funds. Scott, who joined Nuveen in 2000, has managed the Arizona Funds since 2003. Cathryn, who has been with Nuveen since 1996, assumed portfolio management responsibility for NTX in 2004.

What key strategies were used to manage the Arizona and Texas Funds during the six-month reporting period ended January 31, 2006?

During this period, bond valuations generally declined as yields generally rose and the yield curve flattened, with shorter-term rates rising to approach the levels of longer-term rates.

In this environment, one of our key strategies continued to be careful duration management. Duration is a measure of a bond's price sensitivity as interest rates change, with longer duration bonds displaying more sensitivity to these changes than bonds with shorter durations. Our purchase activity focused mainly on finding attractively priced bonds maturing in 15 to 20 years for the Arizona Funds and in 15 to 25 years for NTX. As the yield curve flattened, we believed that bonds in this range of the curve generally offered the most attractive opportunities and the best values. We also continued to look for bonds with premium coupons; that is, bonds that at the time of purchase were trading above their par value because their coupons were higher than current interest rate levels. Premium bonds have been in demand recently because historically they have held their value better than current coupon bonds when long-term interest rates rise.

To help us maintain the Funds' durations within our preferred range, we also selectively sold holdings with shorter maturities, including pre-refunded bonds, and reinvested the proceeds in longer maturities as attractive opportunities arose. Proceeds from called bonds also were reinvested into longer maturities.

We also kept an opportunistic eye out for all types of bonds that we believed

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

could add value to the Funds. Because of the overall high credit quality of new issue supply in both states, the majority of our new purchases were highly rated and/or insured. However, due to Arizona's rapid population growth and corresponding infrastructure

4

needs, the credit market in that state also offered some unique opportunities among lower-rated land-secured issues and community facilities district bonds. In NTX, we found some good opportunities in AAA-rated utilities bonds.

In NFZ, NKR and NXE, our duration management strategies also included the use of forward interest rate swaps, a type of derivative financial instrument. As discussed in our last shareholder report, we began using these swaps in late 2004 in an effort to reduce the interest rate risk of these three Funds. These hedges were not an attempt to profit from correctly predicting the timing and direction of interest rate movements. Instead, our sole objective was to reduce the Funds' durations (and resulting price sensitivity) without having a negative impact on their income streams or common share dividends over the short term. During this reporting period, the hedges performed as expected and had a positive impact on the returns of NFZ, NKR and NXE. As long-term interest rates rose, the value of the hedges increased while the valuation of the Funds' holdings generally declined.

How did the Funds perform?

Individual results for these Funds, as well as for relevant indexes and peer groups, are presented in the accompanying table.

Total Returns on Net Asset Value*

* Six-month returns are cumulative; returns for one year, five years, and ten years are annualized.

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of

taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

- (1) The Lehman Brothers Municipal Bond Index is an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses. It is not possible to invest directly in an index.
- (2) The Lipper Other State Municipal Debt Funds category average is calculated using the returns of all closed-end exchange-traded funds in this category for each period as follows: 6 months, 44 funds; 1 year, 44 funds; 5 years, 19 funds; and 10 years, 17 funds. Fund and Lipper returns assume reinvestment of dividends.

5

For the six months ended January 31, 2006, the cumulative returns on net asset value (NAV) for NKR, NXE and NTX outperformed the return on the Lehman Brothers Municipal Bond Index, while NAZ and NFZ underperformed this measure. All five of the Funds in this report exceeded the average return for the Lipper Other States peer group over the reporting period.

One of the factors affecting the six-month performance of the Funds relative to that of the unleveraged Lehman Brothers municipal index was the Funds' use of financial leverage. While leveraging provides opportunities for additional income and total returns for common shareholders when interest rates fall or remain consistently low (as they have over the past several years), this benefit is reduced when interest rates rise. With the increase in long-term interest rates during this six-month period, the decline in value of the bonds in these Funds' portfolios was exacerbated by the effects of leveraging. In addition, the benefits of leveraging are tied in part to the short-term rates leveraged Funds pay their MuniPreferred(R) shareholders. During periods of low short-term rates, these Funds generally pay lower dividends to their MuniPreferred shareholders, which can leave more earnings to support common share dividends. Conversely, when short-term interest rates rise, as they did during this reporting period, the Funds' borrowing costs also rise, impacting the Funds' income streams, and total returns. However, we remain convinced that, over the long term, leveraging should work to the benefit of the Funds' performance as the older Funds' 5-year and 10-year absolute and relative return performance illustrates.

During this reporting period, positive contributors to the Funds' returns included exposure to the intermediate part of the yield curve, allocations to lower-rated credits, pre-refunding activity in all of the Funds, and credit upgrades of several of the Arizona Funds' holdings. As mentioned earlier, the hedging strategies we employed in NFZ, NKR and NXE also had a positive impact on the performance of these Funds for the period.

As the yield curve continued to flatten over the course of this period, bonds with intermediate maturities generally outperformed both longer-maturity bonds and those with short maturities. Yield curve positioning or, more specifically, greater exposure to the intermediate part of the curve helped the performance of all of these Funds. However, NAZ had more exposure to the longer end of the curve than the other four

6

Funds in this report, which hampered its performance. Part of the duration management strategies discussed earlier included efforts to more closely align the yield curve positioning of all of these Funds.

All of the Funds also benefited from their allocations of lower-quality credits, as bonds rated BBB or lower and non-rated bonds generally outperformed higher-rated securities. This was largely the result of investor demand for the higher yields typically associated with lower-quality bonds, which drove up the prices of these bonds. Among the holdings making positive contributions to the Funds' returns for this period were those from sectors that tend to have a greater number of lower-quality credits, including healthcare (especially hospitals), housing, and bonds backed by the 1998 master tobacco settlement agreement. With some signs of improvement in the airline industry, NTX's small position in American Airlines bonds, which were rated CCC by S&P as of the end of the reporting period, also contributed to this Fund's performance.

We continued to see a substantial number of refinancings during this period, which benefited the Funds through price appreciation and enhanced credit quality. As the yield curve flattened, the impact of price appreciation from advance refundings generally was less than in the previous reporting period.

NAZ, NKR and NXE also benefited from price appreciation associated with the recent credit upgrade and improved tradability of bonds issued by Arizona Health for Phoenix Children's Hospital. These bonds, which had been rated Ba2 (sub-investment grade) by Moody's were upgraded prior to the beginning of this reporting period to Baa3 (investment-grade) based on the hospital's stronger financial picture. Due to the size of NAZ's position (\$2 million in par value), the appreciation of these bonds made this holding the second largest contributor to NAZ's performance for the period.

While pre-refundings generally enhanced performance for this six-month period, the rising interest rate environment (especially in the one- to five-year part of the yield curve) during this time meant that the Funds' holdings of older, previously pre-refunded bonds tended to underperform the general municipal market, due primarily to the shorter effective maturities of these bonds. This was especially true in NAZ, which had the largest allocation of pre-refunded bonds among the Funds in this report. In addition, NFZ

7

held bonds issued for a federally guaranteed multifamily housing project that were restructured by the Federal Housing Administration, which had a negative impact on the Fund's performance during this period.

How were the Funds positioned in terms of credit quality and bond calls as of January 31, 2006?

We continued to believe that maintaining strong credit quality was an important requirement. As of January 31, 2006, all of these Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 75% in NKR to 78% in NXE, 79% in NTX and 81% in NFZ and NAZ.

As of January 31, 2006, potential call exposure for the period February 2006 through the end of 2007 ranged from 0% in NXE to 1% in NKR, 4% in NAZ, 6% in NTX and 10% in NFZ. The number of actual bond calls in all of these Funds depends largely on future market interest rates.

8

Dividend and Share Price
Information

All of these Funds use leverage to potentially enhance opportunities for additional income for common shareholders. During periods of rising short-term interest rates, as was the case during this reporting period, the Funds' borrowing costs also rise, reducing the extent of the benefits of leveraging. The Funds' income streams were also impacted as the proceeds from older, higher-yielding bonds that matured or were called and were reinvested into bonds that generally offered lower yields. These factors resulted in one monthly dividend reduction in NKR, NXE and NTX and two reductions in NAZ and NFZ over the six-month period ended January 31, 2006.

In addition, due to normal portfolio activity, common shareholders of the following Funds received capital gains or net ordinary income distributions at the end of December 2005 as follows:

	Long-Term Capital Gains (per share)	Ordinary Income (per share)
NFZ	\$0.0764	--
NKR	\$0.1058	--
NTX	--	\$0.0020

These distributions, which represented an important part of NFZ's and NKR's total returns for this period, were generated by bond calls and the sale of appreciated securities. This had a slight negative impact on the Funds' earning power per common share and was a minor factor in the common share dividend reductions noted above.

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of January 31, 2006, NFZ, NKR and NTX had positive UNII balances for financial statement purposes, and positive UNII balances, based on our best estimate, for tax purposes. As of January 31, 2006, NAZ and NXE had negative UNII balances for financial statement purposes and positive UNII balances, based on our best estimates, for tax purposes.

Financial Statements (Unaudited)

1. General Information and Significant Accounting Policies

The state funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Arizona Premium Income Municipal Fund, Inc. (NAZ), Nuveen Arizona Dividend Advantage Municipal Fund (NFZ), Nuveen Arizona Dividend Advantage Municipal Fund 2 (NKR), Nuveen Arizona Dividend Advantage Municipal Fund 3 (NXE) and Nuveen Texas Quality Income Municipal Fund (NTX). Common shares of Arizona Premium Income (NAZ) and Texas Quality Income (NTX) are traded on the New York Stock Exchange while Common shares of Arizona Dividend Advantage (NFZ), Arizona Dividend Advantage 2 (NKR) and Arizona Dividend Advantage 3 (NXE) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Each Fund seeks to provide current income exempt from both regular federal and

applicable state income taxes, if any, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state or certain U.S. territories.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles.

Investment Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When market price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. Prices of derivative investments are also provided by an independent pricing service approved by each Fund's Board of Directors/Trustees. If the pricing service is unable to supply a price for a municipal bond or derivative investment, each Fund may use a market price or fair market value quote provided by a major broker/dealer in such investments. If it is determined that the market price or fair market value quote for an investment is unavailable or inappropriate, the Board of Directors/Trustees of the Funds, or its designee, may establish a fair value for the investment. Temporary investments in securities that have variable rate and demand features qualifying them as short-term investments are valued at amortized cost, which approximates market value.

Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method. Investments purchased on a when-issued or delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At January 31, 2006, there were no such outstanding purchase commitments in any of the Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also includes paydown gains and losses, if any.

41

Notes to Financial Statements (Unaudited) (continued)

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and applicable state

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

income taxes, if any, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

Preferred Shares

The Funds have issued and outstanding Preferred shares, \$25,000 stated value per share, as a means of effecting financial leverage. Each Fund's Preferred shares are issued in one or more Series. The dividend rate paid by the Funds on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable at the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each Fund is as follows:

	Arizona Premium Income (NAZ)	Arizona Dividend Advantage (NFZ)	Arizona Dividend Advantage 2 (NKR)	Arizona Dividend Advantage 3 (NXE)	Texas Quality Income (NTX)

Forward Swap Transactions

The Funds are authorized to invest in certain derivative financial instruments. The Funds' use of forward interest rate swap transactions is intended to mitigate the negative impact that an increase in long-term interest rates could have on Common share net asset value. Forward interest rate swap transactions involve each Fund's agreement with the counterparty to pay, in the future, a fixed rate payment in exchange for the counterparty paying the Fund a variable rate payment, the accruals for which would begin at a specified date in the future (the "effective date"). The amount of the payment obligation is based on the notional amount of the forward swap contract, and would increase or decrease in value based primarily on the extent to which long-term interest rates for bonds having a maturity of the swaps' termination date were to increase or decrease. The Funds may close out a contract prior to the effective date, at which point a realized gain or loss would be recognized. When a forward swap is terminated, it ordinarily does not involve the delivery of securities or other underlying assets or principal, but rather is settled in cash on a net basis. Each Fund intends, but is not obligated to, terminate its forward swaps before the effective date. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the credit risk associated with

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

a counterparty failing to honor its commitment to pay any realized gain to the Fund upon termination. To minimize such credit risk, all counterparties are required to pledge collateral daily (based on the daily valuation of each swap) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when any of the Funds have an unrealized loss on a swap contract, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the swap valuations fluctuate, either up or down, by at least the predetermined threshold amount.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Indemnifications

Under the Funds' organizational documents, their Officers and Directors/Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

4. Income Tax Information

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses, timing differences in recognizing taxable market discount and timing differences in recognizing certain gains and losses on investment transactions.

At January 31, 2006, the cost of investments was as follows:

	Arizona Premium Income (NAZ)	Arizona Dividend Advantage (NFZ)	Arizona Dividend Advantage 2 (NKR)	Arizona Dividend Advantage (NXE)
Cost of investments	\$88,778,083	\$33,820,272	\$52,597,463	\$64,374,358

At July 31, 2005, the Funds' last fiscal year end, the following Funds had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as follows:

	Arizona Premium Income (NAZ)	Arizona Dividend Advantage 3 (NXE)	Texas Quality Income (NTX)
Expiration year:			
2011	\$ 669,574	\$ --	\$ --
2012	1,553,629	205,820	1,204,018
2013	--	134,877	--
Total	\$2,223,203	\$340,697	\$1,204,018

Arizona Dividend Advantage 3 (NXE) elected to defer net realized losses from investments incurred from November 1, 2004 through July 31, 2005 ("post-October losses"), in accordance with federal income tax regulations. Post-October losses of \$376,462 were treated as having arisen on the first day of the current fiscal year.

5. Management Fee and Other Transactions with Affiliates

Each Fund's management fee is separated into two components - a complex-level component, based on the aggregate amount of all fund assets managed by Nuveen Asset Management (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc., and a specific fund-level component, based only on the amount of assets within each individual fund. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee, payable monthly, for each Fund is based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

Average Daily Net Assets (including net assets attributable to Preferred shares)	Arizona Premium Income (NAZ) Texas Quality Income (NTX) Fund-Level Fee Rate
For the first \$125 million	.4500%
For the next \$125 million	.4375
For the next \$250 million	.4250
For the next \$500 million	.4125
For the next \$1 billion	.4000
For the next \$3 billion	.3875
For net assets over \$5 billion	.3750

Average Daily Net Assets (including net assets attributable to Preferred shares)	Arizona Dividend Advantage (NFZ) Arizona Dividend Advantage 2 (NKR) Arizona Dividend Advantage 3 (NXE) Fund-Level Fee Rate

For the next \$125 million	.4375
For the next \$250 million	.4250
For the next \$500 million	.4125
For the next \$1 billion	.4000
For net assets over \$2 billion	.3750

45

Notes to
Financial Statements (Unaudited) (continued)

The annual complex-level fee, payable monthly, which is additive to the fund-level fee, for all Nuveen sponsored funds in the U.S., is based on the aggregate amount of total fund assets managed as stated in the table below. As of January 31, 2006, the complex-level fee rate was .1891%.

Complex-Level Assets (1)	Complex-Level Fee Rate
For the first \$55 billion	.2000%
For the next \$1 billion	.1800
For the next \$1 billion	.1600
For the next \$3 billion	.1425
For the next \$3 billion	.1325
For the next \$3 billion	.1250
For the next \$5 billion	.1200
For the next \$5 billion	.1175
For the next \$15 billion	.1150
For Managed Assets over \$91 billion(2)	.1400

(1) The complex-level fee component of the management fee for the funds is calculated based upon the aggregate Managed Assets ("Managed Assets" means the average daily net assets of each fund including assets attributable to all types of leverage used by the Nuveen funds) of Nuveen-sponsored funds in the U.S.

(2) With respect to the complex-wide Managed Assets over \$91 billion, the fee rate or rates that will apply to such assets will be determined at a later date. In the unlikely event that complex-wide Managed Assets reach \$91 billion prior to a determination of the complex-level fee rate or rates to be applied to Managed Assets in excess of \$91 billion, the complex-level fee rate for such complex-wide Managed Assets shall be .1400% until such time as a different rate or rates is determined.

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Directors/Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Directors/Trustees has adopted a deferred compensation plan for independent Directors/Trustees that enables Directors/Trustees to elect to defer receipt of

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised Funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised Funds.

Reinvest Automatically
Easily and Conveniently

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

Nuveen Exchange-Traded Closed-End Funds
Dividend Reinvestment Plan

Your Nuveen Exchange-Traded Closed-End Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

Easy and convenient

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

How shares are purchased

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

Flexible

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

You may also request Fund information by sending an e-mail request to publicinfo@sec.gov or by writing to the SEC's Public References Section at 450 Fifth Street NW, Washington, D.C. 20549.

Glossary of terms used in this report

Average Annual Total Return: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.

Average Effective Maturity: The average of all the maturities of the bonds in a Fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

Leverage-Adjusted Duration: Duration is a measure of the expected period over which a bond's principal and interest will be paid, and consequently is a measure of the sensitivity of a bond's or bond Fund's value to changes when market interest rates change. Generally, the longer a bond's or Fund's duration, the more the price of the bond or Fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is longer than the duration of the Fund's portfolio of bonds.

Edgar Filing: NUVEEN ARIZONA PREMIUM INCOME MUNICIPAL FUND INC - Form N-CSRS

Market Yield (also known as Dividend Yield or Current Yield): An investment's current annualized dividend divided by its current market price.

Net Asset Value (NAV): A Fund's common share NAV per share is calculated by subtracting the liabilities of the Fund (including any MuniPreferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

Taxable-Equivalent Yield: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.
