FROM THE TRUSTEES

[GRAPHIC OMITTED: PHOTO OF JOHN A. HILL AND GEORGE PUTNAM III]

Dear Fellow Shareholder:

During the semiannual period ended March 31, 2003, Putnam Master Intermediate Income Trust turned in solid results at net asset value and outperformed its primary benchmark. As you will see in the management report that follows, this outcome was helped by the spread in yields that favored the lower-rated issues in which your fund typically invests, as well as the ongoing stock market volatility that is still driving equity investors to the fixed-income markets.

The fund's returns at market price, however, were more modest. As your fund's management team explains in the following report, the decline in market price reflects a decline in demand resulting from the dividend reduction implemented during this semiannual period. The managers also discuss the reasons for the fund's performance relative to its benchmark and other comparative indexes in the context of the prevailing market and economic environment. They conclude by offering their views on prospects for the fund during the second half of its fiscal year.

As we look back on one of the most challenging periods in recent investment history, we would like you to know how much we appreciate your patience and continued confidence in Putnam. We believe those who maintain a long-term focus and a diversified approach to investing should eventually be rewarded for their fortitude.

Respectfully yours,

/S/ JOHN A. HILL

/S/ GEORGE PUTNAM, III

John A. Hill
Chairman of the Trustees
May 21, 2003

George Putnam, III
President of the Funds

REPORT FROM FUND MANAGEMENT

FUND HIGHLIGHTS

* During the semiannual period ended March 31, 2003, Putnam Master Intermediate Income Trust had a total return at net asset value (NAV) of

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

9.44%. The fund's return at market price was 2.81% for the six-month period.

- * At NAV, the fund outperformed its primary benchmark, the Lehman Government Credit Index, which returned 3.40% during the period. The fund lagged its other comparative indexes, the Citigroup Non-U.S. World Government Bond Index, and the JP Morgan Global High Yield Index, which returned 10.02% and 12.61%, respectively.
- * The fund underperformed the average return for the Lipper Flexible Income Funds category, which was 10.16% for the six-month period.
- * In February 2003, the fund's dividend was reduced to \$0.038 per share. See page 6 for more information.
- * See the Performance Summary on page 8 for complete fund performance, comparative performance, and Lipper data.

* PERFORMANCE COMMENTARY

In mid October, shortly after the start of the fund's fiscal year, the higher-yielding, non-Treasury bonds that we refer to as "credit sectors" began to significantly outperform Treasuries. Since the fund held a significant position in corporate high-yield bonds, which rallied during the period, it outperformed the Lehman Government Credit Index, which is composed mainly of Treasuries and other investment-grade bonds. The fund underperformed its Lipper peer group because the stronger-performing funds in the Lipper category generally had a larger weighting in emerging-markets bonds, which generally performed well during the period.

The fund's lower return at market price reflects February's dividend reduction. Due to the lower dividend, investor demand for the fund, a key factor in market price performance, declined over the period.

Fund Profile

Putnam Master Intermediate Income Trust seeks high current income and relative stability by investing in limited-maturity bonds in the investment-grade and high-yield sectors, as well as non-U.S. bond markets. The fund may be appropriate for investors seeking high current income, asset class diversification, or both.

* MARKET OVERVIEW

The fund was fortunate to have started its fiscal year just weeks before a significant turning point in the bond market. The change in market sentiment occurred after a dismal four-month period for both the stock market and the economy, during which investors flocked to the relative safety of Treasuries. This flight to quality had a severe negative effect on high-yield bonds, which had reached historically attractive price levels by the beginning of October. When Treasury yields became abnormally low and economic forecasts for 2003 improved in mid October, the Treasury sell-off commenced. From that point through the end of the fund's semiannual period, the credit sectors -- namely, corporate high-yield bonds and corporate investment-grade bonds -- outperformed Treasuries. Mortgage-backed securities (MBSs), which are not considered part of the credit sectors but offer higher yields than Treasuries, also outperformed Treasuries. In addition, as the outlook for the economy became more uncertain and uncertainty about the situation in Iraq kept investors out of the stock market, the bond market generally performed well.

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

Slower growth in Europe helped reduce inflationary pressure, which was positive for the European government-bond markets. In emerging markets, higher oil prices helped some countries, while political and economic turmoil hurt others (see page 5 for more details).

MARKET SECTOR PERFORMANCE 6 MONTHS ENDED 3/31/03

Bonds

Lehman Government Credit Index (fund benchmark)	3.40%
-----	-----
Lehman Aggregate Bond Index (broader bond market)	2.99%
-----	-----
Citigroup Non-U.S. World Government Bond Index (intl. govt. bonds)	10.02%
-----	-----
JP Morgan Global High Yield Index (high-yield bonds)	12.61%
-----	-----

Equities

S&P 500 Index (broad U.S. stock market)	5.02%
-----	-----
Russell 2000 Growth Index (growth stocks)	3.34%
-----	-----
Russell 2000 Value Index (value stocks)	-0.41%
-----	-----

These indexes provide an overview of performance in different market sectors for the six months ended March 31, 2003.

* STRATEGY OVERVIEW

The fund's multisector strategy, which focuses on investing in a diverse array of higher-yielding bond sectors, was well-suited to the market and economic conditions of this six-month period. Virtually all of the fund's areas of emphasis -- high-yield corporate bonds, investment-grade corporate bonds, MBSs, international government bonds, and emerging-markets bonds -- performed well during the period. When the rally in these sectors materialized, we began adding to those that had been especially beaten down, i.e., the corporate investment-grade and corporate high-yield sectors.

The fund's emerging-markets strategy focused on careful fundamental analysis of country-related risks. The currency strategy continued to favor a weakening dollar, versus other currencies (primarily the euro), and was based on our belief that the U.S. economy is still fundamentally in a fragile state. While we do not believe the economy will contract in 2003, we are awaiting more solid evidence of sustained growth before we begin favoring the dollar.

The fund is designed to keep duration, a measure of interest-rate sensitivity, relatively short. As a result, the fund's holdings have been more affected by sharp declines in short- and intermediate-maturity yields in the marketplace. These yield declines contributed to a reduction in the fund's dividend during the period (please see page 6 for details).

[GRAPHIC OMITTED: horizontal bar chart SECTOR WEIGHTINGS COMPARED*]

SECTOR WEIGHTINGS COMPARED*

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

	as of 9/30/02	as of 3/31/03
Mortgage-backed securities	3.1%	10.0%
U.S. investment grade	27.0%	19.2%
Corporate high yield	44.3%	45.9%
Non-U.S. (ex-emerging markets)	12.9%	13.5%
Emerging markets	10.0%	9.6%

Footnote reads:

*This chart shows how the fund's top sector weightings have changed over the last six months. Weightings are shown as a percentage of net assets. Holdings and sectors will vary over time.

* HOW FUND HOLDINGS/SECTOR ALLOCATIONS AFFECTED PERFORMANCE

The fund's largest sector weighting (approximately half of the portfolio) was in high-yield corporate bonds, and this position was a significant contributor to the fund's strong returns during the period. High-yield bonds have performed well during the past six months for several reasons. Among the most important is the decline in default rates. Although still high by historical standards, corporate defaults have steadily declined since hitting a peak in January 2002. This trend has been seen as a positive sign that, if it continues, may help high-yield bond performance over the next several years. Second, investors have been seeking higher yields in the marketplace and have become more willing to take on risk in exchange. As a result, high-yield bonds have significantly outperformed Treasuries, causing a narrowing in the yield spread between Treasuries and high-yield bonds. This narrowing has been another strong driver of high-yield bond performance. Finally, corporations are generally focusing on reducing debt and improving their balance sheets, which has led to higher overall credit quality and has helped attract investors.

Footnote reads:

*These holdings represent 20.4% of the fund's net assets as of 3/31/03.
The fund's holdings will change over time.

Among the fund's high-yield holdings, DirecTV and Nextel Communications performed well. Both companies have seen an increase in subscribers and have solid businesses, and both have taken steps to reduce debt. Nextel, in particular, has retired several billion dollars in corporate debt in the past year. Within the high-yield sector, however, the fund's aerospace holdings detracted from performance as a result of significant declines in air travel. In addition, some health-care holdings underperformed, including Healthsouth, a hospital owner that is struggling with allegations of accounting problems, and Fleming Companies, a food distributor serving the grocery-store industry. The fund has reduced these holdings, but we believe there is still value in both firms and anticipate that we will maintain the fund's current weightings.

We increased the fund's corporate investment-grade bond holdings at the beginning of the period and kept this sector's weighting high before cutting it back significantly near the period's end. This helped performance, as the sector rallied. Corporate investment-grade bonds had suffered greatly early in 2002 from the weakening economy and a wave of corporate-malfeasance allegations. Beginning in October 2002, however, these securities began to attract investors for many of the same reasons that corporate high-yield bonds had -- narrowing yield spreads, fewer credit problems, and a trend toward stronger balance sheets and lower debt. Toward the end of the period, after the fund had benefited from the rally, we felt that the sector's attractiveness had diminished and we reduced the weighting.

The mortgage-backed securities (MBSs) sector was another strong area for the fund, attracting investors who sought higher returns than Treasuries but also demanded higher credit quality and were willing to forego the additional yield that accompanied riskier bond sectors. Putnam's MBS team focused on keeping duration, or interest sensitivity, low, and diversified the fund's holdings across a range of maturities, coupons, and agencies.

The fund's international government bonds benefited from slowing global economies, especially in Europe, where the Swedish, French, and German bond markets performed well as inflation remained low and equity

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

performance was weak. Our security and country selections in emerging markets were on target, but we were underweight in this sector, which detracted from the fund's performance relative to its benchmarks. Within emerging markets, the fund favored oil-exporting countries that were benefiting from higher oil prices and strengthening economies, such as Russia, Mexico, Colombia, and Bulgaria. Also as a result of our ongoing risk management, we were able to avoid being overexposed to countries such as Venezuela, Brazil, and Turkey, which performed poorly due to political and economic turmoil.

Please note that all sectors and holdings discussed in this report are subject to review in accordance with the fund's investment strategy and may vary in the future.

* THE FUND'S MANAGEMENT TEAM

This fund is managed by the Putnam Core Fixed-Income Team. The members of this team are D. William Kohli (Portfolio Leader), David Waldman (Portfolio Member), Kevin Cronin, Carl Bell, Rob Bloemker, Andrea Burke, Steve Horner, James Prusko, Michael Salm, and John Van Tassel.

OF SPECIAL INTEREST

* As a result of significant declines in the yields of shorter- and intermediate-duration bonds over the past several years, the level of income produced by the fund's holdings has declined. In February 2003, the fund lowered its distribution rate from \$0.045 per share to \$0.038 per share.

THE OUTLOOK FOR YOUR FUND

The following commentary reflects anticipated developments that could affect your fund over the next six months, as well as your management team's plans for responding to them.

The outlook for the remainder of 2003 appears uncertain, as the end of the U.S. military campaign in Iraq has caused investors to refocus on the economy and corporate earnings. While consumer mortgage refinancing continues at a brisk pace due to low mortgage rates, which has helped keep consumer spending from sagging, corporate spending remains in the doldrums. Moreover, we have not seen a decrease in the unemployment rate.

Despite these uncertainties, we do not believe the economy is likely to contract, resulting in a "double-dip" recession. We expect moderate, albeit slow, growth for 2003, with the possibility of an increase in interest rates, especially if economic growth appears likely to strengthen. Overseas, we anticipate more of the same: with continued slow growth in Europe and uneven returns in emerging markets, some countries should continue to outperform, while others will likely remain volatile.

In such an environment, we believe that the sectors in which this fund invests, which are less sensitive to interest-rate movements than Treasuries, are well positioned to perform. In addition, the fund's emphasis on a shorter duration, which is designed to reduce sensitivity to interest-rate changes, may mitigate the impact of rising interest rates, if rates do indeed rise this year. In general, if investors remain skeptical about the stock market, we believe that they may continue to seek higher-yielding fixed-income securities.

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

The views expressed in this report are exclusively those of Putnam Management. They are not meant as investment advice. International investing involves certain risks, such as currency fluctuations, economic instability, and political developments. Lower-rated bonds may offer higher yields in return for more risk. Mutual funds that invest in government securities are not guaranteed. Mortgage-backed securities are subject to prepayment risk.

PERFORMANCE SUMMARY

This section provides information about your fund's performance during its semiannual period, which ended March 31, 2003. Performance should always be considered in light of a fund's investment strategy. Past performance does not indicate future results. More recent returns may be less or more than those shown. Investment return and principal value will fluctuate and you may have a gain or a loss when you sell your shares. A profile of your fund's strategy appears on the first page of this report. See page 9 for definitions of some terms used in this section.

TERMS AND DEFINITIONS

Total return shows how the value of the fund's shares changed over time, assuming you held the shares through the entire period and reinvested all distributions in the fund.

Net asset value (NAV) is the value of all your fund's assets, minus any liabilities, divided by the number of outstanding shares.

Market price is the current trading price of one share of the fund. Market prices are set by transactions between buyers and sellers on the New York Stock Exchange.

COMPARATIVE INDEXES

Lehman Government Credit Index is an unmanaged index of U.S. fixed-income securities.

Citigroup (formerly Salomon Smith Barney) Non-U.S. World Government Bond Index is an unmanaged index of government bonds from 10 countries.

JP Morgan Global High Yield Index is an unmanaged index of global high-yield debt securities.

Lehman Aggregate Bond Index is an unmanaged index used as a general

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

measure of U.S. fixed-income securities.

Russell 2000 Growth Index is an unmanaged index of those companies in the Russell 2000 Index chosen for their growth orientation.

Russell 2000 Value Index is an unmanaged index of those companies in the Russell 2000 Index chosen for their value orientation.

Standard & Poor's (S&P) 500 Index is an unmanaged index of common stock performance.

Indexes assume reinvestment of all distributions and do not account for fees. Securities and performance of a fund and an index will differ. You cannot invest directly in an index.

Lipper Inc. is a third-party industry ranking entity that ranks funds (without sales charges) with similar current investment styles or objectives as determined by Lipper. Lipper category averages reflect performance trends for funds within a category and are based on results at net asset value.

A NOTE ABOUT DUPLICATE MAILINGS

In response to investors' requests, the SEC has modified mailing regulations for proxy statements, semiannual and annual reports, and prospectuses. Putnam is now able to send a single copy of these materials to customers who share the same address. This change will automatically apply to all shareholders except those who notify us. If you would prefer to receive your own copy, please call Putnam at 1-800-225-1581.

A GUIDE TO THE FINANCIAL STATEMENTS

These sections of the report, as well as the accompanying Notes, constitute the fund's financial statements.

The fund's portfolio lists all the fund's investments and their values as of the last day of the reporting period. Holdings are organized by asset type and industry sector, country, or state to show areas of concentration and diversification.

Statement of assets and liabilities shows how the fund's net assets and share price are determined. All investment and noninvestment assets are added together. Any unpaid expenses and other liabilities are subtracted from this total. The result is divided by the number of shares to determine the net asset value per share, which is calculated separately for each class of shares. (For funds with preferred shares, the amount subtracted from total assets includes the net assets allocated to remarketed preferred shares.)

Statement of operations shows the fund's net investment gain or loss. This is done by first adding up all the fund's earnings -- from dividends and interest income -- and subtracting its operating expenses to determine net investment income (or loss). Then, any net gain or loss the fund realized on the sales of its holdings -- as well as any unrealized gains or losses over the period -- is added to or subtracted from the net investment result to determine the fund's net gain or loss for the fiscal period.

Statement of changes in net assets shows how the fund's net assets were affected by distributions to shareholders and by changes in the number of the fund's shares. It lists distributions and their sources (net

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

investment income or realized capital gains) over the current reporting period and the most recent fiscal year-end. The distributions listed here may not match the sources listed in the Statement of operations because the distributions are determined on a tax basis and may be paid in a different period from the one in which they were earned.

Financial highlights provide an overview of the fund's investment results, per-share distributions, expense ratios, net investment income ratios, and portfolio turnover in one summary table, reflecting the five most recent reporting periods. In a semiannual report, the highlight table also includes the current reporting period. For open-end funds, a separate table is provided for each share class.

(a) Per share net investment income has been determined on the basis of weighted average number of shares outstanding during the period.

(b) Total return does not reflect the effect of sales charges.

(c) Includes amounts paid through expense offset arrangements (Note 2).

(d) Portfolio turnover excludes the impact of assets received from the acquisition of Putnam Intermediate Government Income Trust.

(e) Portfolio turnover excludes certain treasury note transactions executed in connection with a short-term trading strategy.

The accompanying notes are an integral part of these financial statements.

NOTES TO FINANCIAL STATEMENTS
March 31, 2003 (Unaudited)

Note 1

Significant accounting policies

Putnam Master Intermediate Income Trust (the "fund") is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company and is authorized to issue an unlimited number of shares. The fund's investment objective is to seek, with equal emphasis, high current income and relative stability of net asset value, by allocating its investments among the U.S. investment grade sector, high-yield sector and international sector.

The following is a summary of significant accounting policies consistently followed by the fund in the preparation of its financial statements. The preparation of financial statements is in conformity with accounting principles generally accepted in the United States of America and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

A) Security valuation Investments for which market quotations are readily available are valued at market value, which is determined using the last reported sales price on its principal exchange, or if no sales are reported -- as in the case of some securities traded over-the-counter -- the last reported bid price. Market quotations are not considered to be readily available for certain debt obligations; such investments are valued at fair value on the basis of valuations furnished by an independent pricing service or dealers, approved by the Trustees. Such services or dealers determine valuations for normal institutional-size trading units of such securities using methods based on market transactions for comparable securities and various relationships, generally recognized by institutional traders, between securities. For foreign investments, if trading or events occurring in other markets after the close of the principal exchange in which the securities are traded are expected to materially affect the value of the investments, then those investments are valued, taking into consideration these events, at their fair value following procedures approved by the Trustees. Securities quoted in foreign currencies are translated into U.S. dollars at the current exchange rate. Short-term investments having remaining maturities of 60 days or less are valued at amortized cost, which approximates fair value. Other investments, including restricted securities, are valued at fair value following procedures approved by the Trustees.

B) Joint trading account The fund may transfer uninvested cash balances, including cash collateral received under security lending arrangements, into a joint trading account along with the cash of other registered investment companies and certain other accounts managed by Putnam Investment Management, LLC ("Putnam Management"), the fund's manager, an indirect wholly-owned subsidiary of Putnam, LLC. These balances may be invested in issuers of high-grade short-term investments having maturities of up to 397 days for collateral received under security lending arrangements and up to 90 days for other cash investments.

C) Security transactions and related investment income Security

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

transactions are recorded on the trade date (date the order to buy or sell is executed). Gains or losses on securities sold are determined on the identified cost basis.

Interest income is recorded on the accrual basis. Dividend income is recognized on the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. All premiums/discounts are amortized/accreted on a yield-to-maturity basis.

D) Foreign currency translation The accounting records of the fund are maintained in U.S. dollars. The market value of foreign securities, currency holdings, and other assets and liabilities are recorded in the books and records of the fund after translation to U.S. dollars based on the exchange rates on that day. The cost of each security is determined using historical exchange rates. Income and withholding taxes are translated at prevailing exchange rates when earned or incurred. The fund does not isolate that portion of realized or unrealized gains or losses resulting from changes in the foreign exchange rate on investments from fluctuations arising from changes in the market prices of the securities. Such gains and losses are included with the net realized and unrealized gain or loss on investments. Net realized gains and losses on foreign currency transactions represent net realized exchange gains or losses on closed forward currency contracts, disposition of foreign currencies, currency gains and losses realized between the trade and settlement dates on securities transactions and the difference between the amount of investment income and foreign withholding taxes recorded on the fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized appreciation and depreciation of assets and liabilities in foreign currencies arise from changes in the value of open forward currency contracts and assets and liabilities other than investments at the period end, resulting from changes in the exchange rate. Investments in foreign securities involve certain risks, including those related to economic instability, unfavorable political developments, and currency fluctuations, not present with domestic investments.

E) Forward currency contracts The fund may buy and sell forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the U.S. dollar of the currencies in which its portfolio securities are denominated or quoted (or an increase in the value of a currency in which securities a fund intends to buy are denominated, when a fund holds cash reserves and short term investments). The U.S. dollar value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked to market daily and the change in market value is recorded as an unrealized gain or loss. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavorably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position. Forward currency contracts outstanding at period end are listed after The fund's portfolio.

F) Futures and options contracts The fund may use futures and options contracts to hedge against changes in the values of securities the fund owns or expects to purchase. The fund may also write options on securities it owns or in which it may invest to increase its current returns.

The potential risk to the fund is that the change in value of futures and options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, if there is an illiquid secondary market for the contracts, or if the counterparty to the contract is unable to perform. When the contract is closed, the fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. Realized gains and losses on purchased options are included in realized gains and losses on investment securities.

Futures contracts are valued at the quoted daily settlement prices established by the exchange on which they trade. The fund and the broker agree to exchange an amount of cash equal to the daily fluctuation in the value of the futures contract. Such receipts or payments are known as "variation margin." Exchange traded options are valued at the last sale price, or if no sales are reported, the last bid price for purchased options and the last ask price for written options. Options traded over-the-counter are valued using prices supplied by dealers. Future and written option contracts outstanding at period end are listed after The fund's portfolio.

G) Interest rate swap contracts The fund may enter into interest rate swap contracts, which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage the fund's exposure to interest rates. Interest rate swap contracts are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments made or received are recognized as part of interest income. A portion of the payments received or made upon early termination are recognized as realized gain or loss. The fund could be exposed to credit or market risk due to unfavorable changes in the fluctuation of interest rates or if the counterparty defaults on its obligation to perform. Interest rate swap contracts outstanding at period end are listed after The fund's portfolio.

H) Credit default contracts The fund may enter into credit default contracts where one party, the protection buyer, makes an upfront payment to a counter party, the protection seller, in exchange for the right to receive a contingent payment as a result of a credit event related to a specified security or index. The upfront payment received by the fund, as the protection seller, is recorded as a liability on the fund's books. The credit default contracts are marked to market daily based upon quotations from market makers and the change, if any, is recorded as unrealized gain or loss. Payments received or made as a result of a credit event or termination of the contract are recognized, net of a proportional amount of the upfront payment, as realized gains or losses. In addition to bearing the risk that the credit event will occur, the fund could be exposed to market risk due to unfavorable changes in interest rates or in the price of the underlying security or index, the possibility that the fund may be unable to close out its position at the same time or at the same price as if it had purchased comparable publicly traded securities or that the counterparty may default on its obligation to perform. Credit default contracts outstanding at period end are listed after The fund's portfolio.

I) TBA purchase commitments The fund may enter into "TBA" (to be announced) commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalized. However, the amount of the commitments will not significantly differ

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

from the principal amount. The fund holds, and maintains until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the fund may enter into offsetting contracts for the forward sale of other securities it owns. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities themselves, and involve a risk of loss if the value of the security to be purchased declines prior to the settlement date, which risk is in addition to the risk of decline in the value of the fund's other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities, according to the procedures described under "Security valuation" above.

Although the fund will generally enter into TBA purchase commitments with the intention of acquiring securities for its portfolio or for delivery pursuant to options contracts it has entered into, the fund may dispose of a commitment prior to settlement if Putnam Management deems it appropriate to do so.

J) TBA sale commitments The fund may enter into TBA sale commitments to hedge its portfolio positions or to sell mortgage-backed securities it owns under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities, or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction.

Unsettled TBA sale commitments are valued at the current market value of the underlying securities, generally according to the procedures described under "Security valuation" above. The contract is "marked-to-market" daily and the change in market value is recorded by the fund as an unrealized gain or loss. If the TBA sale commitment is closed through the acquisition of an offsetting purchase commitment, the fund realizes a gain or loss. If the fund delivers securities under the commitment, the fund realizes a gain or a loss from the sale of the securities based upon the unit price established at the date the commitment was entered into. TBA sale commitments outstanding at period end are listed after The fund's portfolio.

K) Security lending The fund may lend securities, through its agents, to qualified borrowers in order to earn additional income. The loans are collateralized by cash and/or securities in an amount at least equal to the market value of the securities loaned. The market value of securities loaned is determined daily and any additional required collateral is allocated to the fund on the next business day. The risk of borrower default will be borne by the fund's agents, the fund will bear the risk of loss with respect to the investment of the cash collateral. Income from securities lending is included in investment income on the Statement of operations. At March 31, 2003, the value of securities loaned amounted to \$7,859. The fund received cash collateral of \$13,788 which is pooled with collateral of other Putnam funds into 28 issuers of high grade short-term investments.

L) Federal taxes It is the policy of the fund to distribute all of its taxable income within the prescribed time and otherwise comply with the provisions of the Internal Revenue Code applicable to regulated investment companies. It is also the intention of the fund to distribute an amount sufficient to avoid imposition of any excise tax under Section 4982 of the Internal Revenue Code of 1986, as amended. Therefore, no provision has been made for federal taxes on income, capital gains or unrealized appreciation on securities held nor for excise tax on income and capital gains.

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

At September 30, 2002, the fund had a capital loss carryover of approximately \$99,088,000 available to the extent allowed by tax law to offset future capital gains, if any. The amount of the carryover and the expiration dates are:

Loss Carryover	Expiration
\$7,035,000	September 30, 2003
2,793,000	September 30, 2004
1,555,000	September 30, 2005
10,040,000	September 30, 2007
25,641,000	September 30, 2008
24,593,000	September 30, 2009
27,431,000	September 30, 2010

Pursuant to federal income tax regulations applicable to regulated investment companies, the fund has elected to defer to its fiscal year ending September 30, 2003 approximately \$51,672,000 of losses recognized during the period November 1, 2001 to September 30, 2002.

The aggregate identified cost on a tax basis is \$681,089,150, resulting in gross unrealized appreciation and depreciation of \$29,412,762 and \$60,572,727, respectively, or net unrealized depreciation of \$31,159,965.

M) Distributions to shareholders Distributions to shareholders from net investment income are recorded by the fund on the ex-dividend date. Distributions from capital gains, if any, are recorded on the ex-dividend date and paid at least annually. The amount and character of income and gains to be distributed are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. Reclassifications are made to the fund's capital accounts to reflect income and gains available for distribution (or available capital loss carryovers) under income tax regulations.

Note 2

Management fee, administrative services and other transactions

Compensation of Putnam Management, for management and investment advisory services is paid quarterly based on the average net assets of the fund. Such fee is based on the following annual rates: 0.75% of the first \$500 million of average weekly net assets, 0.65% of the next \$500 million, 0.60% of the next \$500 million, and 0.55% thereafter.

The fund reimburses Putnam Management an allocated amount for the compensation and related expenses of certain officers of the fund and their staff who provide administrative services to the fund. The aggregate amount of all such reimbursements is determined annually by the Trustees.

Custodial functions for the fund's assets are provided by Putnam Fiduciary Trust Company (PFTC), a wholly-owned subsidiary of Putnam, LLC. Investor servicing agent functions are provided by Putnam Investor Services, a division of PFTC.

Under the subcustodian contract between the subcustodian bank and PFTC, the subcustodian bank has a lien on the securities of the fund to the extent permitted by the fund's investment restrictions to cover any advances made by the subcustodian bank for the settlement of securities purchased by the fund. At March 31, 2003, the payable to the

Edgar Filing: PUTNAM MASTER INTERMEDIATE INCOME TRUST - Form N-30D

subcustodian bank represents the amount due for cash advanced for the settlement of a security purchased.

The fund has entered into an arrangement with PFTC whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the fund's expenses. For the six months ended March 31, 2003, the fund's expenses were reduced by \$14,373 under these arrangements.

Each independent Trustee of the fund receives an annual Trustee fee, of which \$1,143 has been allocated to the fund, and an additional fee for each Trustees meeting attended. Trustees receive additional fees for attendance at certain committee meetings.

The fund has adopted a Trustee Fee Deferral Plan (the "Deferral Plan") which allows the Trustees to defer the receipt of all or a portion of Trustees fees payable on or after July 1, 1995. The deferred fees remain invested in certain Putnam funds until distribution in accordance with the Deferral Plan.

The fund has adopted an unfunded noncontributory defined benefit pension plan (the "Pension Plan") covering all Trustees of the fund who have served as a Trustee for at least five years. Benefits under the Pension Plan are equal to 50% of the Trustee's average total retainer and meeting fees for the three years preceding retirement. Pension expense for the fund is included in Compensation of Trustees in the Statement of operations. Accrued pension liability is included in Payable for compensation of Trustees in the Statement of assets and liabilities.

Note 3

Purchases and sales of securities

During the six months ended March 31, 2003, cost of purchases and proceeds from sales of investment securities other than U.S. government obligations and short-term investments aggregated \$404,027,336 and \$375,455,338, respectively. Purchases and sales of U.S. government obligations aggregated \$308,380,632 and \$332,993,191, respectively.

FUND INFORMATION

ABOUT PUTNAM INVESTMENTS

One of the largest mutual fund families in the United States, Putnam Investments has a heritage of investment leadership dating back to Judge Samuel Putnam, whose Prudent Man Rule has defined fiduciary tradition and practice since 1830. Founded over 65 years ago, Putnam Investments was built around the concept that a balance between risk and reward is the hallmark of a well-rounded financial program. We presently manage over 100 mutual funds in growth, value, blend, fixed income, and international.
