Note 1. Summary of Significant Accounting Policies

Description of Business

Juniper Networks, Inc. (Juniper Networks or the Company) designs, develops and sells products and services that together provide its customers with high performance network infrastructure that creates responsive and trusted environments for accelerating the deployment of services and applications over a single Internet Protocol (IP) based network. Beginning in the first quarter of 2008, the Company realigned its business groups which resulted in the following two segments: Infrastructure and Service Layer Technologies (SLT). The Company s Infrastructure segment primarily offers scalable router and Ethernet switching products that are used to control and direct network traffic. The Company s SLT segment offers networking solutions that meet a broad array of its customers priorities, from securing the network and the data on the network, to maximizing existing bandwidth and acceleration of applications across a distributed network. Both segments offer world-wide services, including technical support and professional services, as well as educational and training programs to their customers. Together, these elements provide secure networking solutions to enable customers to convert legacy networks that provide commoditized, best efforts services into more valuable assets that provide differentiation, value and increased reliability, performance and security to end users.

Basis of Presentation

The unaudited Condensed Consolidated Financial Statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information as well as the instructions to Form 10-Q and the rules and regulations of the U.S. Securities and Exchange Commission (SEC). Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments, including normal recurring accruals, considered necessary for a fair presentation have been included. The results of operations for the three and nine months ended September 30, 2008, are not necessarily indicative of the results that may be expected for the year ending December 31, 2008, or any future period. The information included in this Quarterly Report on Form 10-Q should be read in conjunction with Management s Discussion and Analysis of Financial Condition and Results of Operations,

Risk Factors, Quantitative and Qualitative Disclosures About Market Risk and the Consolidated Financial Statements and footnotes thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2007.

Revenue Recognition

Juniper Networks sells products and services through its direct sales force and through its strategic distribution relationships and value-added resellers. The Company s products are integrated with software that is essential to the functionality of the equipment. The Company also provides unspecified upgrades and enhancements related to the integrated software through maintenance contracts for most of its products. Accordingly, the Company accounts for revenue in accordance with Statement of Position No. 97-2, *Software Revenue Recognition*, and all related interpretations. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery or performance has occurred, the sales price is fixed or determinable, and collectability is reasonably assured. Evidence of an arrangement generally consists of customer purchase orders and, in certain instances, sales contracts or agreements. Shipping terms and related documents, or written evidence of customer acceptance, when applicable, are used to verify delivery or performance. In instances where the Company has outstanding obligations related to product delivery or the final acceptance of the product, revenue is deferred until all the delivery and acceptance criteria have been met. The Company assesses whether the sales price is fixed or determinable based on payment terms and whether the sales price is subject to refund or adjustment. Collectability is assessed based on the creditworthiness of the customer as determined by credit checks and the customer s payment history to the

Table of Contents

Company. Accounts receivable are recorded net of allowance for doubtful accounts, estimated customer returns and pricing credits.

For arrangements with multiple elements, such as sales of products that include services, the Company allocates revenue to each element using the residual method based on vendor specific objective evidence of fair value of the undelivered items. Under the residual method, the amount of revenue allocated to delivered elements equals the total arrangement consideration less the aggregate fair value of any undelivered elements. Vendor specific objective evidence of fair value is based on the price charged when the element is sold separately. If vendor specific objective evidence of fair value of one or more undelivered items does not exist, revenue is deferred and recognized at the earlier of (i) delivery of those elements or (ii) when fair value can be established unless maintenance is the only undelivered element, in which case, the entire arrangement fee is recognized ratably over the contractual support period. The Company accounts for multiple agreements with a single customer as one arrangement if the contractual terms and/or substance of those agreements indicate that they may be so closely related that they are, in effect, parts of a single arrangement.

For sales to direct end-users and value-added resellers, the Company recognizes product revenue upon transfer of title and risk of loss, which is generally upon shipment. It is the Company's practice to identify an end-user prior to shipment to a value-added reseller. For end-users and value-added resellers, the Company has no significant obligations for future performance such as rights of return or pricing credits. A portion of the Company's sales are made through distributors under agreements allowing for pricing credits and/or rights of return. Product revenue on sales made through these distributors is recognized upon sell-through as reported by the distributors to the Company. Deferred revenue on shipments to distributors reflects the effects of distributor pricing credits and the amount of gross margin expected to be realized upon sell-through.

The Company sells certain interests in accounts receivable on a non-recourse basis as part of a distributor accounts receivable financing arrangement which was established by the Company with a major financing company. Accounts receivable sold under this arrangement in advance of revenue recognition are accounted for as short-term debt and had a balance of \$12.1 million and \$10.0 million as of September 30, 2008, and December 31, 2007, respectively. Deferred revenue on shipments to distributors reflects these effects of distributor pricing credits and the amount of gross margin expected to be realized upon sell-through. Deferred revenue is recorded net of the related product costs of revenue.

The Company records reductions to revenue for estimated product returns and pricing adjustments, such as rebates and price protection, in the same period that the related revenue is recorded. The amount of these reductions is based on historical sales returns and price protection credits, specific criteria included in rebate agreements, and other factors known at the time. In addition, the Company reports revenue net of sales taxes.

Shipping charges billed to customers are included in product revenue and the related shipping costs are included in cost of product revenues. Costs associated with cooperative advertising programs are estimated and recorded as a reduction of revenue at the time the related sales are recognized.

Services include maintenance, training and professional services. In addition to providing unspecified upgrades and enhancements on a when and if available basis, the Company's maintenance contracts include 24-hour technical support and hardware repair and replacement parts. Maintenance is offered under renewable contracts. Revenue from maintenance contracts is deferred and is generally recognized ratably over the contractual support period, which is generally one to three years. Revenue from training and professional services is recognized as the services are completed or ratably over the contractual period, which is generally one year or less.

Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, (SFAS 123R) which requires the measurement and recognition of compensation expense for all stock-based awards made to employees and directors including employee stock options, restricted stock units (RSUs), performance share awards and employee stock purchases under the Company's Employee Stock Purchase Plan based on estimated fair values. SFAS 123R requires

Table of Contents

companies to estimate the fair value of stock-based awards on the date of grant using an option pricing model. The Company uses the Black-Scholes-Merton option pricing model and incorporates a Monte Carlo simulation when appropriate to determine the fair value of stock based awards under SFAS 123R. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods in the Company's condensed consolidated statements of operations.

Stock-based compensation expense recognized in the Company's condensed consolidated statements of operations for the three and nine months ended September 30, 2008 and 2007, included compensation expense for stock-based awards granted prior to, but not yet vested as of the adoption of SFAS 123R, based on the grant date fair value estimated in accordance with the provisions of Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation*, (SFAS 123) and compensation expense for the stock-based awards granted subsequent to December 31, 2005, based on the grant date fair value estimated in accordance with the provisions of SFAS 123R. Compensation expense for expected-to-vest stock-based awards that were granted on or prior to December 31, 2005, was valued under the multiple-option approach and will continue to be amortized using the accelerated attribution method. Subsequent to December 31, 2005, compensation expense for expected-to-vest stock-based awards is valued under the single-option approach and amortized on a straight-line basis, net of estimated forfeitures.

Goodwill and Purchased Intangible Assets

Goodwill is not subject to amortization but is assessed annually, at a minimum, for impairment by applying a fair value based test. Future goodwill impairment tests could result in a charge to earnings. Purchased intangible assets with finite lives are amortized on a straight-line basis over their respective estimated useful lives.

Impairment

The Company evaluates goodwill, at a minimum, on an annual basis and whenever events and changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Juniper Networks conducted its annual impairment test as of November 1, 2007, and determined that the carrying value of its goodwill was not impaired. There were no events or circumstances from that date through September 30, 2008, that would impact this assessment. Future impairment indicators, including sustained declines in the Company's market capitalization or a decrease in revenue or profitability levels, could require impairment charges to be recorded.

The Company evaluates long-lived assets held-for-use for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. There were no impairments for the three months ended September 30, 2008 and 2007. For the nine months ended September 30, 2008, the Company recognized an impairment charge of \$5.0 million, included in amortization of purchased intangible assets, in connection with the phase out of its DX product, and nil for the nine months ended September 30, 2007.

Warranties

Juniper Networks generally offers a one-year warranty on all of its hardware products and a 90-day warranty on the media that contains the software embedded in the products. The warranty generally includes parts and labor obtained through the Company's 24-hour service center. On occasion, the specific terms and conditions of those warranties vary. The Company accrues for warranty costs based on estimates of the costs that may be incurred under its warranty obligations, including material costs, technical support labor costs and associated overhead. The warranty accrual is included in the Company's cost of revenues and is recorded at the time revenue is recognized. Factors that affect the Company's warranty liability include the number of installed units, its estimates of anticipated rates of warranty claims, costs per claim and estimated support labor costs and the associated overhead. The Company periodically assesses the adequacy of its recorded warranty liabilities and adjusts the amounts as necessary.

Table of Contents***Concentrations***

Financial instruments, including those held in foreign branches of global banks, that subject Juniper Networks to concentrations of credit risk consist primarily of cash and cash equivalents, investments and accounts receivable. Juniper Networks maintains its cash, cash equivalents and available-for-sale investments in fixed income securities and money market funds with high-quality institutions and only invests in high quality credit instruments. Deposits held with banks, including those held in foreign branches of global banks, may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed upon demand and therefore bear minimal risk. Generally, credit risk with respect to accounts receivable is diversified due to the number of entities comprising the Company's customer base and their dispersion across different geographic locations throughout the world. Juniper Networks performs ongoing credit evaluations of its customers and generally does not require collateral on accounts receivable. Juniper Networks maintains reserves for potential credit losses and historically such losses have been within management's expectations.

The Company relies on sole suppliers for certain of its components such as application-specific integrated circuits (ASICs) and custom sheet metal. Additionally, Juniper Networks relies primarily on a limited number of significant independent contract manufacturers for the production of all of its products. The inability of any supplier or manufacturer to fulfill supply requirements of Juniper Networks could negatively impact future operating results.

Fair Value Accounting

In February 2007, the Financial Accounting Standards Board (the FASB) issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities-including an amendment of FASB Statement No. 115* (SFAS 159). SFAS 159 expands the use of fair value accounting to eligible financial assets and liabilities. SFAS 159 is effective beginning on January 1, 2008. The Company evaluated its existing financial instruments and elected not to adopt the fair value option on its financial instruments. However, because the SFAS 159 election is based on an instrument-by-instrument election at the time the Company first recognizes an eligible item or enters into an eligible firm commitment, the Company may decide to exercise the option on new items when business reasons support doing so in the future. As a result, SFAS 159 did not have any impact on the Company's consolidated financial condition or results of operations as of and for the three and nine months ended September 30, 2008.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*, (SFAS 157), which is effective for fiscal years beginning after November 15, 2007 and for interim periods within those years. This statement defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. This statement applies to accounting pronouncements that require or permit fair value measurements with certain exclusions. The statement provides that a fair value measurement assumes that the transaction to sell an asset or transfer a liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. SFAS 157 defines fair value based upon an exit price model. The Company adopted the effective portions of SFAS 157 on January 1, 2008.

The FASB issued FASB Staff Positions (FSP) 157-1, 157-2, and 157-3. FSP 157-1 amends SFAS 157 to exclude SFAS No. 13, *Accounting for Leases*, (SFAS 13) and its related interpretive accounting pronouncements that address leasing transactions. FSP 157-2 delays the effective date of the application of SFAS 157 to fiscal years beginning after November 15, 2008, for all nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. Non-recurring nonfinancial assets and nonfinancial liabilities for which the Company has not applied the provisions of SFAS 157 include those measured at fair value in goodwill impairment tests, intangible assets measured at fair value for impairment, asset retirement obligations initially measured at fair value, and those initially measured at fair value in a business combination. FSP 157-3 clarifies the application of SFAS 157 in an inactive market. FSP 157-3 was effective upon issuance, including prior periods for which financial statements had not been issued. Because the Company does not hold financial assets for which the market is inactive, the implementation of this standard did not impact our consolidated results of operations or financial condition.

For disclosure purposes, the Company is required to measure the fair value of outstanding debt on a recurring basis. Long-term debt is reported at amortized cost in accordance with SFAS No. 107, *Disclosures about Fair Value of Financial Instruments*. The fair value of long-term debt, based on quoted market prices (Level 1), was \$659.2 million at December 31, 2007. The Company's Senior Convertible Notes were converted into shares of the Company's common stock during the nine months ended September 30, 2008. See Note 4 – Other Financial Information under Senior Convertible Notes.

Assets Measured at Fair Value on a Recurring Basis	Total	Quoted Prices in Active Markets For Identical Assets (Level 1)	Significant Other Observable Remaining Inputs (Level 2)	Significant Other Unobservable Remaining Inputs (Level 3)

Long-term investments	110.7

Total cash, cash equivalents, and available-for-sale investments	\$	2,131.7
--	----	---------

The Company classifies investments within Level 1 if quoted prices are available in active markets. Level 1 assets include instruments valued based on quoted market prices in active markets which generally include money market funds, corporate equity securities publicly traded on major exchanges and U.S. Treasury notes with quoted prices on active markets.

The Company classifies items in Level 2 if the investments are valued using observable inputs to quoted market prices, benchmark yields, reported trades, broker/dealer quotes or alternative pricing sources with reasonable levels of price transparency. These investments include: U.S. T-Bills, government agencies, corporate bonds and commercial paper. Investments are held by a custodian who obtains investment prices from a third party pricing provider that uses standard inputs to models which vary by asset class. The Company classifies all derivatives in Level 2 using observable market inputs and standard valuation techniques.

Table of Contents

The Company did not hold financial assets and liabilities which were recorded at fair value in the Level 3 category as of September 30, 2008.

Seasonality

Many companies in the networking industry experience adverse seasonal fluctuations in customer spending patterns, particularly in the first and third quarters. In addition, the Company's SLT segment has experienced seasonally strong customer demand in the fourth quarter. This historical pattern should not be considered a reliable indicator of the Company's future net revenues or financial performance.

Recent Accounting Pronouncements

In October 2008, the FASB issued FSP 157-3, *Determining Fair Value of a Financial Asset in a Market That Is Not Active* (FSP 157-3). FSP 157-3 clarifies the application of Statement of Financial Accounting Standards No. 157, *Fair Value Measurements*, in an inactive market. It demonstrates how the fair value of a financial asset is determined when the market for that financial asset is inactive. FSP 157-3 was effective upon issuance, including prior periods for which financial statements had not been issued. The Company's implementation of this standard did not impact its consolidated results of operations or financial condition.

In September 2008, the FASB issued FSP FAS 133-1 and FIN 45-4, *Disclosures about Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45; and Clarification of the Effective Date of FASB Statement No. 161* (FSP FAS 133-1 and FIN 45-4). FSP FAS 133-1 and FIN 45-4 amends Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS 133), to require disclosures by sellers of credit derivatives, including credit derivatives embedded in hybrid instruments. FSP FAS 133-1 and FIN 45-4 also amend FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness to Others* (FIN 45), to require additional disclosure about the current status of the payment/performance risk of a guarantee. The provisions of the FSP that amend SFAS 133 and FIN 45 are effective for reporting periods ending after November 15, 2008. FSP FAS 133-1 and FIN 45-4 also clarifies the effective date in Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (SFAS 161). Disclosures required by SFAS 161 are effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The Company's adoption of FSP FAS 133-1 and FIN 45-4 on January 1, 2009, will not impact its consolidated results of operations or financial condition.

In May 2008, the FASB issued FSP Accounting Principles Board (APB) 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)* (FSP APB 14-1). FSP APB 14-1 requires the issuer of certain convertible debt instruments that may be settled in cash (or other assets) on conversion to separately account for the liability (debt) and equity (conversion option) components of the instrument in a manner that reflects the issuer's non-convertible debt borrowing rate. FSP APB 14-1 must be applied retrospectively to previously issued convertible instruments that may be settled in cash or partial cash as well as prospectively to newly issued instruments. FSP APB 14-1 is effective for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. The Company has evaluated the requirements of FSP APB 14-1 and determined that the Company's convertible debt was not subject to the requirements of FSP APB 14-1. The Company's adoption of FSP APB 14-1 on January 1, 2009, will not impact its consolidated results of operations or financial condition.

In April 2008, the FASB issued FSP FAS 142-3, *Determination of the Useful Life of Intangible Assets* (FSP FAS 142-3). FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used in determining the useful life of a recognized intangible asset under Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets*. This new guidance applies prospectively to intangible assets that are acquired individually or with a group of other assets in business combinations and asset acquisitions. FSP FAS 142-3 is effective for fiscal years beginning after December 15, 2008, and early adoption is prohibited. The impact of FSP FAS 142-3 will depend upon the nature, terms, and size of the acquisitions the Company consummates after the effective date.

Table of Contents

In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 enhances required disclosures regarding derivatives and hedging activities, including enhanced disclosures regarding how: (a) an entity uses derivative instruments, (b) derivative instruments and related hedged items are accounted for under FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and (c) derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS 161 is effective for the fiscal years beginning after November 15, 2008, and will be adopted by the Company on January 1, 2009. The Company's adoption of SFAS 161 on January 1, 2009, will not impact its consolidated results of operations or financial condition.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 160, *Noncontrolling Interests in Consolidated Financial Statements* an amendment of ARB No. 51 (SFAS 160). SFAS 160 addresses the accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest, and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. SFAS 160 also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. SFAS 160 is effective for fiscal years beginning after December 15, 2008, and will be adopted by the Company on January 1, 2009. The Company does not expect the adoption of SFAS 160 to have a material effect on its consolidated results of operations or financial condition.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141 (revised 2007), *Business Combinations* (SFAS 141R). SFAS 141R establishes principles and requirements for the acquirer of a business to recognize and measure in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree. The statement also provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statement to evaluate the nature and financial effects of the business combination. SFAS 141R is effective for financial statements issued for fiscal years beginning after December 15, 2008. Earlier application of SFAS 141R is prohibited. Accordingly, any business combinations the Company may engage in will be recorded and disclosed following existing GAAP until January 1, 2009. The impact of SFAS 141R will depend upon the nature, terms, and size of the acquisitions the Company consummates after the effective date.

Reclassifications

Certain reclassifications have been made to prior period balances in order to conform to the current period's presentation.

Table of Contents**Note 2. Investments**

The following is a summary of the Company's available-for-sale investments, at fair value (in millions):

	September 30, 2008	As of December 31, 2007
Fixed income securities:		
Government securities	\$ 174.1	\$ 88.0
Corporate debt securities	147.4	203.1
Commercial paper	26.2

Publically traded equity securities	5.5	8.6
Total	\$ 353.2	\$ 299.7
Reported as:		
Short-term investments	\$ 242.5	\$ 240.4
Long-term investments	110.7	59.3
Total	\$ 353.2	\$ 299.7
		Estimated Fair Value As of September 30, 2008
Due within one year	\$	237.0
Due between one and five years		110.7
Total available-for-sale investments	\$	347.7

Note 3. Goodwill and Purchased Intangible Assets***Goodwill***

In the first quarter of 2008, the Company realigned its organizational structure to eliminate its Service segment and to include its service business into the related Infrastructure and SLT segments. As a result, the Company, with the assistance of an external service provider, reallocated goodwill of the former Service segment to the Infrastructure and SLT segments based on a relative fair value approach. Fair value was based on comparative market values and discounted cash flows. There was no indication of impairment when goodwill was reallocated to the new reporting segments.

The following table presents changes in goodwill by segment during the nine months ended September 30, 2008 (in millions):

Segments	Balance at December 31, 2007	Reallocation	Balance at September 30, 2008
-----------------	---	---------------------	--

Edgar Filing: JUNIPER NETWORKS INC - Form 10-Q

Infrastructure	\$	976.6	\$	523.9	\$	1,500.5
Service Layer Technologies		1,879.7		278.4		2,158.1
Service		802.3		(802.3)		
Total	\$	3,658.6	\$		\$	3,658.6

Table of Contents***Purchased Intangible Assets***

The following table presents details of the Company's purchased intangible assets with definite lives (in millions):

	Gross	Accumulated Amortization	Impairment	Net
As of September 30, 2008:				
Technologies and patents	\$ 379.6	\$ (356.6)	\$ (4.3)	\$ 18.7
Other	68.9	(51.5)	(0.7)	16.7
Total	\$ 448.5	\$ (408.1)	\$ (5.0)	\$ 35.4
As of December 31, 2007:				
Technologies and patents	\$ 379.6	\$ (326.0)	\$	\$ 53.6
Other	68.9	(44.7)		24.2
Total	\$ 448.5	\$ (370.7)	\$	\$ 77.8

There were no additions to purchased intangible assets during the three and nine months ended September 30, 2008, and 2007.

Amortization of purchased intangible assets of \$6.5 million and \$21.6 million were included in operating expenses and cost of product revenues for the three months ended September 30, 2008, and 2007, respectively, and \$42.4 million and \$69.8 million were included in operating expenses and cost of product revenues for the nine months ended September 30, 2008, and 2007, respectively. There was no impairment charge in the three months ended September 30, 2008. In the nine months ended September 30, 2008, the Company recorded an impairment charge of \$5.0 million, included in its amortization of purchased intangible assets, due to the phase out of its DX products. The estimated future amortization expense of purchased intangible assets with definite lives for future periods is as follows (in millions):

Years Ending December 31,	Amount
2008 (remaining three months)	\$ 6.6
2009	15.4
2010	3.9
2011	2.0
2012	1.2
Thereafter	6.3
Total	\$ 35.4

Note 4. Other Financial Information***Restricted Cash***

As of September 30, 2008, and December 31, 2007, restricted cash of \$43.5 million and \$35.5 million, respectively, consisted of escrow accounts required by certain acquisitions completed in 2005, the India Gratuity Trust and the Directors & Officers (D&O) indemnification trust. During the three and nine months ended September 30, 2008, the Company increased its restricted cash by \$0.5 million and \$1.3 million to fund the India Gratuity Trust, which covers statutory severance obligations in the event of termination of its India employees who have provided five or more years of continuous service. Juniper Networks established the D&O trust to secure its indemnification obligations to certain directors, officers, and other specified employees, arising from their activities as such, in the event that the Company does not provide or is financially incapable of providing indemnification. During the three and nine months

ended September 30, 2008, the Company also increased its restricted cash balance by \$4.9 million and \$6.7 million, respectively, to provide additional coverage under its D&O trust as the Company grows. During the three and nine months ended September 30, 2008, the Company made no releases from restricted cash for escrow payments associated with past acquisitions.

Table of Contents***Minority Equity Investments***

As of September 30, 2008, and December 31, 2007, the carrying values of the Company's minority equity investments in privately held companies of \$26.3 million and \$23.3 million, respectively, were included in other long-term assets in the condensed consolidated balance sheets. During the three and nine months ended September 30, 2008, the Company invested a total of \$2.5 million and \$4.5 million, respectively, in privately-held companies. During the nine months ended September 30, 2008, the Company recognized a loss of \$1.5 million related to investments in privately-held companies.

The Company's minority equity investments in privately held companies are carried at cost as the Company does not have a controlling interest and does not have the ability to exercise significant influence over these companies. The Company adjusts its minority equity investments for any impairment if the fair value exceeds the carrying value of the respective assets.

Other Long-Term Assets

Details of the Company's other long-term assets are as follows (in millions):

	September 30, 2008	As of December 31, 2007
Deferred tax assets	\$ 67.8	\$ 59.0
Long-term assets	46.1	38.2
Total	\$ 113.9	\$ 97.2

Warranties

Changes in the Company's warranty reserve were as follows (in millions):

	Three Months Ended September 30, 2008	2007	Nine Months Ended September 30, 2008	2007
Beginning balance	\$ 41.8	\$ 35.7	\$ 37.5	\$ 34.8
Provisions made during the period, net	3.8	10.6	16.0	31.9
Actual costs incurred during the period	(2.5)	(10.1)	(10.4)	(30.5)
Ending balance (current)	\$ 43.1	\$ 36.2	\$ 43.1	\$ 36.2

Deferred Revenue

Amounts billed in excess of revenue recognized are included as deferred revenue and accounts receivable in the accompanying condensed consolidated balance sheets. Product deferred revenue, net of the related cost of revenue, includes shipments to end-users, value-added resellers, and distributors. The portion of deferred revenue that the Company anticipates will be recognized during the succeeding 12-month period is recorded as current deferred revenue, and the remaining portion is recorded as long-term deferred revenue. The Company may reclassify amounts between current and long-term deferred revenue based upon its assessment of when all revenue recognition criteria are expected to be met. Details of the Company's deferred revenue are as follows (in millions):

	September 30, 2008	As of December 31, 2007
Service	\$ 404.1	\$ 367.3

Edgar Filing: JUNIPER NETWORKS INC - Form 10-Q

Product	158.4		146.0
Total	\$ 562.5	\$	513.3
Reported as:

Long-term	129.2		87.7
Total	\$ 562.5	\$	513.3

Table of Contents

Restructuring and Acquisition Related Reserves

Restructuring

Restructuring charges were based on the Company's restructuring plans that were committed to by management. Any changes in the estimates of executing the approved plans will be reflected in the Company's results of operations. In the three and nine months ended September 30, 2008, the Company paid \$0.1 million and \$0.5 million, respectively, for facility charges associated with its restructuring plans initiated in prior years. As of September 30, 2008, and December 31, 2007, the restructuring reserve of \$0.1 million and \$0.6 million, respectively, was related to future facility charges. Amounts related to the net facility charges are included in other accrued liabilities and will be paid over the remaining respective lease term through April 2009. The difference between the actual future rent payments and the net present value will be recorded as operating expenses when incurred. During the three and nine months ended September 30, 2008 and 2007, the Company had no additional restructuring charges.

Acquisition Related Restructuring Reserves

Acquisition related restructuring reserves pertain to the restructuring reserves established in connection with the Company's past acquisitions. In conjunction with various acquisitions, the Company accrued for acquisition related restructuring charges primarily related to severance and facility charges.

The Company paid \$0.2 million and \$0.8 million for the three and nine months ended September 30, 2008, respectively, and \$0.4 million and \$1.4 million for the three and nine months ended September 30, 2007, respectively, primarily for facility related charges. The Company recorded nil adjustments to its existing acquisition related restructuring reserves for the three and nine months ended September 30, 2008, and recorded nil and \$0.3 million adjustments to its acquisition related restructuring reserves for facility related charges in the three and nine months ended September 30, 2007, respectively. As of September 30, 2008, approximately \$0.7 million remained unpaid, of which \$0.3 million was recorded in other long-term liabilities in the condensed consolidated balance sheet. As of December 31, 2007, approximately \$1.6 million remained unpaid, of which \$0.6 million was recorded in other long-term liabilities in the condensed consolidated balance sheet. All remaining restructuring reserves were associated with future facility charges and will be paid over the remaining respective lease terms through March 2011. The difference between the actual future rent payments and the restructuring reserves will be recorded as operating expenses when incurred. During the three and nine months ended September 30, 2008 and 2007, the Company had no new acquisition related restructuring charges.

Derivatives

The Company uses derivatives to partially offset its market exposure to fluctuations in certain foreign currencies. The Company does not enter into derivatives for speculative or trading purposes.

The Company uses foreign currency forward contracts to mitigate gains and losses generated from the re-measurement of certain foreign currency denominated monetary assets and liabilities. These derivatives are carried at fair value with changes recorded in interest and other income, net. Changes in the fair value of these derivatives are largely offset by re-measurement of the underlying assets and liabilities. Cash flows from such derivatives are classified as operating activities. These foreign exchange forward contracts have maturities between one and two months.

The Company also uses foreign currency forward and/or option contracts to hedge certain forecasted foreign currency transactions relating to operating expenses. These derivatives are designated as cash flow hedges and have maturities of less than one year. The effective portion of the derivative's gain or loss is initially reported as a component of accumulated other comprehensive income, and upon occurrence of the forecasted transaction, is subsequently reclassified into the operating expense line item to which the hedged transaction relates. The Company records ineffectiveness of the hedging instruments, which was immaterial during the three and nine months ended

Table of Contents

September 30, 2008 and 2007, in other income (expense) on its condensed consolidated statements of operations. Cash flows from such hedges are classified as operating activities.

Debt***Senior Convertible Notes***

In 2003, the Company received \$392.8 million of net proceeds from an offering of \$400.0 million aggregate principal amount of Zero Coupon Convertible Senior Notes due June 15, 2008 (the Senior Notes). The Senior Notes were senior unsecured obligations, ranked on parity in right of payment with all of the Company's existing and future senior unsecured debt, and ranked senior to all of the Company's existing and future debt that expressly provided that it was subordinated to the notes. The Senior Notes bore no interest, but were convertible into shares of the Company's common stock, subject to certain conditions, at any time prior to maturity or their prior repurchase by the Company. The conversion rate was 49.6512 shares per each \$1,000 principal amount of convertible notes, subject to adjustment in certain circumstances. This was equivalent to a conversion price of approximately \$20.14 per share. The holders of Senior Notes with a face value of approximately \$0.5 million had converted these notes prior to maturity into shares of the Company's common stock as of December 31, 2007. As of June 16, 2008, holders of approximately \$399.2 million in aggregate principal amount of Senior Notes had converted these notes into approximately 19.8 million shares of the Company's common stock. The Company settled the remaining Senior Notes, with a face value of \$0.3 million principal amount at maturity, for cash. As of September 30, 2008, all of the Company's Senior Notes were retired.

The carrying amounts and fair values of the Senior Notes were (in millions):

	September 30, 2008	As of December 31, 2007
Carrying amount	\$	\$ 399.5
Fair value	\$	\$ 659.2

Distributor Financing Arrangement

The Company recognizes the sales of accounts receivable to a financing provider according to FASB Statement of Financial Accounting Standards No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*, a replacement of FASB Statement No. 125. The Company introduced its distributor financing program in 2006 to strengthen its channel business by promoting greater distributor volume and improved customer service. The program does not, and is not intended to, affect the timing of revenue recognition because the Company only recognizes revenue upon sell-through. Under the financing arrangements, the proceeds from the financing provider are due to the Company 30 days from the sale of the receivable. The Company pays the financing provider a financing fee based on the spread over LIBOR or SIBOR. In these transactions with a major financing provider, the Company has surrendered control over the transferred assets. The accounts receivable have been isolated from the Company and put beyond the reach of creditors, even in the event of bankruptcy. The purchaser of the accounts receivable balances has the right to pledge or exchange the assets transferred. The Company does not maintain effective control over the transferred assets through obligations or rights to redeem, transfer or repurchase the receivables after they have been transferred.

Pursuant to the receivable financing arrangements for the sale of receivables, the Company sold net receivables of \$139.8 million and \$22.8 million during the three months ended September 30, 2008, and 2007, respectively, and \$306.9 million and \$61.4 million during the nine months ended September 30, 2008, and 2007, respectively. During the three months ended September 30, 2008 and 2007, the Company received cash proceeds of \$125.6 million and \$18.3 million, respectively, and \$257.7 million and \$53.9 million during the nine months ended September 30, 2008 and 2007, respectively. The amounts owed by the financing provider recorded as accounts receivable on the Company's condensed consolidated balance sheets as of September 30, 2008, and December 31, 2007, were \$82.5 million and \$40.4 million, respectively.

The portion of the receivable financed that has not been recognized as revenue is accounted for as a financing pursuant to FASB Emerging Issues Task Force Issue 88-18, *Sales of Future Revenues*. As of September 30, 2008,

Table of Contents

and December 31, 2007, the estimated amounts of cash received from the financing provider that has not been recognized as revenue from its distributors was \$12.1 million and \$10.0 million, respectively.

Comprehensive Income

Comprehensive income consists of the following (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,

Tax related charges				8.0
Loss (gain) on litigation settlement		(5.3)	9.0	(5.3)
Total	\$	\$ (5.1)	\$ 9.0	\$ 9.2

In the nine months ended September 30, 2008, the Company accrued \$9.0 million for the potential settlement of its derivative lawsuits. See Note 9 Commitments and Contingencies under *Legal Proceedings*.

In conjunction with various acquisitions, the Company accrued for acquisition related restructuring charges primarily related to severance and facility charges. The Company had no adjustments to its existing acquisition

Table of Contents

related restructuring reserves for the three and nine months ended September 30, 2008, and recorded adjustments of \$0.1 million and \$0.4 million to its acquisition related restructuring reserves for facility related charges in the three and nine months ended September 30, 2007, respectively.

In connection with a past acquisition, the Company recorded bonus obligations of \$0.3 million and \$0.9 million for the three and nine months ended September 30, 2007, respectively.

In the three and nine months ended September 30, 2007, the Company incurred nil and \$6.0 million, respectively, in professional fees for the costs of external service providers used in the completion of its internal stock option investigation.

On March 12, 2007, the Company commenced a tender offer to amend certain options granted under the Juniper Networks, Inc. Amended & Restated 1996 Stock Plan and the Juniper Networks, Inc. 2000 Nonstatutory Stock Option Plan that had original exercise prices per share that were less than the fair market value per share of the common stock underlying the option on the option's grant date, as determined by the Company for financial accounting purposes. Under this tender offer, employees subject to taxation in the United States and Canada had the opportunity to increase their strike price on affected options to the appropriate fair market value per share on the date of grant so as to avoid unfavorable tax consequences under United States Internal Revenue Code Section 409A or applicable Canadian tax laws and regulations. In exchange for increasing the strike price of these options, the Company committed to make a cash payment to employees participating in the offer so as to make employees whole for the incremental strike price as compared to their original option exercise price. In connection with the offer, the Company amended options to purchase 4.3 million shares of the Company's common stock and committed to make aggregate cash payments of \$7.6 million to offer participants. The Company accrued nil and \$7.6 million in the three and nine months ended September 30, 2007, respectively.

In addition, the Company entered into a separate agreement with two executives in the three months ended June 30, 2007, to amend their unexercised stock options covering 0.1 million shares of the Company's common stock in order to cure the 409A issue associated with such options. As a result, the Company committed to make aggregate cash payments of approximately \$0.4 million and recorded nil and \$0.4 million for the payment liability in operating expense for the three and nine months ended September 30, 2007, respectively.

Interest and Other Income, Net

Interest and other income, net, consist of the following (in millions):

Employee stock awards	13.3	25.8	15.2	19.8
Denominator for diluted net income per share	554.3	561.4	561.9	582.8
Net income per share:				
Basic	\$ 0.27	\$ 0.17	\$ 0.71	\$ 0.44
Diluted	\$ 0.27	\$ 0.15	\$ 0.67	\$ 0.41

Employee stock awards for approximately 25.5 million shares and 21.4 million shares of the Company's common stock in the three and nine months ended September 30, 2008, respectively, were outstanding, but were not included in the computation of diluted earnings per share because their effect would have been anti-dilutive. For the three and nine months ended September 30, 2007, approximately 3.4 million and 17.6 million shares of the Company's common stock equivalents, respectively, were not included in the computation of diluted earnings per share because their effect would have been anti-dilutive.

Note 6. Stockholders' Equity***Stock Repurchase Activities***

During the three and nine months ended September 30, 2008, the Company repurchased \$440.9 million and \$562.2 million, or 18.0 million and 22.7 million shares of its common stock, respectively, under two stock repurchase programs that were authorized by its Board of Directors.

Under the \$2.0 billion stock repurchase program approved in 2006 and 2007 (the "2006 Stock Repurchase Program"), the Company repurchased approximately 13.2 million shares of its common stock at an average price of \$24.52 per share for a total purchase price of \$323.7 million during the three months ended September 30, 2008, and approximately 15.4 million shares of its common stock at an average price of \$24.53 per share for a total purchase price of \$376.8 million during the nine months ended September 30, 2008. As of September 30, 2008, the Company has repurchased and retired approximately 84.8 million shares of its common stock under the 2006 Stock Repurchase Program at an average price of \$23.58 per share, and the program has no remaining authorized funds available for future stock repurchases.

The Board of Directors approved another \$1.0 billion stock repurchase program in March 2008 (the "2008 Stock Repurchase Program"). Under this program, the Company repurchased approximately 4.8 million shares of its common stock at an average price of \$24.66 per share for a total purchase price of \$117.2 million during the three months ended September 30, 2008, and approximately 7.3 million shares of its common stock at an average price of \$25.42 per share for a total purchase price of \$185.4 million during the nine months ended September 30, 2008. As of September 30, 2008, the 2008 Stock Repurchase Program had remaining authorized funds of \$814.6 million.

All shares of common stock purchased under the 2006 and 2008 Stock Repurchase Programs have been retired. Future share repurchases under the Company's 2008 Stock Repurchase Program will be subject to a review of the circumstances in place at the time and will be made from time to time in private transactions or open market

Table of Contents

purchases as permitted by securities laws and other legal requirements. This program may be discontinued at any time.

Stock Option Plans

2006 Equity Incentive Plan

On May 18, 2006, the Company's stockholders adopted the Company's 2006 Equity Incentive Plan (the "2006 Plan") to enable the granting of incentive stock options, nonstatutory stock options, RSUs, restricted stock, stock appreciation rights, performance shares, performance units, deferred stock units and dividend equivalents to the employees and consultants of the Company. The 2006 Plan also provides for the automatic, non-discretionary award of nonstatutory stock options to the Company's non-employee members of the Board.

The maximum aggregate number of shares authorized under the 2006 Plan is 64,500,000 shares of common stock, plus the addition of any shares subject to outstanding options under the Company's Amended and Restated 1996 Stock Plan (the "1996 Plan") and the Company's 2000 Nonstatutory Stock Option Plan (the "2000 Plan") that subsequently expired unexercised after May 18, 2006, up to a maximum of 75,000,000 additional shares of common stock.

Options granted under the 2006 Plan have a maximum term of five to seven years from the grant date, and generally vest and become exercisable over a four-year period. Subject to the terms of change of control severance agreements, restricted stock, performance shares, RSUs or deferred stock units that vest solely based on continuing employment or provision of services will vest in full no earlier than the three-year anniversary of the grant date, or in the event vesting is based on factors other than continued future provision of services, such awards will vest in full no earlier than the one-year anniversary of the grant date.

The 2006 Plan provides each non-employee director an automatic grant of an option to purchase 50,000 shares of common stock upon the date on which such individual first becomes a director, whether through election by the stockholders of the Company or appointment by the Board to fill a vacancy (the "First Option"). In addition, at each of the Company's annual stockholders meetings (i) each non-employee director who was a non-employee director on the date of the prior year's annual stockholder meeting shall be automatically granted an option to purchase 20,000 shares of common stock, and (ii) each non-employee director who was not a non-employee director on the date of the prior year's annual stockholders meeting shall receive an option to purchase a pro-rata portion of the 20,000 shares of the common stock determined by the time elapsed since the individual's First Option grant (the "Annual Option"). The First Option vests monthly over approximately three years from the grant date subject to the non-employee director's continuous service on the Board. The Annual Option shall vest monthly over approximately one year from the grant date subject to the non-employee director's continuous service on the Board. Under the 2006 Plan, options granted to non-employee directors have a maximum term of seven years.

2000 Nonstatutory Stock Option Plan

In July 2000, the Board adopted the Juniper Networks 2000 Plan. The 2000 Plan provided for the granting of nonstatutory stock options to employees, directors and consultants. Options granted under the 2000 Plan generally become exercisable over a four-year period beginning on the date of grant and have a maximum term of ten years. The Company had authorized 90,901,437 shares of common stock for issuance under the 2000 Plan. Effective May 18, 2006, additional equity awards under the 2000 Plan have been discontinued and new equity awards are being granted under the 2006 Plan. Remaining authorized shares under the 2000 Plan that were not subject to outstanding awards as of May 18, 2006, were canceled on May 18, 2006. The 2000 Plan will remain in effect as to outstanding equity awards granted under the plan prior to May 18, 2006.

Amended and Restated 1996 Stock Plan

The 1996 Plan provided for the granting of incentive stock options to employees and nonstatutory stock options to employees, directors and consultants. On November 3, 2005, the Board adopted an amendment to the 1996 Plan to add the ability to issue RSUs under the 1996 Plan. Options granted under the 1996 Plan generally become

Table of Contents

exercisable over a four-year period beginning on the date of grant and have a maximum term of ten years. The Company had authorized 164,623,039 shares of common stock for issuance under the 1996 Plan. Effective May 18, 2006, additional equity awards under the 1996 Plan have been discontinued and new equity awards are being granted under the 2006 Plan. Remaining authorized shares under the 1996 Plan that were not subject to outstanding awards as of May 18, 2006 were canceled on May 18, 2006. The 1996 Plan will remain in effect as to outstanding equity awards granted under the plan prior to May 18, 2006.

Plans Assumed Upon Acquisition

In connection with past acquisitions, the Company assumed options and restricted stock under the stock plans of the acquired companies. The Company exchanged those options and restricted stock for Juniper Networks' options and restricted stock and, in the case of the options, authorized the appropriate number of shares of common stock for issuance pursuant to those options. As of September 30, 2008, there were approximately 2.8 million common shares subject to outstanding awards under plans assumed through past acquisitions. There was no restricted stock subject to repurchase as of September 30, 2008 and December 31, 2007. There were no restricted stock repurchases during the three and nine months ended September 30, 2008 and 2007.

Equity Award Activities

In the three and nine months ended September 30, 2008, the Company granted RSUs covering approximately 0.3 million shares and 1.2 million shares, respectively, of common stock to its employees under the 2006 Plan. The Company also granted performance share awards to eligible executives covering up to 0.9 million and 1.5 million shares of common stock in the three and nine months ended September 30, 2008, respectively, that generally vest from 2009 through 2012 provided certain annual performance targets and other vesting criteria are met. RSUs generally vest over a period of three to five years from the date of grant. Until vested, RSUs and performance share awards do not have the voting rights of common stock and the shares underlying the awards are not considered issued and outstanding. No restricted stock was issued in the same periods during 2008. The Company expenses the cost of the RSUs, which is determined to be the fair market value of the shares of the Company's common stock at the date of grant, ratably over the period during which the restrictions lapse. The Company estimated the stock compensation expense for its performance share awards based on the vesting criteria and only recognized stock compensation expense for the portions of such awards for which annual targets have been set. The Company accrued stock compensation expense of \$0.5 million and \$1.0 million for the three and nine months ended September 30, 2008, respectively, and \$0.1 million and \$0.3 million for the three and nine months ended September 30, 2007, respectively, in connection with such performance shares. In addition to RSUs and performance share awards, the Company also granted stock options covering approximately 3.2 million shares and 11.5 million shares of common stock under the 2006 Plan in the three and nine months ended September 30, 2008, respectively.

Net income for the three and nine months ended September 30, 2008, included pre-tax stock-based compensation expense of \$28.8 million and \$78.9 million, respectively, related to stock options, RSUs, performance share awards and employee stock purchases under the Company's 1999 Employee Stock Purchase Plan reflecting the fair value recognition provisions under SFAS 123R. Net income for the three and nine months ended September 30, 2007, included pre-tax stock-based compensation expense of \$21.2 million and \$68.7 million, respectively, related to stock options, RSUs, performance share awards, and employee stock purchases reflecting the fair value recognition provisions under SFAS 123R.

Table of Contents

A summary of the Company's equity award activity and related information for the nine months ended September 30, 2008, is set forth in the following table:

	Shares Available For Grant(1) (In thousands)	Number of Shares (In thousands)	Weighted- Average Exercise Price (In dollars)	Outstanding Options(4) Weighted Average Remaining Contractual Term (In years)	Aggregate Intrinsic Value (In thousands)
Balance at January 1, 2008	46,022	66,928	\$20.36		
RSUs and performance share awards granted (2)	(5,651)				
Options granted	(11,467)	11,467	25.59		
RSUs canceled (2)	896				
Options canceled (3)	1,824	(1,833)	21.93		
Options exercised		(5,308)	15.06		
Options expired (3)	650	(666)	30.67

share subject to such award. The Company granted RSUs and performance share awards covering approximately 1.2 million and 2.7 million shares of common stock in the three and nine months ended September 30, 2008, respectively.

- (3) Canceled or expired options under the 1996 Plan and the 2000 Plan and the stock plans of the acquired companies are no longer available for future grant under such plans. Up to a maximum of 75,000,000 additional shares of common stock subject to outstanding options under the 1996 Plan and the 2000 Plan that subsequently expired unexercised after May 18, 2006, become available for grant under the

2006 Plan.

- (4) Outstanding options covering 70.6 million shares of common stock do not include RSUs and performance share awards outstanding as of September 30, 2008. See details under *Restricted Stock Units and Performance Share Awards Activities* below.

A summary of the Company's vested or expected-to-vest options and exercisable options as of September 30, 2008, is set forth in the following table:

	Number of	Weighted-Average	Weighted Average	Aggregate
	Shares	Exercise	Remaining	Intrinsic
	(In	(In	Term	Value
	thousands)	dollars)	(In years)	(In thousands)
Vested or expected-to-vest options	63,918	\$21.32	5.0	\$ 206,348
Exercisable options	45,891	20.41	4.6	185,859

As of September 30, 2008, options covering approximately 45.9 million shares of common stock were exercisable at a weighted-average exercise price of \$20.41 per share. As of December 31, 2007, options covering approximately 44.8 million shares of common stock were exercisable at a weighted-average exercise price of \$20.01 per share. Aggregate intrinsic value represents the difference between the Company's closing stock price on the last trading day of the fiscal period, which was \$21.07 as of September 30, 2008, and the exercise price multiplied by the number of related options. The pre-tax intrinsic value of options exercised, representing the difference between the fair market value of the Company's common stock on the date of the exercise and the exercise price of each option, was \$15.0 million and \$62.5 million for the three and nine months ended September 30, 2008, respectively.

Table of Contents

Total fair value of options vested for the three and nine months ended September 30, 2008, was \$16.7 million and \$53.8 million, respectively. As of September 30, 2008, approximately \$153.6 million of unrecognized compensation cost, adjusted for estimated forfeitures, related to non-vested stock options is expected to be recognized over a weighted-average period of approximately 2.9 years.

Restricted Stock Units and Performance Share Awards Activities

The following schedule summarizes information about the Company's RSUs and performance share awards for the nine months ended September 30, 2008:

Outstanding RSUs and Performance Share Awards				
	Number of	Weighted-Average Grant Date	Weighted Average Remaining Contractual	Aggregate Intrinsic Value
	Shares (In thousands)	Fair Value (In dollars)	Term (In years)	(In thousands)
Balance at January 1, 2008	6,284	\$22.40		
RSUs and performance share awards granted	2,691	25.56		
RSUs and performance share awards vested	(1,639)	18.35		
RSUs and performance share awards canceled	(486)	20.71		
Balance at September 30, 2008	6,850	\$24.73	1.7	\$ 144,326

The weighted-average grant date fair value of RSUs granted during the three and nine months ended September 30, 2008, was \$26.51 per share and \$25.55 per share, respectively, and was \$32.29 per share and \$19.79 per share for the three and nine months ended September 30, 2007, respectively. The weighted-average grant date fair value of performance share awards granted during the three and nine months ended September 30, 2008, was \$25.90 per share and \$25.57 per share, respectively, and was \$18.27 per share for the three and nine months ended September 30, 2007, respectively. As of September 30, 2008, approximately \$72.2 million of unrecognized compensation cost, adjusted for estimated forfeitures, related to non-vested RSUs and non-vested performance share awards is expected to be recognized over a weighted-average period of approximately 2.6 years.

The following schedule summarizes information about the Company's RSUs and performance share awards as of September 30, 2008:

	Number of	Weighted-Average Exercise	Weighted Average Remaining Contractual	Aggregate Intrinsic Value
	Shares (In thousands)	Price (In dollars)	Term (In years)	(In thousands)
Shares subject to outstanding RSUs and performance share awards	6,850	\$	1.7	\$ 144,326
Vested and expected-to-vest RSUs and performance share awards	4,822		1.6	101,606

Approximately 0.2 million RSUs and 1.6 million RSUs, respectively, became vested during the three and nine months ended September 30, 2008, respectively. There were no RSUs vested during the three and nine months ended September 30, 2007.

Employee Stock Purchase Plan

In April 1999, the Board of Directors approved the adoption of the Juniper Networks 1999 Employee Stock Purchase Plan (the "1999 Purchase Plan"). The 1999 Purchase Plan permits eligible employees to acquire shares of the Company's common stock through periodic payroll deductions of up to 10% of base compensation. Each employee may purchase no more than 6,000 shares in any twelve-month period, and in no event may an employee purchase more than \$25,000 worth of stock, determined at the fair market value of the shares at the time such option is granted, in one calendar year. The 1999 Purchase Plan is implemented in a series of offering periods, each six months in duration, or a shorter period as determined by the Board. The price at which the common stock may be

Table of Contents

purchased is 85% of the lesser of the fair market value of the Company's common stock on the first or last trading day of the applicable offering period. Employees purchased approximately 0.9 million and 1.6 million shares of common stock through the 1999 Purchase Plan at an average price of \$22.13 and \$22.57 per share in the three and nine months ended September 30, 2008, respectively. Employees purchased approximately 0.6 million shares of common stock through the 1999 Purchase Plan at an average price of \$17.08 per share in the nine months ended September 30, 2007. There were no employee purchases under the 1999 Purchase Plan due to the suspension of the Purchase Plan from August 2006 through March 2007. In connection with the 1999 Purchase Plan, compensation expense of \$3.6 million and \$10.2 million was recorded in operating expenses for the three and nine months ended September 30, 2008, respectively, and \$2.4 million and \$4.8 million for the three and nine months ended September 30, 2007, respectively. No compensation expense was recorded in the first quarter of 2007 due to the temporary suspension of the 1999 Purchase Plan. As of September 30, 2008, approximately 8.7 million shares had been issued since inception and 12.3 million shares remained available for future issuance under the 1999 Purchase Plan. The 1999 Purchase Plan will be discontinued effective February 1, 2009.

In May 2008, the Company's stockholders approved the adoption of the Juniper Networks 2008 Employee Stock Purchase Plan (the "2008 Purchase Plan"). The 2008 Purchase Plan was adopted to replace the 1999 Purchase Plan, which will be terminated immediately following the conclusion of the offering period ending January 30, 2009. The Board has reserved an aggregate of 12,000,000 shares of the Company's common stock for issuance under the 2008 Purchase Plan. The 2008 Purchase Plan is generally similar to the 1999 Purchase Plan, except that under the 2008 Purchase Plan any increases to the number of shares reserved for issuance must be approved by the Company's stockholders. The first offering period of the 2008 Purchase Plan will commence on the first trading day on or after February 1, 2009.

Common Stock Reserved for Future Issuance

As of September 30, 2008, the Company had reserved an aggregate of approximately 122.0 million shares of common stock for future issuance under its stock option plans and the 1999 Purchase Plan.

Valuation of Stock-Based Compensation

SFAS 123R requires the use of a valuation technique, such as an option-pricing model, to calculate the fair value of stock-based awards. The Company has elected to use the Black-Scholes-Merton option-pricing model, which incorporates various assumptions including volatility, expected life, and risk-free interest rates. The expected volatility is based on the implied volatility of market traded options on the Company's common stock, adjusted for other relevant factors including historical volatility of the Company's common stock over the most recent period commensurate with the estimated expected life of the Company's stock options. The expected life of an award is based on historical experience and on the terms and conditions of the stock awards granted to employees, as well as the potential effect from options that had not been exercised at the time.

Since 2006, the Company has granted stock option awards that have a maximum contractual life of seven years from the date of grant. Prior to 2006, stock option awards generally had a ten-year contractual life from the date of grant. In 2007, the government of India implemented a new fringe benefit tax that applies to equity awards granted to India taxpayers. This fringe benefit tax is payable by the issuer of the equity awards; however, the law allows an issuer to recover from individual award holders the fringe benefit taxes the issuer paid on their applicable equity awards. Beginning in January 2008, the Company amended its equity award agreements for future grants made to its employees in India to provide for the Company to be reimbursed for fringe benefit taxes paid in relation to applicable equity awards. The Company has elected to use a Black-Scholes-Merton option-pricing model that incorporates a Monte Carlo simulation to calculate the fair value of stock-based awards issued under the amended equity award agreements. The assumptions used in this valuation are included below.

Table of Contents

The assumptions used and the resulting estimates of fair value or weighted-average fair value per share of awards granted and employee stock purchases under the Purchase Plan during those periods were:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Employee Stock Options:				
Volatility factor	45% - 47%	37% - 42%	43% - 48%	34% - 42%
Risk-free interest rate	2.2% - 4.1%	4.2% - 4.9%	1.7% - 4.4%	4.2% - 5.1%
Expected life (years)	3.6 - 5.7	3.5	3.6 - 5.7	3.5 - 3.7
Dividend yield				
Fair value per share	\$ 8.49 - \$10.45	\$ 9.05 - \$12.83	\$ 8.32 - \$10.88	\$ 6.42 - \$13.28
Employee Stock Purchase Plan:				
Volatility factor	46%	37%	47%	38%
Risk-free interest rate	1.9%	5.0%	2.0%	5.0%
Expected life (years)	0.5	0.5	0.5	0.4
Dividend yield				
Weighted-average fair value per share	\$ 7.39	\$ 8.24	\$ 7.60	\$ 6.52

Note 7. Segments

The Company's chief operating decision maker (CODM) allocates resources and assesses performance based on financial information by the Company's business groups. In the first quarter of 2008, the Company realigned its organizational structure to include its Service business as a component of the related Infrastructure or SLT business groups. Accordingly, the previously reported Service segment has been combined into the Company's two reportable segments as follows: Infrastructure and SLT. The Infrastructure segment includes products from the E-, M-, MX-, and T-series router product families, EX-series switching products, as well as the circuit-to-packet products. The SLT segment consists primarily of Firewall virtual private network (Firewall) systems and appliances, secure sockets layer virtual private network (SSL) appliances, intrusion detection and prevention appliances (IDP), the J-series router product family and wide area network (WAN) optimization platforms.

The primary financial measure used by the CODM in assessing performance of the segments is segment operating income, which includes certain cost of revenues, research and development expenses, sales and marketing expenses, and general and administrative expenses. In the three and nine months ended September 30, 2008, the CODM did not allocate certain miscellaneous expenses to its segments even though such expenses were included in the Company's management operating income.

For arrangements with both Infrastructure and SLT products and services, revenue is attributed to the segment based on the underlying purchase order, contract or sell-through report. Direct costs and operating expenses, such as standard costs, research and development and product marketing expenses, are generally applied to each segment. Indirect costs, such as manufacturing overhead and other cost of sales, are allocated based on standard costs. Indirect operating expenses, such as sales, marketing, business development, and general and administrative expenses are generally allocated to each segment based on factors including headcount, usage and revenue. The CODM does not allocate stock-based compensation, amortization of purchased intangible assets, impairment, gain or loss on minority equity investments, interest income and expense, other income and expense, income taxes, as well as certain other charges to the segments.

Table of Contents

Further changes to this organizational structure may result in changes to the segments disclosed. The Company has restated the previously reported segment revenues and segment operating results to reflect the changes in its segments. Financial information for each segment used by the CODM is summarized as follows (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007 (1)	2008	2007 (1)
Net revenues:

Verizon accounted for 13.3% of the Company's net revenues for the three months ended September 30, 2008, and no single customer accounted for 10.0% or more of the Company's net revenues for the nine months ended September 30, 2008. Nokia Siemens Networks B.V. (NSN) and its predecessor companies accounted for 11.5%

Table of Contents

and 13.5% of the Company's net revenues for the three and nine months ended September 30, 2007. The revenue attributed to each significant customer was derived from the sale of products and services in both segments.

The Company tracks assets by physical location. The majority of the Company's assets, including property and equipment, were attributable to its U.S. operations as of September 30, 2008, and December 31, 2007. Although management reviews asset information on a corporate level and allocates depreciation expense by segment, the CODM does not review asset information on a segment basis.

Note 8. Income Taxes

The Company recorded tax provisions of \$63.2 million and \$45.6 million, or effective tax rates of 30% and 35%, for the three months ended September 30, 2008 and 2007, respectively. The Company recorded tax provisions of \$164.8 million and \$104.7 million, or effective tax rates of 30% and 31%, for the nine months ended September 30, 2008 and 2007, respectively. The effective tax rates for the three and nine months ended September 30, 2008, differ from the federal statutory rate of 35% primarily due to earnings in foreign jurisdictions which are subject to lower rates. The effective tax rate for the three and nine months ended September 30, 2007, differ from the federal statutory rate of 35% primarily due to earnings in foreign jurisdictions which are subject to lower rates and the federal research and development credit offset by the disallowance of stock option charges incurred within certain jurisdictions during the three months ended September 30, 2007. The Company's income taxes payable for federal and state purposes were reduced by the tax benefit from employee stock option transactions. This benefit totaled \$10.5 million and \$29.6 million for the three and nine months ended September 30, 2008, respectively, and was reflected as an increase to additional paid-in capital.

The Company is currently under examination by the Internal Revenue Service (IRS) for the 2004 tax year, the German tax authorities for the 2005 tax year, and the Indian tax authorities for the 2004 and 2005 tax years. Additionally, the Company has not reached final resolution with the IRS on an adjustment it proposed for the 1999 and 2000 tax years. The Company was not under examination by any other major jurisdictions in which the Company files its income tax returns as of September 30, 2008. Although the timing of the resolution and/or closure of any audits is highly uncertain, it is reasonably possible that the balance of gross unrecognized tax benefits could significantly change in the next 12 months. However, given the number of years remaining subject to examination and the number of matters being examined, the Company is unable to estimate the range of possible adjustments to the balance of gross unrecognized tax benefits.

The gross unrecognized tax benefits increased by approximately \$10.1 million for the nine months ended September 30, 2008, of which \$8.6 million, if recognized, would affect the effective tax rate. Interest and penalties accrued for the same period were immaterial.

Note 9. Commitments and Contingencies**Commitments**

The following table summarizes the Company's principal contractual obligations as of September 30, 2008 (in millions):

	Total	2008	2009	2010	2011	2012	Thereafter	Other
Operating leases	\$ 227.2	\$ 14.1	\$ 52.3	\$ 48.8	\$ 41.5	\$ 35.7	\$ 34.8	\$
Sublease rental income	(1.8)	(0.4)	(0.8)	(0.6)				
Purchase commitments	98.9	98.9						
Tax liabilities	82.5							82.5
Other contractual obligations	56.4	7.6	25.7	9.7	5.9	5.6	1.9	
Total	\$ 463.2	\$ 120.2	\$ 77.2	\$ 57.9	\$ 47.4	\$ 41.3	\$ 36.7	\$ 82.5

Table of Contents

Operating Leases

Juniper Networks leases its facilities under operating leases that expire at various times, the longest of which expires in January 2017. Future minimum payments under the non-cancelable operating leases, net of committed sublease income, totaled \$225.4 million as of September 30, 2008. Rent expense for the three months ended September 30, 2008 and 2007 was \$14.4 million and \$13.0 million, respectively, and \$43.3 million and \$35.0 million for the nine months ended September 30, 2008 and 2007, respectively.

Purchase Commitments

In order to reduce manufacturing lead times and ensure adequate component supply, contract manufacturers utilized by the Company place non-cancelable, non-returnable (NCNR) orders for components based on the Company's build forecasts. As of September 30, 2008, there were NCNR component orders placed by the contract manufacturers with a value of \$98.9 million. The contract manufacturers use the components to build products based on the Company's forecasts and on purchase orders the Company has received from customers. Generally, the Company does not own the components, and title to the products transfers from the contract manufacturers to the Company and immediately to the Company's customers upon delivery at a designated shipment location. If the components go unused or the products go unsold for specified periods of time, the Company may incur carrying charges or obsolete materials charges for components that the contract manufacturers purchased to build products to meet the Company's forecast or customer orders. As of September 30, 2008, the Company had accrued \$28.5 million based on its estimate of such charges.

Tax Liabilities

As of September 30, 2008, the company had \$82.5 million included in long-term liabilities in the condensed consolidated balance sheet for unrecognized tax positions. At this time, the Company is unable to make a reasonably reliable estimate of the timing and amount of payments in individual years beyond 12 months due to uncertainties in the timing of tax audit outcomes.

Other Contractual Obligations

As of September 30, 2008, other contractual obligations consisted primarily of an indemnity-related escrow amount of \$2.3 million, a software subscription requiring payments of \$5.0 million in January 2009, and a joint development agreement requiring quarterly payments of \$3.5 million to be paid through January 2010. Additionally, in the second quarter of 2008, the Company entered into a five year, \$34.0 million data center hosting agreement which was amended in the third quarter of 2008, increasing the amounts payable under agreement to \$36.4 million. As of September 30, 2008, \$28.1 million remained unpaid under the data center hosting agreement of which \$1.9 million is required to be paid by the fourth quarter of 2008. The remaining commitment under this agreement is expected to be paid through the end of April 2013.

Guarantees

The Company enters into agreements with customers that contain indemnification provisions relating to potential situations where claims could be alleged that the Company's products infringe the intellectual property rights of a third party. Other guarantees or indemnification arrangements include guarantees of product and service performance and standby letters of credit for certain lease facilities. The Company has not recorded a liability related to these guarantee and indemnification provisions and these guarantees and indemnification arrangements have not had any significant impact on the Company's consolidated financial position, results of operations, or cash flows.

Legal Proceedings

The Company is subject to legal claims and litigation arising in the ordinary course of business, such as employment or intellectual property claims, including the matters described below. The outcome of any such matters is currently not determinable.

Table of Contents

An adverse result in one or more of such matters could negatively affect the Company's results of operations, cash balances or cash flows.

Federal Derivative Lawsuits

Between May 24, 2006 and August 17, 2006, seven purported shareholder derivative actions were filed in the United States District Court for the Northern District of California against the Company and certain of its current and former officers and directors. The lawsuits allege that the Company's officers and directors either participated in illegal back-dating of stock option grants or allowed it to happen. On October 19, 2006, the Court ordered the consolidation of these actions as *In Re Juniper Derivative Actions*, No. 06-03396, and appointed as the lead plaintiffs Timothy Hill, Employer-Teamsters Local Nos. 175 & 505 Pension Trust Fund, and Indiana State District Council of Laborers and HOD Carriers Pension Fund. Lead plaintiffs filed a consolidated complaint on April 11, 2007. The consolidated complaint asserts causes of action for violations of federal securities laws, violations of California securities laws, breaches of fiduciary duty, aiding and abetting breaches of fiduciary duty, abuse of control, corporate waste, breach of contract, unjust enrichment, gross mismanagement, and insider selling and misappropriation of information. The consolidated complaint also demands an accounting and rescission of allegedly improper stock option grants. The Company formed a Special Litigation Committee, consisting of directors Michael Rose and Michael Lawrie, to determine whether it is in the best interest of Juniper Networks and its shareholders to pursue any of the claims asserted in the derivative litigation. The Special Litigation Committee is authorized to pursue, settle, or release such claims. The plaintiffs and the Company have agreed in principle on a settlement of the federal derivative litigation and the state derivative litigation discussed below, and any such settlements would require approval of the court. The Company has accrued an aggregate of \$9 million expense in connection with both of these potential settlements. On August 26, 2008, plaintiffs filed the stipulation of settlement and a motion for preliminary approval of the settlement. On September 8, 2008, the Court entered an Order preliminarily approving the derivative settlement and providing for notice to shareholders. A settlement hearing for final approval of the derivative settlement will be held on November 10, 2008.

State Derivative Lawsuits – California

On May 24 and June 2, 2006, two purported shareholder derivative actions were filed in the Santa Clara County Superior Court in the State of California against the Company and certain of its current and former officers and directors. These two actions were consolidated as *In re Juniper Networks Derivative Litigation*, No. 1:06CV064294, by order dated June 20, 2006. An amended consolidated complaint was filed on April 9, 2007. The amended consolidated complaint alleges that certain of the Company's current and former officers and directors either participated in illegal back-dating of stock options or allowed it to happen. The complaint asserts causes of action for unjust enrichment, breach of fiduciary duties, abuse of control, gross mismanagement, waste of corporate assets, insider selling and misappropriation of information, and violations of California securities laws. Plaintiffs also demand an accounting and rescission of allegedly improper stock options grants, and a constructive trust of proceeds derived from allegedly illicit stock options. The Company formed a Special Litigation Committee, consisting of directors Michael Rose and Michael Lawrie, to determine whether it is in the best interest of Juniper Networks and its shareholders to pursue any of the claims asserted in the derivative litigation. The Special Litigation Committee is authorized to pursue, settle, or release such claims. The plaintiffs and the Company have agreed in principle on a settlement of the federal derivative litigation discussed above and the state derivative litigation and any such settlements would require approval of the court. The Company has accrued an aggregate of \$9 million expense in connection with both of these potential settlements.

Federal Securities Class Action

On July 14, 2006 and August 29, 2006, two purported class actions were filed in the Northern District of California against the Company and certain of the Company's current and former officers and directors. On November 20, 2006, the Court consolidated the two actions as *In re Juniper Networks, Inc. Securities Litigation*, No. C06-04327-JW, and appointed the New York City Pension Funds as lead plaintiffs. The lead plaintiffs filed a Consolidated Class Action Complaint on January 12, 2007, and filed an Amended Consolidated Class Action Complaint on April 9, 2007. The Amended Consolidated Complaint alleges that the defendants violated federal securities laws by manipulating stock option grant dates to coincide with low stock prices and issuing false and misleading statements

Table of Contents

including, among others, incorrect financial statements due to the improper accounting of stock option grants. The Amended Consolidated Complaint asserts claims for violations of the Securities Act of 1933 and the Securities Exchange Act of 1934 on behalf of all persons who purchased or otherwise acquired Juniper Networks' publicly traded securities from July 12, 2001, through and including August 10, 2006. On June 7, 2007, the defendants filed a motion to dismiss certain of the claims, and a hearing was held on September 10, 2007. On March 31, 2008, the Court issued an order granting in part and denying in part the defendants' motion to dismiss. The order dismissed with prejudice plaintiffs' section 10(b) claim to the extent it was based on challenged statements made before July 14, 2001. The order also dismissed, with leave to amend, plaintiffs' section 10(b) claim against Pradeep Sindhu. The order upheld all of plaintiffs' remaining claims.

Calamore Proxy Statement Action

On March 28, 2007, an action titled *Jeanne M. Calamore v. Juniper Networks, Inc., et al.*, No. C-07-1772-JW, was filed by Jeanne M. Calamore in the Northern District of California against the Company and certain of the Company's current and former officers and directors. The complaint alleges that the proxy statement for the Company's 2006 Annual Meeting of Stockholders contained various false and misleading statements in that it failed to disclose stock option backdating information. As a result, plaintiff seeks preliminary and permanent injunctive relief with respect to the Company's 2006 Equity Incentive Plan, including seeking to invalidate the plan and all equity awards granted and grantable thereunder. On May 21, 2007, the Company filed a motion to dismiss and plaintiff filed a motion for preliminary injunction. On July 19, 2007, the Court issued an order denying plaintiff's motion for a preliminary injunction and dismissing the complaint in its entirety with leave to amend. Plaintiff filed an amended complaint on August 27, 2007, and the defendants filed a motion to dismiss on October 9, 2007. On August 13, 2008, the Court issued an Order granting defendants' motion to dismiss with prejudice, and entered final judgment in favor of defendants. On September 9, 2008, plaintiff filed a Notice of Appeal in the United States Court of Appeals for the Ninth Circuit. Plaintiffs' opening appellate brief is due December 26, 2008, and defendants' answering brief is due January 26, 2009.

IPO Allocation Case

In December 2001, a class action complaint was filed in the United States District Court for the Southern District of New York against the Goldman Sachs Group, Inc., Credit Suisse First Boston Corporation, FleetBoston Robertson Stephens, Inc., Royal Bank of Canada (Dain Rauscher Wessels), SG Cowen Securities Corporation, UBS Warburg LLC (Warburg Dillon Read LLC), Chase (Hambrecht & Quist LLC), J.P. Morgan Chase & Co., Lehman Brothers, Inc., Salomon Smith Barney, Inc., Merrill Lynch, Pierce, Fenner & Smith, Incorporated (collectively, the

Underwriters), Juniper Networks and certain of Juniper Networks' officers. This action was brought on behalf of purchasers of the Company's common stock in its initial public offering in June 1999 and the Company's secondary offering in September 1999.

Specifically, among other things, this complaint alleged that the prospectus pursuant to which shares of common stock were sold in the Company's initial public offering and the Company's subsequent secondary offering contained certain false and misleading statements or omissions regarding the practices of the Underwriters with respect to their allocation of shares of common stock in these offerings and their receipt of commissions from customers related to such allocations. Various plaintiffs have filed actions asserting similar allegations concerning the initial public offerings of approximately 300 other issuers. These various cases pending in the Southern District of New York have been coordinated for pretrial proceedings as *In re Initial Public Offering Securities Litigation*, 21 MC 92. In April 2002, plaintiffs filed a consolidated amended complaint in the action against the Company, alleging violations of the Securities Act of 1933 and the Securities Exchange Act of 1934. Defendants in the coordinated proceeding filed motions to dismiss. In October 2002, the Company's officers were dismissed from the case without prejudice pursuant to a stipulation. On February 19, 2003, the court granted in part and denied in part the motion to dismiss, but declined to dismiss the claims against the Company.

In June 2004, a stipulation of settlement and release of claims against the issuer defendants, including the Company, was submitted to the court for approval. On August 31, 2005, the court preliminarily approved the settlement. In December 2006, the appellate court overturned the certification of classes in the six test cases that were selected by

Table of Contents

the underwriter defendants and plaintiffs in the coordinated proceedings (the action involving the Company is not one of the six test cases). Because class certification was a condition of the settlement, it was unlikely that the settlement would receive final Court approval. On June 25, 2007, the Court entered an order terminating the proposed settlement based upon a stipulation among the parties to the settlement. Plaintiffs have filed amended master allegations and amended complaints in the six focus cases. On March 26, 2008, the Court largely denied the defendants' motion to dismiss the amended complaints in the six test cases.

16(b) Demand

On October 3, 2007, a purported Juniper Networks shareholder filed a complaint for violation of Section 16(b) of the Securities Exchange Act of 1934, which prohibits short-swing trading, against the Company's IPO underwriters. The complaint, *Vanessa Simmonds v. The Goldman Sachs Group, et al.*, Case No. C07-015777, in District Court for the Western District of Washington, seeks the recovery of short-swing profits. The Company is named as a nominal defendant. No recovery is sought from the Company in this matter.

IRS Notices of Proposed Adjustments

In 2007, the IRS opened an examination of the Company's U.S. federal income tax and employment tax returns for the 2004 fiscal year. Subsequently, the IRS extended their examination of the Company's employment tax returns to include fiscal years 2005 and 2006. The IRS has not yet concluded its examinations of these returns. In September 2008, as part of its on-going audit of the U.S. federal income tax return, the IRS issued a Notice of Proposed Adjustment (NOPA) regarding the Company's business credits. The Company is considering its response to the proposed adjustment by the IRS. The Company believes that it has adequately provided for any reasonably foreseeable outcome related to this proposed adjustment and the ultimate resolution of this matter is unlikely to have a material effect on the Company's consolidated financial position.

The IRS has concluded an audit of the Company's federal income tax returns for fiscal years 1999 and 2000. During 2004, the Company received a NOPA from the IRS. While the final resolution of the issues raised in the NOPA is uncertain, the Company does not believe that the outcome of this matter will have a material adverse effect on the Company's consolidated financial position or results of operations. The Company is also under routine examination by certain state and non-US tax authorities. The Company believes that it has adequately provided for any reasonably foreseeable outcome related to these audits.

Note 10. Related Party Transactions

The Company reimburses its Chairman of the Board of Directors and former CEO, Mr. Scott Kriens, for ordinary operating costs relating to his use of a personal aircraft for business purposes up to a maximum amount per year. The Company incurred \$0.1 million and \$0.2 million in related expenses for the three and nine months ended September 30, 2008, respectively, and \$0.1 million and \$0.2 million in the three and nine months ended September 30, 2007, respectively.

Note 11. Subsequent Event

Stock Repurchases

Subsequent to September 30, 2008, through the filing of this report, the Company repurchased and retired approximately 1.1 million shares of its common stock for approximately \$21.0 million under the 2008 Stock Repurchase program at an average purchase price of \$18.73 per share. The Company's 2008 Stock Repurchase Program had remaining authorized funds of \$793.6 million as of the report filing date. Purchases under the Company's stock repurchase programs are subject to a review of the circumstances in place at the time and will be made from time to time as permitted by securities laws and other legal requirements.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Forward-Looking Statements

This Quarterly Report on Form 10-Q (Report), including the Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements regarding future events and the future results of the Company that are based on current expectations, estimates, forecasts, and projections about the industry in which the Company operates and the beliefs and assumptions of the management of the Company. Words such as expects, anticipates, targets, goals, projects, intends, plans, believes, seeks, estimates, variations similar expressions are intended to identify such forward-looking statements. These forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions that are difficult to predict. Therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in this Report under the section entitled Risk Factors in Item 1A of Part II and elsewhere, and in other reports the Company files with the Securities and Exchange Commission (SEC), specifically the most recent Annual Report on Form 10-K. The Company undertakes no obligation to revise or update publicly any forward-looking statements for any reason.

The following discussion is based upon our unaudited Condensed Consolidated Financial Statements included elsewhere in this report, which have been prepared in accordance with U.S. generally accepted accounting principles. In the course of operating our business, we routinely make decisions as to the timing of the payment of invoices, the collection of receivables, the manufacturing and shipment of products, the fulfillment of orders, the purchase of supplies, and the building of inventory and spare parts, among other matters. Each of these decisions has some impact on the financial results for any given period. In making these decisions, we consider various factors including contractual obligations, customer satisfaction, competition, internal and external financial targets and expectations, and financial planning objectives. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingencies. On an on-going basis, we evaluate our estimates, including those related to sales returns, pricing credits, warranty costs, allowance for doubtful accounts, impairment of long-term assets, especially goodwill and intangible assets, contract manufacturer exposures for carrying and obsolete material charges, assumptions used in the valuation of stock-based compensation, and litigation. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Table of Contents**Overview of the Results of Operations*****Executive Overview***

To aid readers of our financial statements in understanding our operating results, we have provided below an executive overview of the significant events that affected the three and nine months ended September 30, 2008, and a discussion of the nature of our operating expenses.

The following table provides an overview of our key financial metrics for the three and nine months ended September 30, 2008 and 2007:

(In millions, except per share amounts and percentages)	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	\$ Change	% Change	2008	2007	\$ Change	% Change
Net revenues	\$ 947.0	\$ 735.0	\$ 212.0	29%	\$ 2,648.9	\$ 2,026.9	\$ 622.0	31%
Operating income	\$ 202.0	\$ 112.8	89.2	79%	\$ 505.1	\$ 259.5	\$ 245.6	95%
Percentage of net revenues	21.3%	15.3%			19.1%	12.8%		
Net income	\$ 148.5	\$ 85.1	63.4	75%	\$ 379.3	\$ 237.9	\$ 141.4	59%
Percentage of net revenues	15.7%	11.6%			14.3%	11.7%		
Net income per share								
Basic	\$ 0.27	\$ 0.17	\$ 0.10	59%	\$ 0.71	\$ 0.44	\$ 0.27	61%
Diluted	\$ 0.27	\$ 0.15	\$ 0.12	80%	\$ 0.67	\$ 0.41	\$ 0.26	63%

Net revenues: Our net revenues increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to the growing acceptance of our router and firewall products and services in the service provider and enterprise markets as well as the timing of revenue recognition for previously shipped products from certain arrangements. Net revenues increased in each of our three geographic regions, specifically in the Americas and the Asia Pacific region, in the three and nine months ended September 30, 2008, compared to the same periods in 2007.

Operating Margin: Our operating income increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007. In addition, our operating margins as a percentage of net revenues increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007. This change was, in large part, due to the growth in revenue and a decrease in operating expense as a percentage of net revenues, which was attributable to our efforts to better manage expenses and improve efficiencies in the three and nine months ended September 30, 2008, compared to the same periods in 2007.

Net Income and Net Income Per Share: The increase in net income in the three and nine months ended September 30, 2008, compared to the same periods in 2007, is primarily due to the growth in revenue and the reduction in operating expenses. These increases in operating margin were partially offset by lower net interest and other income along with higher income tax expense in the 2008 periods.

Other Financial Highlights: Total deferred revenue increased \$49.3 million in the nine months ended September 30, 2008, primarily due to the renewal of annual maintenance arrangements. During the nine months ended September 30, 2008, we generated a net increase of \$62.4 million in cash and cash equivalents, primarily resulting from \$660.1 million in cash provided by our operating activities, which was offset by cash used in investing activities and financing activities, including the repurchase of \$562.2 million of our common stock.

Significant Events***Business and Market Environment***

We design, develop and sell products and services that together provide our customers with high-performance network infrastructure that creates responsive and trusted environments for accelerating the deployment of services and applications over a single Internet Protocol (IP)-based network. We serve the high-performance networking requirements of global service providers, enterprises, governments and research and education institutions that view the network as critical to their success. High-performance networking is designed to provide fast, reliable and secure access to applications and services at scale. We offer a high-performance network infrastructure that includes IP

Table of Contents

routing, Ethernet switching, security and application acceleration solutions, as well as partnerships designed to extend the value of the network and worldwide services and support designed to optimize customer investments.

In the first nine months of our 2008 fiscal year, we continued to deliver new and innovative, high-performance network infrastructure solutions. We entered the enterprise switching market, through the introduction of the EX-series, a family of Ethernet switches that leverage the operational simplicity and carrier-class reliability of our JUNOS® software. We also introduced a new category of extensible networking and security products with our SRX series dynamic services gateways. In addition, we introduced a new family of intrusion detection and prevention (IDP) appliances that deliver up to 10 Gbps real-world throughput and performance to enable deployments in the network core, the integration of services, including Firewall and chassis clustering, into JUNOS software for implementation on the J-series services router and the Security Threat Response Manager (STRM), a platform capable of providing businesses with a centralized scalable and effective way to log and manage a rapidly evolving threat landscape. We also announced an advanced mobile IP/Multi Protocol Label Switching (MPLS) solution portfolio with the new BX 7000 multi-access gateway router for the cell site, M-series circuit emulation physical interface cards for the aggregation site and a suite of software features designed to simplify deployment, provisioning and management of mobile backhaul networks. In addition, we introduced the JCS 1200, the industry's first high-performance control plane scaling platform.

In the first nine months of our 2008 fiscal year, we also delivered new enhancements to existing solutions to help customers maximize their network infrastructure investments and lower their overall total cost of ownership. We expanded our Network and Security Manager (NSM) to deliver a centralized management solution for routing, security and switching, enabling customers to consolidate and simplify the management of their network infrastructure. We announced enhancements to our Access Control Solution, to deliver enhanced scalability and performance, with centralized access policy management via NSM, helping customers cost-effectively achieve comprehensive network visibility with broad enforcement capabilities. We introduced the next generation of our WXC application acceleration platforms to deliver a more scalable, modular and cost-effective approach to delivering fast and consistent application response across the wide area network (WAN). In addition, we announced three new line card families for the MX-series Ethernet Services Routers.

Changes to Segments

Beginning in January 2008, we realigned our reporting structure which resulted in two segments: Infrastructure and SLT. The previously reported Service segment has been combined into the following two segments:

Infrastructure: Our Infrastructure segment includes products and services related to the E-, M-, MX- and T-series router product families, EX-series switching products, as well as the circuit-to-packet products.

SLT: Our SLT segment consists primarily of products and services related to our integrated collection of security measures designed to prevent unauthorized access to computer networks (Firewall) systems and appliances, secure sockets layer virtual private network (SSL) appliances, IDP appliances, the J-series router product family and WAN optimization platforms.

Stock Repurchase Activity

During the three and nine months ended September 30, 2008, we repurchased \$440.9 million and \$562.2 million or 18.0 million and 22.7 million shares of our common stock, respectively, under two stock repurchase programs that were authorized by our Board of Directors.

Under the \$2.0 billion stock repurchase program approved in 2006 and 2007 (the 2006 Stock Repurchase Program), we repurchased approximately 13.2 million shares of our common stock at an average price of \$24.52 per share for a total purchase price of \$323.7 million during the three months ended September 30, 2008, and approximately 15.4 million shares of our common stock at an average price of \$24.53 per share for a total purchase price of \$376.8 million during the nine months ended September 30, 2008. As of September 30, 2008, we have repurchased and retired approximately 84.8 million shares of our common stock under the 2006 Stock Repurchase

Table of Contents

Program at an average price of \$23.58 per share, and the program had no remaining authorized funds available for future stock repurchases.

The Board of Directors approved another \$1.0 billion stock repurchase program in March 2008 (the 2008 Stock Repurchase Program). Under this program, we repurchased approximately 4.8 million shares of our common stock at an average price of \$24.66 per share for a total purchase price of \$117.2 million during the three months ended September 30, 2008, and approximately 7.3 million shares of our common stock at an average price of \$25.42 per share for a total purchase price of \$185.4 million during the nine months ended September 30, 2008. As of September 30, 2008, the 2008 Stock Repurchase Program had remaining authorized funds of \$814.6 million. Subsequent to September 30, 2008, through the filing of this report, we have repurchased and retired approximately 1.1 million shares of our common stock for approximately \$21.0 million under the 2008 Stock Repurchase Program at an average price of \$18.73 per share. The 2008 Stock Repurchase Program had remaining authorized funds of \$793.6 million as of the report filing date.

All shares of common stock purchased under the 2006 and 2008 Stock Repurchase Programs have been retired. Future share repurchases under our 2008 Stock Repurchase Program will be subject to a review of the circumstances in place at the time and will be made from time to time in private transactions or open market purchases as permitted by securities laws and other legal requirements. This program may be discontinued at any time.

Backlog

Our sales are made primarily pursuant to purchase orders under framework agreements with our customers. At any given time, we have orders for products that have not been shipped and for services that have not yet been performed for various reasons. Because we believe industry practice would allow customers to cancel or change orders with limited advance notice prior to shipment or performance, as well as our own history of allowing such changes and cancellations, we do not consider this backlog to be firm and do not believe our backlog information is necessarily indicative of future revenue.

Manufacturing

Most of our manufacturing, repair and supply chain operations are outsourced to independent contract manufacturers. Accordingly, most of our costs of revenues consist of payments to our independent contract manufacturers for product costs. The independent contract manufacturers produce our products using design specifications, quality assurance programs and standards that we establish. Our independent contract manufacturers manufacture our products primarily in Canada, China, Malaysia, and the United States. We have employees in our manufacturing and operations organization who manage relationships with our contract manufacturers, manage our supply chain, and monitor product testing and quality. We generally do not own the components and title to products transfers from the contract manufacturers to us and immediately to our customers upon shipment.

The contract manufacturers procure components based on our build forecasts. If actual component usage is lower than our forecasts, we may be, and have been in the past, liable for carrying or obsolete material charges.

In recent years, an increasing amount of our product has been manufactured in Asia, and we anticipate that a larger percentage of our products will be produced outside the United States and Canada in the future. Our contracts generally provide for passage of title and risk of loss at the designated point of shipment to the customer. The manufacturing of products in Asia for shipment to customers in Europe, Middle East and Africa (EMEA) and the Americas resulted in additional shipment logistics, freight and timing issues for us and those customers. In an ongoing effort to balance our and the customers needs, we have made changes on occasion to the payment of freight and the point of shipment with respect to products shipped from Asia. These changes impact shipping costs and the timing of revenue recognition of the affected shipments.

Table of Contents**Nature of Expenses**

Employee related costs have historically been the primary driver of our operating expenses and we expect this trend to continue. These costs include items such as wages, commissions, bonuses, vacation, benefits, stock-based compensation, and travel. We increased our headcount by 21% to 6,830 employees as of September 30, 2008, from 5,661 employees as of September 30, 2007, primarily in the research and development, sales, and customer service organizations. The headcount growth has increased primarily in regions with lower operating costs per employee. Stock-based compensation and related payroll tax expense was \$29.1 million and \$81.5 million in the three and nine months ended September 30, 2008, respectively, and \$25.6 million and \$75.1 million in the three and nine months ended September 30, 2007, respectively. As of September 30, 2008, approximately \$153.6 million of unrecognized stock-based compensation cost, adjusted for estimated forfeitures, related to non-vested stock options is expected to be recognized over a weighted-average period of approximately 2.9 years. In addition, approximately \$72.2 million of unrecognized stock-based compensation cost, adjusted for estimated forfeitures, related to non-vested RSUs and non-vested performance share awards is expected to be recognized over a weighted-average period of approximately 2.6 years.

Facility and information technology departmental costs are allocated to other departments based on usage and headcount, respectively. Facility and information technology related costs increased by \$5.2 million and \$42.4 million in the three and nine months ended September 30, 2008, respectively, compared to the same periods in 2007 due to an increase in headcount and the continued build-out of our domestic and international development and test centers as well as applications to support our internal operations. Facility and information technology related headcount was 263 employees as of September 30, 2008, compared to 223 employees as of September 30, 2007. We expect to further invest in our company-wide information technology infrastructure as we implement our operational excellence initiatives.

Although our revenue transactions are primarily denominated in U.S. dollars, operating expenses are denominated in U.S. dollars, the British Pound, the Euro, Indian Rupee, and Japanese Yen as well as other foreign currencies. Changes in related currency exchange rates may affect our operating results. We use foreign currency forward and/or option contracts to hedge certain forecasted foreign currency transactions relating to operating expenses. These derivatives are designated as cash flow hedges and have maturities of less than one year. The effective portion of the derivative's gain or loss is initially reported as a component of accumulated other comprehensive income and, upon occurrence of the forecasted transaction, is subsequently reclassified into the operating expense line item to which the hedged transaction relates. Any ineffectiveness of the hedging instruments is reported in interest and other income, net on our condensed consolidated statements of operations. The increase in expenses including cost of revenues, research and development, sales and marketing, and general and administrative expenses, due to foreign currency fluctuation, was approximately 2% in the three and nine months ended September 30, 2008, compared with the same periods in 2007.

Critical Accounting Policies and Estimates

The preparation of financial statements in accordance with U.S. generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities and equity at the date of the financial statements and the reported amounts of net revenues, costs and expenses in the reporting period. We regularly evaluate our estimates and assumptions. We base our estimates and assumptions on current facts, historical experience and various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our actual results may differ materially and adversely from management's estimates. To the extent there are material differences between our estimates and the actual results, our future operating results will be affected.

Table of Contents

We believe the following critical accounting policies require us to make significant judgments and estimates in the preparation of our condensed consolidated financial statements:

Revenue Recognition;

Contract Manufacturer Liabilities;

Warranty Reserve;

Goodwill and Purchased Intangible Assets;

Stock-Based Compensation;

Income Taxes; and

Loss Contingencies.

Fair Value Accounting

In February 2007, the Financial Accounting Standards Board (the FASB) issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities-including an amendment of FASB Statement No. 115* (SFAS 159). SFAS 159 expands the use of fair value accounting to eligible financial assets and liabilities. SFAS 159 is effective beginning on January 1, 2008. We evaluated our existing financial instruments and elected not to adopt the fair value option on our financial instruments. As a result, SFAS 159 did not have any impact on our consolidated financial condition or results of operations as of and for the three and nine months ended September 30, 2008. However, because the SFAS 159 election is based on an instrument-by-instrument election at the time we first recognize an eligible item or enter into an eligible firm commitment, we may decide to exercise the option on new items when business reasons support doing so in the future which may have a significant impact on our operating results.

Management believes that there have been no significant changes during the three and nine months ended September 30, 2008, to the items that we disclosed as our critical accounting policies and estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2007.

Recent Accounting Pronouncements

See Note 1 Summary of Significant Accounting Policies in the Notes to Condensed Consolidated Financial Statements in Item 1, Part I of this Form 10-Q, for a full description of recent accounting pronouncements, including the expected dates of adoption and estimated effects on our consolidated results of operations and financial condition, which is incorporated herein by reference.

Table of Contents**Results of Operations**

The following table shows product and service net revenues (in millions, except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	\$ Change	% Change	2008	2007	\$ Change	% Change
Net revenues:								
Product	\$ 767.0	\$ 606.8	\$ 160.2	26%	\$ 2,165.1	\$ 1,658.2	\$ 506.9	31%
<i>Percentage of net revenues</i>	<i>81.0%</i>	<i>82.6%</i>			<i>81.7%</i>	<i>81.8%</i>		
Service	180.0	128.2	51.8	40%	483.8	368.7	115.1	31%
<i>Percentage of net revenues</i>	<i>19.0%</i>	<i>17.4%</i>			<i>18.3%</i>	<i>18.2%</i>		
Total net revenues	\$ 947.0	\$ 735.0	\$ 212.0	29%	\$ 2,648.9	\$ 2,026.9	\$ 622.0	31%

Our net product revenues increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily as a result of increased sales of both Infrastructure and SLT solutions to the service provider and enterprise markets. In particular, we had success in selling our Infrastructure products to service providers who are adopting next generation networking (NGN) IP networks, which are designed for higher capacity and efficiency to help reduce total operating costs and to be able to offer multiple services over a single network. During the three and nine months ended September 30, 2008, our new product releases and further expansion into emerging markets contributed to the increase in total net product revenues for those periods. In the third quarter of 2008, we also experienced increased revenue from the enterprise market primarily due to the sales of Infrastructure solutions. Our net service revenues increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to the increase in maintenance revenue from our expanding installed base.

Infrastructure Segment Revenues

The following table shows net Infrastructure segment revenues and net Infrastructure segment revenues as a percentage of total net revenues by product and service categories (in millions, except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007 (1)	\$ Change	% Change	2008	2007 (1)	\$ Change	% Change
Net Infrastructure segment revenues:								
Infrastructure product revenue	\$ 610.3	\$ 464.7	\$ 145.6	31%	\$ 1,714.9	\$ 1,252.8	\$ 462.1	37%
<i>Percentage of net revenues</i>	<i>64.4%</i>	<i>63.3%</i>			<i>64.7%</i>	<i>61.8%</i>		
Infrastructure service revenue	119.0	79.5	39.5	50%	308.7	233.1	75.6	32%
<i>Percentage of net revenues</i>	<i>12.6%</i>	<i>10.8%</i>			<i>11.7%</i>	<i>11.5%</i>		
Total Infrastructure segment revenues (1)	\$ 729.3	\$ 544.2	\$ 185.1	34%	\$ 2,023.6	\$ 1,485.9	\$ 537.7	36%

<i>Percentage of net revenues</i>	77.0%	74.1%	76.4%	73.3%
-----------------------------------	-------	-------	-------	-------

(1) Prior period amounts have been reclassified to reflect the 2008 segment structure, which now includes service revenue in the Infrastructure and SLT segments.

Infrastructure Product

For the three months ended September 30, 2008, the increase in Infrastructure product revenue was primarily attributable to revenue growth from our MX- and E-series product families in both the service provider and enterprise markets due to our customers' increased demand for network infrastructure solutions. To a lesser extent, our T-series products also contributed to the revenue growth in the third quarter of 2008 and our EX-series products, which were introduced in the first quarter of 2008, continued to grow in the third quarter of 2008. For the nine months ended September 30, 2008, the increase was primarily due to growth from MX-, M- and T-series product families as both our service provider and enterprise customers continued to build out their networks as their bandwidth requirements increased. E-series product revenue increased during the three and nine months ended September 30, 2008, primarily as a result of the timing of revenue recognition for previously shipped products from certain arrangements compared to revenue recognized in the same periods in 2007. In the three and nine months ended September 30, 2008, we experienced sales growth both in the service provider and enterprise markets. From a geographical perspective, during the three and nine months ended September 30, 2008, we experienced revenue growth in all three regions, with particular strength in the Americas region.

Table of Contents

We track Infrastructure chassis revenue units and ports shipped to analyze customer trends and indicate areas of potential network growth. Most of our Infrastructure product platforms are modular, with the chassis serving as the base of the platform. Each chassis has a certain number of slots that are available to be populated with components we refer to as modules or interfaces. The modules are the components through which the platform receives incoming packets of data from a variety of transmission media. The physical connection between a transmission medium and a module is referred to as a port. The number of ports on a module varies widely depending on the functionality and throughput offered by the module. Chassis revenue units represent the number of chassis on which revenue was recognized during the period. The following table shows Infrastructure revenue units and ports shipped:

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	Unit Change	% Change	2008	2007	Unit Change	% Change
Infrastructure chassis revenue units (1)	3,559	2,931	628	21%	9,951	7,877	2,074	26%
Infrastructure ports shipped (1)	95,839	61,728	34,111	55%	268,772	155,159	113,613	73%

(1) Excludes fixed configuration Ethernet switching products.

Infrastructure chassis revenue units and product revenue increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to the product mix that favored higher margin chassis revenue units which was driven by bandwidth demand as customers are seeking to expand capabilities in their networks and to offer differentiating feature-rich multi-play services that allow them to generate new revenue sources. The port shipments also increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to the increase in the overall number of chassis revenue units from richly configured T- and M-series router products shipped during the 2008 periods.

Infrastructure Service

The increase in Infrastructure service revenue for the three and nine months ended September 30, 2008, was primarily due to an increase in our installed base of equipment being serviced and the timing of revenue recognition for previously shipped products from certain arrangements. A majority of our service revenue is earned from customers that purchase our products and enter into service contracts for support service. We also experienced increased professional service revenue due to consulting projects.

SLT Segment Revenues

The following table shows net SLT segment revenues and net SLT segment revenues as a percentage of total net revenues by product and service categories (in millions, except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007 (1)	\$ Change	% Change	2008	2007 (1)	\$ Change	% Change
Net SLT segment revenues:								
SLT product revenue	\$ 156.7	\$ 142.1	\$ 14.6	10%	\$ 450.2	\$ 405.4	\$ 44.8	11%
Percentage of net revenues	16.6%	19.3%			17.0%	20.0%		

Edgar Filing: JUNIPER NETWORKS INC - Form 10-Q

SLT service revenue	61.0	48.7	12.3	25%	175.1	135.6	39.5	29%
<i>Percentage of net revenues</i>	<i>6.4%</i>	<i>6.6%</i>			<i>6.6%</i>	<i>6.7%</i>		
Total SLT segment revenues (1)	\$ 217.7	\$ 190.8	\$ 26.9	14%	\$ 625.3	\$ 541.0	\$ 84.3	16%
<i>Percentage of net revenues</i>	<i>23.0%</i>	<i>25.9%</i>			<i>23.6%</i>	<i>26.7%</i>		

(1) Prior period amounts have been reclassified to reflect the 2008 segment structure, which now includes service revenue in the Infrastructure and SLT segments.

SLT Product

We experienced increases in SLT product revenue primarily from an increase in revenue from branch and high-end Firewall products as well as J-series products in the three and nine months ended September 30, 2008, compared to the same periods in 2007. These increases were partially offset by a decline in revenues from DX and WX products. The integrated systems introduced prior to 2007, such as the SSG Firewall products, gained further traction in the market place with revenue from these product lines growing in the three and nine months ended September 30, 2008, compared to same periods in 2007. In the three and nine months ended September 30, 2008, we experienced

Table of Contents

sales growth both in the service provider and enterprise markets. Geographically, revenues increased in all three regions, for the three and nine months ended September 30, 2008 with strength in the EMEA and Asia Pacific (APAC) regions and to a lesser extent in the Americas region.

The following table shows SLT revenue units recognized:

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	Unit Change	% Change	2008	2007	Unit Change	% Change
SLT revenue units	60,587	64,402	(3,815)	(6%)	180,724	176,708	4,016	2%

SLT revenue units decreased while product revenue increased in the three months ended September 30, 2008, compared to the same period in 2007, primarily due to the product mix that favored high-end Firewall and J-series products. Both SLT revenue units and product revenue increased in the nine months ended September 30, 2008, compared to the same period in 2007, primarily due to the product mix that favored higher margin products. In January 2008, we announced a plan to phase out our DX product line. These products will be supported until 2013. We do not expect this plan to have a material impact on our condensed consolidated results of operations, cash flows, and financial condition.

SLT Service

The increase in SLT service revenue was primarily due to an increase in our installed base of equipment being serviced. A majority of our service revenue is earned from customers that purchase our products and enter into service contracts for support service.

Net Revenues by Geographic Region

The following table shows the total net revenues by geographic region (in millions, except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	\$ Change	% Change	2008	2007	\$ Change	% Change
Americas:								
United States	\$ 424.8	\$ 306.6	\$ 118.2	39%	\$ 1,138.2	\$ 875.9	\$ 262.3	30%
Other	53.7	38.8	14.9	38%	146.9	80.1	66.8	83%
Total Americas	478.5	345.4	133.1	39%	1,285.1	956.0	329.1	34%
Percentage of net revenues	50.5%	47.0%			48.5%	47.2%		
Europe, Middle East, and Africa	277.6	239.1	38.5	16%	803.3	646.4	156.9	24%
Percentage of net revenues	29.3%	32.5%			30.3%	31.9%		
Asia Pacific	190.9	150.5	40.4	27%	560.5	424.5	136.0	32%
Percentage of net revenues	20.2%	20.5%			21.2%	20.9%		
Total	\$ 947.0	\$ 735.0	\$ 212.0	29%	\$ 2,648.9	\$ 2,026.9	\$ 622.0	31%

Net revenues in the Americas region increased in absolute dollars and as a percentage of total net revenue in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to growth in revenue from both the service provider and enterprise markets and the timing of revenue recognition for previously shipped products from certain arrangements, as our customers continued to focus on increasing network performance, reliability and scale. In the United States, net revenues increased in absolute dollars and as a percentage of total net

revenue, in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to growth in revenue from both the service provider and enterprise markets and the timing of revenue recognition for previously shipped products from certain arrangements.

Net revenues in EMEA increased in absolute dollars in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to revenue growth in emerging markets in the Middle East and Eastern Europe which was driven by service provider network build-outs as a result of bandwidth demand and growth in the enterprise market. Net revenue in EMEA as a percentage of total net revenue decreased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to the relative strength of the Americas region.

Table of Contents

Net revenues in APAC increased in absolute dollars in the three months ended September 30, 2008, compared to the same period in 2007, primarily due to strength in Japan and the Association of Southeast Asian Nations (ASEAN) countries, which was driven by bandwidth demand as well as our customers' deployment of routing platforms for their next-generation networks. Net revenues in APAC as a percentage of total net revenues decreased slightly in the three months ended September 30, 2008, compared to the same period in 2007, primarily due to the relative strength of the Americas region. Net revenues in APAC increased in absolute dollars and as a percentage of total net revenue in the nine months ended September 30, 2008, compared to the same period in 2007, primarily due to strength in Japan, China, and the ASEAN countries partially offset by a decrease in revenue from Australia.

Net Revenues by Markets and Customers

We sell our high-performance network products and service offerings from both the Infrastructure and SLT segments to two primary markets—service providers and enterprise. The service provider market includes wireline, wireless, and cable operators as well as major internet content and application providers. The enterprise market represents businesses; federal, state and local governments; and research and education institutions. During the three and nine months ended September 30, 2008, the service provider market accounted for 72.7% and 73.0%, respectively, of our total net revenues, and the enterprise market accounted for 27.3% and 27.0%, respectively, of our total net revenues. During the three and nine months ended September 30, 2007, the service provider market accounted for 71.5% and 71.7%, respectively, of our total net revenues, and the enterprise market accounted for 28.5% and 28.3%, respectively, of our total net revenues. Net revenues to the service provider market increased by 31% and 33% during the three and nine months ended September 30, 2008, respectively, compared to the same periods in 2007. Net revenues to the enterprise market increased by 24% and 25% during the three and nine months ended September 30, 2008, compared to the same periods in 2007.

Verizon accounted for 13.3% of our net revenues for the three months ended September 30, 2008, and no single customer accounted for 10.0% or more of our net revenues for the nine months ended September 30, 2008. NSN and its predecessor companies accounted for greater than 10.0% of our net revenues for the three and nine months ended September 30, 2007.

Cost of Revenues

The following table shows cost of product and service revenues and the related gross margin (GM) percentages (in millions, except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	\$ Change	% Change	2008	2007	\$ Change	% Change
Cost of revenues:								
Product	\$ 230.1	\$ 168.1	\$ 62.0	37%	\$ 637.0	\$ 482.9	\$ 154.1	32%
<i>GM as a percentage of product revenues</i>	70.0%	72.3%			70.6%	70.9%		
Service	77.5	64.2	13.3	21%	224.7	182.2	42.5	23%
<i>GM as a percentage of service revenues</i>	56.9%	50.0%			53.6%	50.6%		
Total cost of revenues	\$ 307.6	\$ 232.3	\$ 75.3	32%	\$ 861.7	\$ 665.1	\$ 196.6	30%
<i>GM as a percentage of net revenues</i>	67.5%	68.4%			67.5%	67.2%		

Cost of product revenues increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, while product gross margin slightly decreased in the three months ended September 30, 2008, and increased in the nine months ended September 30, 2008, compared to the same periods of 2007.

The cost of product revenues increased in absolute dollars in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to our increase in product revenues, which resulted in higher product costs. The slight decrease in product gross margin as a percentage of product revenues in the three and nine months ended September 30, 2008, compared to same periods in 2007, is primarily attributable to changes in the product mix due to the timing of revenue recognition for previously shipped lower margin E-series products from certain arrangements, partially offset by growth in our higher-margin T- and M-series product families within our Infrastructure segment and increased sales of our higher margin Firewall and J-series products within our SLT segment.

Table of Contents

As of September 30, 2008, and 2007, we had 220 and 181 employees, respectively, in our manufacturing and operations organization that primarily manage relationships with our contract manufacturers, manage our supply chain, and monitor and manage product testing and quality.

The increases in cost of service revenues and service gross margin were commensurate with the growth in revenue in absolute dollars due to the timing of revenue recognition for previously shipped products from certain arrangements and the timing of our spares components purchases. Personnel related charges, consisting of salaries, bonus, fringe benefits expenses, stock-based compensation expenses, and other employee-related expenses increased \$3.2 million and \$15.6 million in the three and nine months ended September 30, 2008, respectively, primarily due to a 12% increase in headcount in the customer service organization, from 718 to 805 employees, to expand our world-wide operations. Our outside service expense also increased in the 2008 periods primarily to support the expanding installed equipment base. Additionally, facilities and information technology expenses related to cost of service revenues increased in connection with the growth of service business as a portion of our overall operations.

Operating Expenses

The following table shows operating expenses (in millions, except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	\$ Change	% Change	2008	2007	\$ Change	% Change
Research and development	\$ 194.0	\$ 167.9	\$ 26.1	16%	\$ 551.0	\$ 457.7	\$ 93.3	20%
Sales and marketing	200.6	177.8	22.8	13%	576.9	485.3	91.6	19%
General and administrative	37.6	29.2	8.4	29%	106.9	84.4	22.5	27%
Amortization of purchased intangible assets	5.2	20.2	(15.0)	(74%)	38.3	65.7	(27.4)	(42%)
Other charges, net		(5.1)	5.1	(100%)	9.0	9.2	(0.2)	(2%)
Total operating expenses	\$ 437.4	\$ 390.0	\$ 47.4	12%	\$ 1,282.1	\$ 1,102.3	\$ 179.8	16%
Operating income	\$ 202.0	\$ 112.8	\$ 89.2	79%	\$ 505.1	\$ 259.5	\$ 245.6	95%

The following table highlights our operating expenses as a percentage of net revenues:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Research and development	20.5%	22.8%	20.8%	22.6%
Sales and marketing	21.2%	24.2%	21.8%	23.9%
General and administrative	4.0%	4.0%	4.0%	4.2%
Amortization of purchased intangible assets	0.5%	2.8%	1.5%	3.2%
Other charges, net		(0.7%)	0.3%	0.5%
Total operating expenses	46.2%	53.1%	48.4%	54.4%
Operating income	21.3%	15.3%	19.1%	12.8%

The increase in research and development expenses for the three and nine months ended September 30, 2008, was primarily due to strategic initiatives to expand our product portfolio and maintain our technological advantage over competitors. Research and development expenses primarily consist of personnel related expenses and new product development costs. Personnel related charges, consisting of salaries, bonus, fringe benefits expenses, stock-based compensation expenses, and other employee-related expenses increased \$14.1 million and \$50.5 million in the three and nine months ended September 30, 2008, respectively, primarily due to a 25% increase in headcount in our engineering organization, from 2,460 to 3,063 employees, to support product innovation intended to capture anticipated future network infrastructure growth and opportunities. Outside consulting and other development expense also increased to support our product innovation initiatives. Additionally, facilities and information technology expenses related to research and development expenses increased to support these engineering efforts.

The increase in sales and marketing expenses was primarily due to increases in personnel related expenses and marketing expenses. Personnel related charges, consisting of salaries, commissions, bonus, fringe benefits, stock-based compensation expenses, and other employee-related expenses increased \$17.3 million and \$59.7 million for the three and nine months ended September 30, 2008, respectively, primarily due to a 19% increase in headcount in our worldwide sales and marketing organizations, from 1,805 to 2,139 employees. Included in the personnel charges was an increase in commission expense of \$5.6 million for the nine months ended September 30, 2008, compared to the same period in 2007, due to our higher net revenues. We also increased our investment in corporate and channel marketing efforts from the prior year. As our sales force grew, we also increased facilities and information

Table of Contents

technology expense related to the sales and marketing organizations in the three months and nine months ended September 30, 2008, compared to the same periods in 2007.

The increase in general and administrative expenses was primarily due to an increase in personnel related expenses and outside professional services. Personnel related charges, consisting of salaries, bonus, fringe benefits, stock-based compensation expenses, and other employee-related expenses increased \$1.9 million and \$8.5 million in the three and nine months ended September 30, 2008, respectively, compared to the same periods in 2007, primarily due to a 24% increase in headcount in our worldwide general and administrative functions, from 274 to 340 employees, to support the overall growth of the business. Outside professional service fees increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, as a result of increased legal fees and business processes re-engineering costs. Additionally, facilities and information technology related to general and administrative expenses increased to support our growing business.

Research and development and sales and marketing expenses each decreased as a percentage of net revenues in the three and nine months ended September 30, 2008, while general and administrative expenses remained flat and decreased as a percentage of net revenues in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to our focused execution and cost control initiatives.

Amortization of purchased intangible assets decreased in the three and nine months ended September 30, 2008, respectively, compared to the same periods in 2007, primarily due to a decrease in amortization expense as certain purchased intangible assets became fully amortized during the second quarter of 2008. This decrease was partially offset by the inclusion of an impairment charge of \$5.0 million, for the nine months ended September 30, 2008, as a result of the phase out of our DX products.

Other charges, net, decreased in the three months ended September 30, 2008, primarily due to the absence of a gain from a litigation settlement that occurred in the same period a year ago. See Note 4 Other Financial Information under *Other Charges, Net* in Notes to Condensed Consolidated Financial Statements in Item I of this Form 10-Q, for more information.

Interest and Other Income, Net, Gain or (Loss) on Minority Equity Investments, and Income Tax Provision

The following table shows net interest and other income and income tax provision (in millions, except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007	\$ Change	% Change	2008	2007	\$ Change	% Change
Interest and other income, net	\$ 9.7	\$ 17.9	\$ (8.2)	(46%)	\$ 40.5	\$ 76.4	\$(35.9)	(47%)
<i>Percentage of net revenues</i>	1.1%	2.4%			1.5%	3.8%		
(Loss) gain on minority equity investments					(1.5)	6.7	(8.2)	(122%)
<i>Percentage of net revenues</i>	N/M	N/M			N/M	N/M		
Income tax provision	63.2	45.6	17.6	39%	164.8	104.7	60.1	57%
<i>Percentage of net revenues</i>	6.7%	6.2%			6.2%	5.2%		

N/M Not meaningful

The decrease in interest and other income, net, was primarily due to lower interest rates in the 2008 period as compared to a year ago.

The gain (loss) on minority equity investments decreased in the nine months ended September 30, 2008, compared to the same period in 2007. No gain or loss was recorded in the three months ended September 30, 2008, and 2007. In

the nine months ended September 30, 2008, we recorded a loss on two of our minority equity investments. In the nine months ended September 30, 2007, we realized a gain from one of our minority equity investments that completed an initial public offering.

We recorded tax provisions of \$63.2 million and \$45.6 million, or effective tax rates of 30% and 35%, for the three months ended September 30, 2008 and 2007, respectively. We recorded tax provisions of \$164.8 million and \$104.7 million, or effective tax rates of 30% and 31%, for the nine months ended September 30, 2008 and 2007, respectively. The effective tax rates for the three and nine months ended September 30, 2008, differ from the federal

Table of Contents

statutory rate of 35% primarily due to earnings in foreign jurisdictions which are subject to lower rates. The effective tax rate for the three and nine months ended September 30, 2007, differ from the federal statutory rate of 35% primarily due to earnings in foreign jurisdictions which are subject to lower rates and the federal research and development credit offset by the disallowance of stock option charges incurred within certain jurisdictions during the three months ended September 30, 2007. The Company's income taxes payable for federal and state purposes were reduced by the tax benefit from employee stock option transactions. This benefit totaled \$10.5 million and \$29.6 million for the three and nine months ended September 30, 2008, respectively, and was reflected as an increase to additional paid-in capital.

The *Emergency Economic Stabilization Act of 2008* has provided an extension of the federal research and development (R&D) credit provisions that had previously expired on December 31, 2007. The benefit from this extended provision, which took effect on October 3, 2008, will be reflected in the Company's tax provision for the quarter ending December 31, 2008.

Our future effective tax rates could be subject to volatility or adversely affected by earnings being lower than anticipated in countries where we have lower statutory rates and higher than anticipated earnings in countries where we have higher statutory rates; by changes in the valuation of our deferred tax assets and liabilities; by expiration of or lapses in the R&D tax credit laws; by transfer pricing adjustments related to certain acquisitions including the license of acquired intangibles under our intercompany R&D cost sharing arrangement; by tax effects of stock-based compensation; by costs related to intercompany restructurings; or by changes in tax laws, regulations, accounting principles, or interpretations thereof. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these continuous examinations will not have an adverse effect on our operating results and financial condition.

Segment Information

For a description of the products and services for each segment, See Note 7 Segments in Notes to Condensed Consolidated Financial Statement in Item I of this Form 10-Q.

Financial information for each segment used by management to make financial decisions and allocate resources is as follows (in millions, except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2008	2007 (1)	\$ Change	% Change	2008	2007 (1)	\$ Change	% Change

Infrastructure Segment

An analysis of the change in revenue for the Infrastructure segment, and the change in units, can be found above in the section titled Net Revenues.

Infrastructure segment operating income increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to revenue growth from our router product families and to a lesser extent our Ethernet switching product family, which outpaced the expense growth. Infrastructure product gross margin increased in absolute dollars in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to revenues from richly configured high-end T- and M-series router products as well as high-margin port shipments. The Infrastructure gross margin percentage decreased slightly in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to product mix and the timing of revenue recognition from certain arrangements for previously shipped lower margin E-series products.

We continued to invest in research and development efforts to continue our innovation of products and expand our Infrastructure product portfolio, but our research and development expense decreased as a percentage of Infrastructure net revenues in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to cost control initiatives that resulted in revenue growing faster than expenses. We will continue to make investments to expand our product features and functionality based upon the trends in the marketplace. Additionally, in the three and nine months ended September 30, 2008, compared to the same periods in 2007, our sales and marketing expenses decreased slightly as a percentage of Infrastructure net revenues, but increased in absolute dollars as we increased our efforts to reach enterprise and service provider customers. We

Table of Contents

allocate sales and marketing, general and administrative, as well as facility and information technology expenses to the Infrastructure segment generally based upon revenue, usage and headcount.

SLT Segment

An analysis of the change in revenue for the SLT segment, and the change in units, can be found above in the section titled *Net Revenues*.

SLT segment operating income increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to revenue growth outpacing increases in SLT expenses. SLT product gross margin and gross margin percentage increased in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to product mix, particularly from an increase in the mix of higher margin high-end Firewall and J-series products in 2008. Research and development related costs decreased in absolute dollars and as a percentage of SLT revenues in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to cost control initiatives that resulted in revenue growing faster than research and development expenses. Additionally, sales and marketing as well as general and administrative expenses decreased as a percentage of SLT net revenues in the three and nine months ended September 30, 2008, compared to the same periods in 2007, primarily due to our focused execution. We allocate sales and marketing, general and administrative, as well as facility and information technology expenses to the SLT segment generally based on revenue, usage and headcount. We have historically experienced seasonality and fluctuations in the demand for our SLT products, which may result in greater variations in our quarterly revenue.

Amortization of Purchased Intangible Assets, Stock-Based Compensation and Related Payroll Tax Expense, Other Charges, Net, and Interest and Other Income, Net.

See *Nature of Expenses* and *Operating Expenses* for further discussion.

Key Performance Measures

In addition to the financial metrics included in the condensed consolidated financial statements, we use the following key performance measures to assess quarterly operating results:

	Three Months Ended September 30,	
	2008	2007
Days sales outstanding (DSO)(a)	35	34
Book-to-bill ratio(b)	>1	>1

(a) Days sales outstanding, or DSO, is calculated as the ratio of ending accounts receivable, net of allowances, divided by average daily net sales for the preceding 90 days for the three months ended September 30, 2008. DSO increased

slightly in the third quarter of 2008, compared to the third quarter of 2007, primarily due to the timing of receipts from our customers.

- (b) Book-to-bill ratio represents the ratio of product orders booked divided by product revenues during the period.

Table of Contents**Liquidity and Capital Resources*****Overview***

We have funded our business through our operating activities and by issuing securities. The following table shows our capital resources (in millions, except percentages):

	September 30,	December 31,	\$	%
	2008	2007	Change	Change
Working capital	\$ 1,619.5	\$ 1,175.3	\$ 444.2	38%
Cash and cash equivalents	\$ 1,778.5	\$ 1,716.1	\$ 62.4	4%
Short-term investments	242.5	240.4	2.1	1%
Long-term investments	110.7	59.3	51.4	(87%)
Total cash, cash equivalents and available-for-sale investments	\$ 2,131.7	\$ 2,015.8	\$ 115.9	6%

The significant components of our working capital are cash and cash equivalents, short-term investments and accounts receivable, reduced by accounts payable, income tax payable, accrued liabilities and short-term deferred revenue.

Working capital increased primarily due to an increase in cash and cash equivalents balance due to cash generated from operations and the conversion of our Senior Notes into common stock.

During the nine months ended September 30, 2008, we repurchased \$562.2 million, or 22.7 million shares, of our common stock under two stock repurchase programs that were authorized by our Board of Directors.

Under the \$2.0 billion stock repurchase program approved in 2006 and 2007 (the 2006 Stock Repurchase Program), we repurchased approximately 13.2 million shares of our common stock at an average price of \$24.52 per share for a total purchase price of \$323.7 million during the three months ended September 30, 2008, and approximately 15.4 million shares of our common stock at an average price of \$24.53 per share for a total purchase price of \$376.8 million during the nine months ended September 30, 2008. As of September 30, 2008, we have repurchased and retired approximately 84.8 million shares of our common stock under the 2006 Stock Repurchase Program at an average price of \$23.58 per share, and the program had no remaining authorized funds available for future stock repurchases.

The Board of Directors approved another \$1.0 billion stock repurchase program in March 2008 (the 2008 Stock Repurchase Program). Under this program, we repurchased approximately 4.8 million shares of our common stock at an average price of \$24.66 per share for a total purchase price of \$117.2 million during the three months ended September 30, 2008, and approximately 7.3 million shares of our common stock at an average price of \$25.42 per share for a total purchase price of \$185.4 million during the nine months ended September 30, 2008. As of September 30, 2008, the 2008 Stock Repurchase Program had remaining authorized funds of \$814.6 million.

All shares of common stock purchased under the 2006 and 2008 Stock Repurchase Programs have been retired. Future share repurchases under the 2008 Stock Repurchase Program will be subject to a review of the circumstances in place at the time and will be made from time to time in private transactions or open market purchases as permitted by securities laws and other legal requirements. This program may be discontinued at any time.

Based on past performance and current expectations, we believe that our existing cash and cash equivalents, short-term and long-term investments, together with cash generated from operations as well as cash generated from the exercise of employee stock options and purchases under our employee stock purchase plan will be sufficient to fund our operations, debt, and growth for at least the next 12 months. We believe our working capital is sufficient to meet our liquidity requirements for capital expenditures, commitments and other liquidity requirements associated with our existing operations during the same period.

Table of Contents

However, our future liquidity and capital requirements may vary materially from those now planned depending on many factors, including:

the overall levels of sales of our products and gross profit margins;

our business, product, capital expenditures and research and development plans;

the market acceptance of our products;

repurchases of our common stock;

issuance and repayment of debt;

litigation expenses, settlements and judgments;

volume price discounts and customer rebates;

the levels of accounts receivable that we maintain;

acquisitions of other businesses, assets, products or technologies;

changes in our compensation policies;

capital improvements for new and existing facilities;

technological advances;

our competitors' responses to our products;

our relationships with suppliers and customers;

possible future investments in raw material and finished goods inventories;

expenses related to our future restructuring plans, if any;

tax expense associated with stock-based awards;

issuance of stock-based awards and the related payment in cash for withholding taxes in the current year and possibly during future years;

the level of exercises of stock options and stock purchases under our equity incentive plans; and

general economic conditions and specific conditions in our industry and markets, including the effects of disruptions in global credit and financial markets, international conflicts and related uncertainties.

Cash Requirements and Contractual Obligations

Our principal commitments primarily consisted of obligations outstanding under operating leases, purchase commitments, tax liabilities and other contractual obligations.

Our contractual obligations under operating leases primarily relate to our leased facilities under our non-cancelable operating leases. Rent payments are allocated to costs and operating expenses in our condensed consolidated statements of operations. We occupy approximately 1.9 million square feet world wide under operating leases. The

majority of our office space is in North America, including our corporate headquarters in Sunnyvale, California. Our longest lease expires in January 2017. As of September 30, 2008, future minimum payments under our

49

Table of Contents

non-cancelable operating leases, net of committed sublease income, were \$225.4 million, of which \$14.1 million will be paid over the remaining nine months of 2008.

In order to reduce manufacturing lead times and ensure adequate component supply, our contract manufacturers place non-cancelable, non-returnable (NCNR) orders for components based on our build forecast. As of September 30, 2008, there were NCNR component orders placed by our contract manufacturers with a value of \$98.9 million. The contract manufacturers use the components to build products based on our forecasts and on purchase orders we have received from our customers. Generally, we do not take ownership of the components and title to the products transfers from contract manufacturers to us and immediately to our customers upon delivery at a designated shipment location. If the components go unused or the products go unsold for specified periods of time, we may incur carrying charges or obsolete materials charges for components that our contract manufacturers purchased to build products to meet our forecast or customer orders. As of September 30, 2008, we had accrued \$28.5 million based on our estimate of such charges.

As of September 30, 2008, we had \$82.5 million of long-term liabilities in our condensed consolidated balance sheet for unrecognized tax positions. At this time, we are unable to make a reasonably reliable estimate of the timing of payments in individual years beyond the next 12 months due to uncertainties in the timing of tax audit outcomes. As of September 30, 2008, other contractual obligations consisted primarily of an indemnity-related escrow amount of \$2.3 million, a software subscription requiring payment of \$5.0 million in January 2009, and a joint development agreement with quarterly payments of \$3.5 million payable through January 2010. Additionally, in the second quarter of 2008, we entered into a five year, \$34.0 million data center hosting agreement which was amended in the third quarter of 2008, increasing the amounts payable under the agreement to \$36.4 million. As of September 30, 2008, \$28.1 million remained unpaid under the data center hosting agreement of which \$1.9 million is required to be paid by the fourth quarter of 2008. The remaining commitment under this agreement is expected to be paid through the end of April 2013.

In the nine months ended September 30, 2008, cash and cash equivalents increased by \$62.4 million. This increase resulted from \$660.1 million of cash that was generated from our operating activities, partially offset by cash used in investing activities of \$191.5 million and cash used in financing activities of \$406.2 million.

Operating Activities

We generated cash from operating activities of \$660.1 million in the nine months ended September 30, 2008, compared to \$542.2 million in the same period of 2007. The increase of \$117.9 million in the 2008 period compared to a year ago was chiefly due to the following activities within the period:

Net income of \$379.3 million in the nine months ended September 30, 2008, compared to \$237.9 million in the same 2007 period due to revenue growth and decreases in expenses as a percentage of net revenues.

Cash inflow of \$11.2 million in the nine months ended September 30, 2008, as compared to an outflow of \$20.7 million for the same period in 2007, primarily due to the decrease in accounts receivable during the current fiscal year as a result of improved DSO from 42 days as of December 31, 2007 to 35 days as of September 30, 2008 and the timing of product shipments at the end of the quarter.

Cash inflow of \$75.6 million in the nine months ended September 30, 2008, as compared to an inflow of \$30.2 million for the same period in 2007, primarily due to increases in other payables and liabilities. In particular, our income taxes payable and long-term tax reserve liabilities increased by \$41.9 million in the nine months ended September 30, 2008, compared to a decrease of \$4.3 million in the same 2007 period, due to the timing of payments of federal, state and foreign income taxes.

Table of Contents

Investing Activities

For the nine months ended September 30, 2008, net cash used by investing activities was \$191.5 million compared to \$509.6 million of net cash generated by investing activities in the nine months ended September 30, 2007. The change compared to the prior year period was primarily due to the movement of cash from short and long-term investments to cash and cash equivalents during the first nine months of 2007 in anticipation of stock repurchases under the 2006 Stock Repurchase Program. In the first nine months of 2008, we invested a net \$57.1 million in available-for-sale investments based upon our investment strategy.

Financing Activities

Net cash used in financing activities was \$406.2 million and \$1,298.8 million for the nine months ended September 30, 2008 and 2007, respectively. In the nine months ended September 30, 2008, we used \$562.2 million to repurchase our common stock, partially offset by cash proceeds of \$115.4 million from common stock issued to employees, compared to the \$1,623.2 million of common stock repurchases in the same 2007 period, partially offset by cash proceeds of \$308.7 million from common stock issued to employees.

Factors That May Affect Future Results

A description of the risk factors associated with our business is included under **Risk Factors** in Item 1A of Part II of this report.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

We maintain an investment portfolio of various holdings, types and maturities. The values of our investments are subject to market price volatility. In addition, a portion of our cash and marketable securities is held in non-U.S. domiciled countries. These marketable securities are generally classified as available-for-sale and, consequently, are recorded on our condensed consolidated balance sheet at fair value with unrealized gains or losses reported as a separate component of accumulated other comprehensive income (loss).

At any time, a rise in interest rates could have a material adverse impact on the fair value of our investment portfolio. Conversely, declines in interest rates could have a material impact on interest earnings of our investment portfolio. We do not currently hedge these interest rate exposures. We recognized immaterial net gains or losses during the three and nine months ended September 30, 2008 and 2007 related to the sales of our investments.

Foreign Currency Risk and Foreign Exchange Forward Contracts

We use derivatives to partially offset our market exposure to fluctuations in certain foreign currencies. We do not enter into derivatives for speculative or trading purposes.

We use foreign currency forward contracts to mitigate gains and losses generated from the re-measurement of certain foreign currency denominated monetary assets and liabilities. These derivatives are carried at fair value with changes recorded in interest and other income, net. Changes in the fair value of these derivatives are largely offset by re-measurement of the underlying assets and liabilities. These foreign exchange contracts have maturities between one and two months.

Our sales are primarily denominated in U.S. dollars. Our costs of revenues and operating expenses are denominated in U.S. dollars, the British Pound, the Euro, Indian Rupee and Japanese Yen as well as other foreign currencies. We use foreign currency forward and/or option contracts to hedge certain forecasted foreign currency transactions relating to operating expenses. These derivatives are designated as cash flow hedges and have maturities of less than one year. The effective portion of the derivative's gain or loss is initially reported as a component of accumulated other comprehensive income and, upon occurrence of the forecasted transaction, is subsequently reclassified into the operating expense line item to which the hedged transaction relates. We record the ineffectiveness of the hedging

Table of Contents

instruments, which was immaterial during the three and nine months ended September 30, 2008 and 2007, in interest and other income, net on our condensed consolidated statements of operations. Research and development, sales and marketing, as well as general and administrative expenses slightly increased in the three and nine months ended September 30, 2008, compared with the same periods in 2007, due to the effect of foreign currency fluctuations.

Equity Price Risk

Our portfolio of publicly-traded equity securities is inherently exposed to equity price risk as the stock market fluctuates. We monitor our publicly-traded equity investments for impairment on a periodic basis. In the event that the carrying value of a publicly-traded equity investment exceeds its fair value, and we determine the decline in the value to be other than temporary, we reduce the carrying value to its current fair value. We do not purchase our publicly-traded equity securities with the intent to use them for trading or speculative purposes. They are classified as available-for-sale securities in accordance with Statement of Financial Accounting Standards No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. The aggregate fair value of our marketable equity securities was \$6.1 million and \$8.6 million as of September 30, 2008, and December 31, 2007, respectively. A hypothetical 30% adverse change in the stock prices of our portfolio of publicly-traded equity securities would result in an immaterial loss.

In addition to publicly-traded equity securities, we have also invested in privately-held companies. These investments are carried at cost. The aggregate cost of our investments in privately-held companies was \$26.3 million and \$23.3 million as of September 30, 2008, and December 31, 2007, respectively.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Attached as exhibits to this report are certifications of our principal executive officer and principal financial officer, which are required in accordance with Rule 13a-14 of the Securities Exchange Act of 1934, as amended (the Exchange Act). This Controls and Procedures section includes information concerning the controls and related evaluations referred to in the certifications and it should be read in conjunction with the certifications for a more complete understanding of the topics presented.

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based upon that evaluation, our principal executive officer and principal financial officer concluded that, as of the end of the period covered in this report, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls

In 2007, we initiated a multi-year implementation to upgrade certain key internal systems and processes, including our company-wide human resources management system, CRM system and our ERP system. This project is the result of our normal business process to evaluate and upgrade or replace our systems software and related business processes to support our evolving operational needs. There were no changes in our internal control over financial reporting that occurred during the third quarter of 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**Inherent Limitations on Effectiveness of Controls**

Our management, including the CEO and CFO, does not expect that our disclosure controls or our internal control over financial reporting will prevent or detect all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system's objectives will be met. Our controls and procedures are designed to provide reasonable assurance that our control system's objective will be met and our CEO and CFO have concluded that our disclosure controls and procedures are effective at the reasonable assurance level. The design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Further, because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that misstatements due to error or fraud will not occur or that all control issues and instances of fraud, if any, within the company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Controls can also be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the controls. The design of any system of controls is based in part on certain assumptions about the likelihood of future events. Projections of any evaluation of controls effectiveness to future periods are subject to risks. Over time, controls may become inadequate because of changes in conditions or deterioration in the degree of compliance with policies or procedures.

PART II OTHER INFORMATION**Item 1. Legal Proceedings**

The information set forth under "Legal Proceedings" section in Note 9 "Commitments and Contingencies" in the Notes to Condensed Consolidated Financial Statements in Item 1 Part I of this Quarterly Report on Form 10-Q, is incorporated herein by reference.

Item 1A. Risk Factors**Factors That May Affect Future Results**

Investments in equity securities of publicly traded companies involve significant risks. The market price of our stock reflects a higher multiple of expected future earnings than many other companies. Accordingly, even small changes in investor expectations for our future growth and earnings, whether as a result of actual or rumored financial or operating results, changes in the mix of the products and services sold, acquisitions, industry changes or other factors, could trigger, and have triggered, significant fluctuations in the market price of our common stock. Investors in our securities should carefully consider all of the relevant factors, including, but not limited to, the following factors, that could affect our stock price.

Our quarterly results are inherently unpredictable and subject to substantial fluctuations and, as a result, we may fail to meet the expectations of securities analysts and investors, which could adversely affect the trading price of our common stock.

Our revenues and operating results may vary significantly from quarter to quarter due to a number of factors, many of which are outside of our control and any of which may cause our stock price to fluctuate.

The factors that may affect the unpredictability of our quarterly results include, but are not limited to: limited visibility into customer spending plans, changes in the mix of products sold, changing market conditions, including current and potential customer consolidation, competition, customer concentration, long sales and implementation cycles, regional economic and political conditions and seasonality. For example, many companies in our industry experience adverse seasonal fluctuations in customer spending patterns, particularly in the first and third quarters.

As a result, we believe that quarter-to-quarter comparisons of operating results are not necessarily a good indication of what our future performance will be. It is likely that in some future quarters, our operating results may be below the expectations of securities analysts or investors, in which case the price of our common stock may decline. Such a

Table of Contents

decline could occur, and has occurred in the past, even when we have met our publicly stated revenue and/or earnings guidance.

Fluctuating economic conditions make it difficult to predict revenues for a particular period and a shortfall in revenues or increase in costs of production may harm our operating results.

Our revenues depend significantly on general economic conditions and the demand for products in the markets in which we compete. Economic weakness, customer financial difficulties and constrained spending on network expansion have previously resulted (for example, in 2001 and 2002), and may in the future result, in decreased revenues and earnings and could negatively impact our ability to forecast and manage our contract manufacturer relationships. In addition, recent turmoil in the global financial markets and recession concerns, as well as turmoil in the geopolitical environment in many parts of the world, may continue to put pressure on global economic conditions, which could lead to reduced demand for our products and/or higher costs of production. Economic downturns may also lead to longer collection cycles for payments due from our customers, an increase in bad debts, restructuring initiatives and associated expenses and impairment of investments. Furthermore, the recent disruption in worldwide credit markets may adversely impact the ability of our customers to adequately fund their expected capital expenditures, which could lead to delays or cancellations of planned purchases of our products or services. In addition, our operating expenses are largely based on anticipated revenue trends and a high percentage of our expenses are, and will continue to be, fixed in the short-term. Uncertainty about future economic conditions makes it difficult to forecast operating results and to make decisions about future investments. Future economic weakness, customer financial difficulties, increases in costs of production, and reductions in spending on network expansion could have a material adverse effect on demand for our products and consequently on our net revenues, results of operations and stock price.

Telecommunications companies and other large companies generally require more onerous terms and conditions of their vendors. As we seek to sell more products to such customers, we may be required to agree to terms and conditions that may have an adverse effect on our business or ability to recognize revenues.

Telecommunications service provider companies and other large companies, because of their size, generally have had greater purchasing power and, accordingly, have requested and received more favorable terms, which often translate into more onerous terms and conditions for their vendors. As we seek to sell more products to this class of customer, we may be required to agree to such terms and conditions, which may include terms that affect the timing of our ability to recognize revenue and have an adverse effect on our business and financial condition. Consolidation among such large customers can further increase their buying power and ability to require onerous terms.

For example, many customers in this class have purchased products from other vendors who promised certain functionality and failed to deliver such functionality and/or had products that caused problems and outages in the networks of these customers. As a result, this class of customers may request additional features from us and require substantial penalties for failure to deliver such features or may require substantial penalties for any network outages that may be caused by our products. These additional requests and penalties, if we are required to agree to them, may affect our ability to recognize the revenues from such sales, which may negatively affect our business and our financial condition. For example, in April 2006, we announced that we would be required to defer a large amount of revenue from a customer due to the contractual obligations required by that customer.

For arrangements with multiple elements, vendor specific objective evidence of fair value of the undelivered element is required in order to separate the components and to account for elements of the arrangement separately. Vendor specific objective evidence of fair value is based on the price charged when the element is sold separately. However, customers may require terms and conditions that make it more difficult or impossible for us to maintain vendor specific objective evidence of fair value for the undelivered elements to a similar group of customers, the result of which could cause us to defer the entire arrangement fees for a similar group of customers (product, maintenance, professional services, etc.) and recognize revenue only when the last element is delivered or if the only undelivered element is maintenance revenue would be recognized ratably over the contractual maintenance period, which is generally one year but could be substantially longer.

Table of Contents

Our ability to process orders and ship products in a timely manner is dependent in part on our business systems and performance of the systems and processes of third parties such as our contract manufacturers, suppliers or other partners, as well as interfaces with the systems of such third parties. If our systems, the systems and processes of those third parties or the interfaces between them experience delays or fail, our business processes and our ability to build and ship products could be impacted, and our financial results could be harmed.

Some of our business processes depend upon our information technology systems, the systems and processes of third parties and on interfaces with the systems of third parties. For example, our order entry system feeds information into the systems of our contract manufacturers, which enables them to build and ship our products. If those systems fail or are interrupted, our processes may function at a diminished level or not at all. This could negatively impact our ability to ship products or otherwise operate our business, and our financial results could be harmed. For example, although it did not adversely affect our shipments, an earthquake in late December of 2006 disrupted communications with China, where a significant part of our manufacturing occurs.

We also rely upon the performance of the systems and processes of our contract manufacturers to build and ship our products. If those systems and processes experience interruption or delay, our ability to build and ship our products in a timely manner may be harmed. For example, as we have expanded our contract manufacturing base to China, we have experienced instances where our contract manufacturer was not able to ship products in the time periods expected by us. If we are not able to ship our products or if product shipments are delayed, our ability to recognize revenue in a timely manner for those products would be affected and our financial results could be harmed.

A limited number of our customers comprise a significant portion of our revenues and any decrease in revenue from these customers could have an adverse effect on our net revenues and operating results.

A substantial majority of our net revenues depend on sales to a limited number of customers and distribution partners. For example, Verizon accounted for greater than 10% of our net revenues for the three months ended September 30, 2008 and NSN accounted for greater than 10% of our net revenues during the three and nine months ended September 30, 2007. This customer concentration increases the risk of quarterly fluctuations in our revenues and operating results. Changes in the business requirements, vendor selection or purchasing behavior of our key customers or potential new customers could significantly decrease sales to such customers. In addition, the recent disruption in worldwide credit markets may adversely impact the ability of our customers to adequately fund their expected capital expenditures, which could lead to delays or cancellations of planned purchases of our products or services. Any of these factors could adversely affect our net revenues and results of operations.

In addition, in recent years there has been consolidation in the telecommunications industry (for example, the acquisitions of AT&T Inc., MCI, Inc. and BellSouth Corporation) and consolidation among the large vendors of telecommunications equipment and services (for example, the combination of Alcatel and Lucent, the joint venture of NSN and the acquisition of Redback by Ericsson). Such consolidation may cause our customers who are involved in these acquisitions to suspend or indefinitely reduce their purchases of our products or have other unforeseen consequences that could harm our business and operating results.

If we fail to accurately predict our manufacturing requirements, we could incur additional costs or experience manufacturing delays which would harm our business.

We provide demand forecasts to our contract manufacturers. If we overestimate our requirements, the contract manufacturers may assess charges or we may have liabilities for excess inventory, each of which could negatively affect our gross margins. Conversely, because lead times for required materials and components vary significantly and depend on factors such as the specific supplier, contract terms and the demand for each component at a given time, if we underestimate our requirements, the contract manufacturers may have inadequate time or materials and components required to produce our products, which could increase costs or could delay or interrupt manufacturing of our products and result in delays in shipments and deferral or loss of revenues.

Table of Contents

We are dependent on sole source and limited source suppliers for several key components, which makes us susceptible to shortages or price fluctuations in our supply chain and we may face increased challenges in supply chain management in the future.

With the current demand for electronic products, component shortages are possible and the predictability of the availability of such components may be limited. Growth in our business and the economy is likely to create greater pressures on us and our suppliers to accurately project overall component demand and to establish optimal component levels. If shortages or delays persist, the price of these components may increase, or the components may not be available at all. We may not be able to secure enough components at reasonable prices or of acceptable quality to build new products in a timely manner and our revenues and gross margins could suffer until other sources can be developed. For example, from time to time, including the first quarter of 2008, we have experienced component shortages that resulted in delays of product shipments. We currently purchase numerous key components, including ASICs, from single or limited sources. The development of alternate sources for those components is time consuming, difficult and costly. In addition, the lead times associated with certain components are lengthy and preclude rapid changes in quantities and delivery schedules. In the event of a component shortage or supply interruption from these suppliers, we may not be able to develop alternate or second sources in a timely manner. If, as a result, we are unable to buy these components in quantities sufficient to meet our requirements on a timely basis, we will not be able to deliver product to our customers, which would seriously impact present and future sales, which would, in turn, adversely affect our business.

In addition, the development, licensing or acquisition of new products in the future may increase the complexity of supply chain management. Failure to effectively manage the supply of key components and products would adversely affect our business.

We are dependent on contract manufacturers with whom we do not have long-term supply contracts, and changes to those relationships, expected or unexpected, may result in delays or disruptions that could cause us to lose revenue and damage our customer relationships.

We depend on independent contract manufacturers (each of which is a third party manufacturer for numerous companies) to manufacture our products. Although we have contracts with our contract manufacturers, those contracts do not require them to manufacture our products on a long-term basis in any specific quantity or at any specific price. In addition, it is time consuming and costly to qualify and implement additional contract manufacturer relationships. Therefore, if we should fail to effectively manage our contract manufacturer relationships or if one or more of them should experience delays, disruptions or quality control problems in our manufacturing operations, or if we had to change or add additional contract manufacturers or contract manufacturing sites, our ability to ship products to our customers could be delayed. Also, the addition of manufacturing locations or contract manufacturers would increase the complexity of our supply chain management. Moreover, an increasing portion of our manufacturing is performed in China and other countries and is therefore subject to risks associated with doing business in other countries. Each of these factors could adversely affect our business and financial results.

We expect gross margin to vary over time and our recent level of product gross margin may not be sustainable.

Our product gross margins will vary from quarter to quarter and the recent level of gross margins may not be sustainable and may be adversely affected in the future by numerous factors, including product mix shifts, increased price competition in one or more of the markets in which we compete, increases in material or labor costs, excess product component or obsolescence charges from our contract manufacturers, increased costs due to changes in component pricing or charges incurred due to component holding periods if our forecasts do not accurately anticipate product demand, warranty related issues, or our introduction of new products or entry into new markets with different pricing and cost structures.

Table of Contents

The long sales and implementation cycles for our products, as well as our expectation that some customers will sporadically place large orders with short lead times, may cause our revenues and operating results to vary significantly from quarter to quarter.

A customer's decision to purchase certain of our products involves a significant commitment of its resources and a lengthy evaluation and product qualification process. As a result, the sales cycle may be lengthy. In particular, customers making critical decisions regarding the design and implementation of large or next-generation networks may engage in very lengthy procurement processes that may delay or impact expected future orders. Throughout the sales cycle, we may spend considerable time educating and providing information to prospective customers regarding the use and benefits of our products. Even after making the decision to purchase, customers may deploy our products slowly and deliberately. Timing of deployment can vary widely and depends on the skill set of the customer, the size of the network deployment, the complexity of the customer's network environment and the degree of hardware and operating system configuration necessary to deploy the products. Customers with large networks usually expand their networks in large increments on a periodic basis. Accordingly, we may receive purchase orders for significant dollar amounts on an irregular basis. These long cycles, as well as our expectation that customers will tend to sporadically place large orders with short lead times, may cause revenues and operating results to vary significantly and unexpectedly from quarter to quarter.

We are a party to lawsuits, which are costly to investigate and defend and, if determined adversely to us, could require us to pay damages or prevent us from taking certain actions, any or all of which could harm our business and financial condition.

We and certain of our current and former officers and current and former members of our board of directors are subject to various lawsuits. For example, we have been served with lawsuits related to the alleged backdating of stock options and other related matters, a description of which can be found above in Note 9 Commitments and Contingencies in Notes to Condensed Consolidated Financial Statements under the heading Legal Proceedings. There can be no assurance that these or any actions that have been or may be brought against us will be resolved in our favor. Regardless of whether they are resolved in our favor, these lawsuits are, and any future lawsuits to which we may become a party will likely be, expensive and time consuming to investigate, defend, settle and/or resolve. Such costs of investigation and defense, as well as any losses resulting from these claims or settlement of these claims, could significantly increase our expenses and could harm our business, financial condition, results of operations and cash flow.

In addition, we are party to a lawsuit which seeks to enjoin us from granting equity awards under our 2006 Equity Incentive Plan (the "2006 Plan"), as well as to invalidate all awards granted under such plan to date. The 2006 Plan is the only active plan under which we currently grant stock options and restricted stock units to our employees. If this lawsuit is not resolved in our favor, we may be prevented from using the 2006 Plan to provide these equity awards to recruit new employees or to compensate existing employees, which would put us at a significant disadvantage to other companies that compete for workers in high technology industries such as ours. Accordingly, our ability to hire, retain and motivate current and prospective employees would be harmed, the result of which could negatively impact our business operations.

We sell our products to customers that use those products to build networks and IP infrastructure and, if the demand for network and IP systems does not continue to grow, then our business, operating results and financial condition could be adversely affected.

A substantial portion of our business and revenue depends on the growth of secure IP infrastructure and on the deployment of our products by customers that depend on the continued growth of IP services. As a result of changes in the economy and capital spending or the building of network capacity in excess of demand, all of which have in the past particularly affected telecommunications service providers, spending on IP infrastructure can vary, which could have a material adverse effect on our business and financial results. In addition, a number of our existing customers are evaluating the build out of their next generation network, or NGN. During the decision making period when the customers are determining the design of those networks and the selection of the equipment they will use in those networks, such customers may greatly reduce or suspend their spending on secure IP infrastructure. Such pauses in purchases can make it more difficult to predict revenues from such customers, can cause fluctuations in the

Table of Contents

level of spending by these customers and, even where our products are ultimately selected, can have a material adverse effect on our business and financial results.

If we do not successfully anticipate market needs and develop products and product enhancements that meet those needs, or if those products do not gain market acceptance, we may not be able to compete effectively and our ability to generate revenues will suffer.

We cannot guarantee that we will be able to anticipate future market needs or be able to develop new products or product enhancements to meet such needs or to meet them in a timely manner. If we fail to anticipate market requirements or to develop and introduce new products or product enhancements to meet those needs in a timely manner, such failure could substantially decrease or delay market acceptance and sales of our present and future products, which would significantly harm our business and financial results. Even if we are able to anticipate, develop and commercially introduce new products and enhancements, there can be no assurance that new products or enhancements will achieve widespread market acceptance. For example, in the first quarter of 2008, we announced new products designed to address the Ethernet switching market, a market in which we have not had a historical presence. If these new products do not gain market acceptance at a sufficient rate of growth, or at all, our ability to meet future financial targets may be adversely affected. Any failure of our products to achieve market acceptance could adversely affect our business and financial results.

We rely on value-added resellers and distribution partners to sell our products, and disruptions to, or our failure to effectively develop and manage our distribution channel and the processes and procedures that support it could adversely affect our ability to generate revenues from the sale of our products.

Our future success is highly dependent upon establishing and maintaining successful relationships with a variety of value-added reseller and distribution partners. The majority of our revenues are derived through value-added resellers and distributors, most of which also sell competitors' products. Our revenues depend in part on the performance of these partners. The loss of or reduction in sales to our value-added resellers or distributors could materially reduce our revenues. During 2006, Alcatel, another value-added reseller and a competitor of ours, acquired Lucent, one of our largest value-added resellers. In addition, in April 2007 our largest customer, Siemens, transferred its telecommunications business to a joint venture between Siemens and Nokia. Our competitors may in some cases be effective in providing incentives to current or potential resellers and distributors to favor their products or to prevent or reduce sales of our products. If we fail to maintain relationships with our partners, fail to develop new relationships with value-added resellers and distributors in new markets or expand the number of distributors and resellers in existing markets, fail to manage, train or motivate existing value-added resellers and distributors effectively or if these partners are not successful in their sales efforts, sales of our products may decrease and our operating results would suffer.

In addition, we recognize a portion of our revenue based on a sell-through model using information provided by our distributors. If those distributors provide us with inaccurate or untimely information, the amount or timing of our revenues could be adversely impacted.

Further, in order to develop and expand our distribution channel, we must continue to scale and improve our processes and procedures that support it, and those processes and procedures may become increasingly complex and inherently difficult to manage. Our failure to successfully manage and develop our distribution channel and the processes and procedures that support it could adversely affect our ability to generate revenues from the sale of our products.

We face intense competition that could reduce our revenues and adversely affect our financial results.

Competition is intense in the markets that we address. The IP infrastructure market has historically been dominated by Cisco with other companies such as Alcatel-Lucent, Ericsson, Extreme Networks, Foundry Networks, Huawei, and Nortel providing products to a smaller segment of the market. In addition, a number of other small public and private companies have products or have announced plans for new products to address the same challenges and markets that our products address.

Table of Contents

In the service layer technologies market, we face intense competition from a broader group of companies including appliance vendors such as Cisco, Fortinet, F5 Networks, Nortel and Riverbed, and software vendors such as CheckPoint. In addition, a number of other small public and private companies have products or have announced plans for new products to address the same challenges and markets that our products address.

In addition, actual or speculated consolidation among competitors, or the acquisition of our partners and resellers by competitors, can increase the competitive pressures faced by us. In this regard, Alcatel combined with Lucent in 2006 and Ericsson acquired Redback in 2007. A number of our competitors have substantially greater resources and can offer a wider range of products and services for the overall network equipment market than we do. If we are unable to compete successfully against existing and future competitors on the basis of product offerings or price, we could experience a loss in market share and revenues and/or be required to reduce prices, which could reduce our gross margins, and which could materially and adversely affect our business, operating results and financial condition.

We are currently implementing upgrades to key internal systems and processes, and problems with the design or implementation of these systems and processes could interfere with our business and operations.

We have initiated a project to upgrade certain key internal systems and processes, including our company-wide human resources management system, our CRM system and our ERP system. We have invested, and will continue to invest, significant capital and human resources in the design and implementation of these systems and processes, which may be disruptive to our underlying business. Any disruptions or delays in the design and implementation of the new systems or processes, particularly any disruptions or delays that impact our operations, could adversely affect our ability to process customer orders, ship products, provide service and support to our customers, bill and track our customers, fulfill contractual obligations, record and transfer information in a timely and accurate manner, file SEC reports in a timely manner or otherwise run our business. Even if we do not encounter these adverse effects, the design and implementation of these new systems and processes may be much more costly than we anticipated. If we are unable to successfully design and implement these new systems and processes as planned, or if the implementation of these systems and processes is more costly than anticipated, our financial position, results of operations and cash flows could be negatively impacted.

Litigation or claims regarding intellectual property rights may be time consuming, expensive and require a significant amount of resources to prosecute, defend or make our products non-infringing.

Third parties have asserted and may in the future assert claims or initiate litigation related to patent, copyright, trademark and other intellectual property rights to technologies and related standards that are relevant to our products. The asserted claims and/or initiated litigation may include claims against us or our manufacturers, suppliers or customers, alleging infringement of their proprietary rights with respect to our products. Regardless of the merit of these claims, they have been and can be time consuming, result in costly litigation and may require us to develop non-infringing technologies or enter into license agreements. Furthermore, because of the potential for high awards of damages or injunctive relief that are not necessarily predictable, even arguably unmeritorious claims may be settled for significant amounts of money. If any infringement or other intellectual property claim made against us by any third party is successful, if we are required to settle litigation for significant amounts of money, or if we fail to develop non-infringing technology or license required proprietary rights on commercially reasonable terms and conditions, our business, operating results, financial condition and cash flow could be materially and adversely affected.

We are subject to risks arising from our international operations.

We derive a majority of our revenues from our international operations, and we plan to continue expanding our business in international markets in the future. As a result of our international operations, we are affected by economic, regulatory and political conditions in foreign countries, including changes in IT spending generally, the imposition of government controls, changes or limitations in trade protection laws, unfavorable changes in tax treaties or laws, natural disasters, labor unrest, earnings expatriation restrictions, misappropriation of intellectual property, acts of terrorism and continued unrest in many regions and other factors, which could have a material impact on our international revenues and operations. In particular, in some countries we may experience reduced

Table of Contents

intellectual property protection. Moreover, local laws and customs in many countries differ significantly from those in the United States. In many foreign countries, particularly in those with developing economies, it is common for others to engage in business practices that are prohibited by our internal policies and procedures or United States regulations applicable to us. Although we implement policies and procedures designed to ensure compliance with these laws and policies, there can be no assurance that all of our employees, contractors and agents will not take actions in violation of them. Violations of laws or key control policies by our employees, contractors or agents could result in financial reporting problems, fines, penalties, or prohibition on the importation or exportation of our products and could have a material adverse effect on our business.

Changes in effective tax rates or adverse outcomes resulting from examination of our income or other tax returns could adversely affect our results.

Our future effective tax rates could be subject to volatility or adversely affected by: earnings being lower than anticipated in countries where we have lower statutory rates and higher than anticipated earnings in countries where we have higher statutory rates; by changes in the valuation of our deferred tax assets and liabilities; by expiration of or lapses in the R&D tax credit laws; by transfer pricing adjustments related to certain acquisitions including the license of acquired intangibles under our intercompany R&D cost sharing arrangement; by tax effects of stock-based compensation; by costs related to intercompany restructurings; or by changes in tax laws, regulations, accounting principles, or interpretations thereof. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from these continuous examinations will not have an adverse effect on our operating results and financial condition.

We are exposed to fluctuations in currency exchange rates which could negatively affect our financial results and cash flows.

Because a majority of our business is conducted outside the United States, we face exposure to adverse movements in non-US currency exchange rates. These exposures may change over time as business practices evolve and could have a material adverse impact on our financial results and cash flows.

The majority of our revenues and expenses are transacted in U.S. Dollars. We also have some transactions that are denominated in foreign currencies, primarily the British Pound, the Euro, Indian Rupee and Japanese Yen related to our sales and service operations outside of the United States. An increase in the value of the U.S. Dollar could increase the real cost to our customers of our products in those markets outside the United States where we sell in U.S. Dollars, and a weakened dollar could increase the cost of local operating expenses and procurement of raw materials to the extent we must purchase components in foreign currencies.

Currently, we hedge only those currency exposures associated with certain assets and liabilities denominated in nonfunctional currencies and periodically will hedge anticipated foreign currency cash flows. The hedging activities undertaken by us are intended to offset the impact of currency fluctuations on certain nonfunctional currency assets and liabilities. However, no amount of hedging can be effective against all circumstances, including long-term declines in the value of the U.S. Dollar. If our attempts to hedge against these risks are not successful or if long-term declines in the value of the U.S. Dollar persist, our net income could be adversely impacted.

Matters related to the investigation into our historical stock option granting practices and the restatement of our financial statements has resulted in litigation and regulatory proceedings, and may result in additional litigation or other possible government actions.

Our historical stock option granting practices and the restatement of our financial statements have exposed us to greater risks associated with litigation, regulatory proceedings and government enforcement actions. For more information regarding our current litigation and related inquiries, please see Note 9 Commitments and Contingencies in Notes to Condensed Consolidated Financial Statements under the heading Legal Proceedings as well as the other risk factors related to litigation set forth in this section. We have provided the results of our internal

Table of Contents

review and independent investigation to the SEC and the United States Attorney's Office for the Northern District of California, and in that regard we have responded to formal and informal requests for documents and additional information. In August 2007, we announced that we entered into a settlement agreement with the SEC in connection with our historical stock option granting practices in which we consented to a permanent injunction against any future violations of the antifraud, reporting, books-and-records and internal control provisions of the federal securities laws. This settlement concluded the SEC's formal investigation of the Company with respect to this matter. In addition, while we believe that we have made appropriate judgments in determining the correct measurement dates for our stock option grants, the SEC may disagree with the manner in which we accounted for and reported, or did not report, the corresponding financial impact. We are also subject to civil litigation related to the stock option matters. No assurance can be given regarding the outcomes from litigation or other possible government actions. The resolution of these matters will be time consuming, expensive, and may distract management from the conduct of our business. Furthermore, if we are subject to adverse findings in litigation or if we enter into any settlements related thereto, we could be required to pay damages or penalties or have other remedies imposed, which could harm our business, financial condition, results of operations and cash flows.

If we fail to adequately evolve our financial and managerial control and reporting systems and processes, our ability to manage and grow our business will be negatively affected.

Our ability to successfully offer our products and implement our business plan in a rapidly evolving market depends upon an effective planning and management process. We will need to continue to improve our financial and managerial control and our reporting systems and procedures in order to manage our business effectively in the future. If we fail to continue to implement improved systems and processes, our ability to manage our business and results of operations may be negatively affected.

Our success depends upon our ability to effectively plan and manage our resources and restructure our business through rapidly fluctuating economic and market conditions.

Our ability to successfully offer our products and services in a rapidly evolving market requires an effective planning, forecasting, and management process to enable us to effectively scale our business and adjust our business in response to fluctuating market opportunities and conditions. In periods of market expansion, we have increased investment in our business by, for example, increasing headcount and increasing our investment in research and development and other parts of our business. Conversely, during 2001 and 2002, in response to downward trending industry and market conditions, we restructured our business and reduced our workforce. Many of our expenses, such as real estate expenses, cannot be rapidly or easily adjusted as a result of fluctuations in our business or numbers of employees. Moreover, rapid changes in the size of our workforce could adversely affect the ability to develop and deliver products and services as planned or impair our ability to realize our current or future business objectives.

Our reported financial results could suffer if there is an additional impairment of goodwill or other intangible assets with indefinite lives.

We are required to test annually, and review on an interim basis, our goodwill and intangible assets with indefinite lives, including the goodwill associated with past acquisitions and any future acquisitions, to determine if impairment has occurred. If such assets are deemed impaired, an impairment loss equal to the amount by which the carrying amount exceeds the fair value of the assets would be recognized. This would result in incremental expenses for that quarter which would reduce any earnings or increase any loss for the period in which the impairment was determined to have occurred. For example, such impairment could occur if the market value of our common stock falls below certain levels for a sustained period or if the portions of our business related to companies we have acquired fail to grow at expected rates or decline. In the second quarter of 2006, this impairment evaluation resulted in a reduction of \$1,280.0 million to the carrying value of goodwill on our balance sheet for the SLT operating segment, primarily due to the decline in our market capitalization that occurred over a period of approximately nine months prior to the impairment review and, to a lesser extent, a decrease in the forecasted future cash flows used in the income approach. Recently, the turmoil in credit markets and the broader economy has contributed to extreme price and volume fluctuations in global stock markets that have reduced the market price of many technology company stocks, including ours. Further declines in our stock price or the failure of our stock price to recover from

Table of Contents

previous declines, as well as any marked decline in our level of revenues or gross margins, increase the risk that goodwill and intangible assets may become impaired in future periods. We cannot accurately predict the amount and timing of any impairment of assets.

Our ability to develop, market and sell products could be harmed if we are unable to retain or hire key personnel.

Our future success depends upon our ability to recruit and retain the services of executive, engineering, sales, marketing and support personnel. The supply of highly qualified individuals, in particular engineers in very specialized technical areas, or sales people specializing in the service provider and enterprise markets, is limited and competition for such individuals is intense. None of our officers or key employees is bound by an employment agreement for any specific term. The loss of the services of any of our key employees, the inability to attract or retain personnel in the future or delays in hiring required personnel, particularly engineers and sales people, and the complexity and time involved in replacing or training new employees, could delay the development and introduction of new products, and negatively impact our ability to market, sell or support our products.

Our products are highly technical and if they contain undetected errors, our business could be adversely affected and we might have to defend lawsuits or pay damages in connection with any alleged or actual failure of our products and services.

Our products are highly technical and complex, are critical to the operation of many networks and, in the case of our security products, provide and monitor network security and may protect valuable information. Our products have contained and may contain one or more undetected errors, defects or security vulnerabilities. Some errors in our products may only be discovered after a product has been installed and used by end customers. Any errors, defects or security vulnerabilities discovered in our products after commercial release could result in loss of revenues or delay in revenue recognition, loss of customers, loss of future business, and increased service and warranty cost, any of which could adversely affect our business and results of operations. Also, in the event an error, defect or vulnerability is attributable to a component supplied by a third-party vendor, we may not be able to recover from the vendor all of the costs of remediation that we may incur. In addition, we could face claims for product liability, tort or breach of warranty. Defending a lawsuit, regardless of its merit, is costly and may divert management's attention. In addition, if our business liability insurance coverage is inadequate or future coverage is unavailable on acceptable terms or at all, our financial condition could be harmed.

A breach of network security could harm public perception of our security products, which could cause us to lose revenues.

If an actual or perceived breach of network security occurs in the network of a customer of our security products, regardless of whether the breach is attributable to our products, the market perception of the effectiveness of our products could be harmed. This could cause us to lose current and potential end customers or cause us to lose current and potential value-added resellers and distributors. Because the techniques used by computer hackers to access or sabotage networks change frequently and generally are not recognized until launched against a target, we may be unable to anticipate these techniques.

If our products do not interoperate with our customers' networks, installations will be delayed or cancelled and could harm our business.

Our products are designed to interface with our customers' existing networks, each of which have different specifications and utilize multiple protocol standards and products from other vendors. Many of our customers' networks contain multiple generations of products that have been added over time as these networks have grown and evolved. Our products will be required to interoperate with many or all of the products within these networks as well as future products in order to meet our customers' requirements. If we find errors in the existing software or defects in the hardware used in our customers' networks, we may have to modify our software or hardware to fix or overcome these errors so that our products will interoperate and scale with the existing software and hardware, which could be costly and negatively impact our operating results. In addition, if our products do not interoperate with those of our customers' networks, demand for our products could be adversely affected or orders for our

Table of Contents

products could be cancelled. This could hurt our operating results, damage our reputation and seriously harm our business and prospects.

Governmental regulations affecting the import or export of products could negatively affect our revenues.

The United States and various foreign governments have imposed controls, export license requirements and restrictions on the import or export of some technologies, especially encryption technology. In addition, from time to time, governmental agencies have proposed additional regulation of encryption technology, such as requiring the escrow and governmental recovery of private encryption keys. Governmental regulation of encryption technology and regulation of imports or exports, or our failure to obtain required import or export approval for our products, could harm our international and domestic sales and adversely affect our revenues. In addition, failure to comply with such regulations could result in penalties, costs and restrictions on export privileges,

We are required to expense equity compensation given to our employees, which has reduced our reported earnings, will significantly harm our operating results in future periods and may reduce our stock price and our ability to effectively utilize equity compensation to attract and retain employees.

We historically have used stock options and other equity awards as a significant component of our employee compensation program in order to align employees' interests with the interests of our stockholders, encourage employee retention, and provide competitive compensation packages. The Financial Accounting Standards Board has adopted changes that require companies to record a charge to earnings for employee stock option grants and other equity incentives. We adopted this standard effective January 1, 2006. By causing us to record significantly increased compensation costs, such accounting changes have reduced, and will continue to reduce, our reported earnings, and will significantly harm our operating results in future periods. This may require us to reduce the availability and amount of equity incentives provided to employees, which may make it more difficult for us to attract, retain and motivate key personnel. Moreover, if securities analysts, institutional investors and other investors adopt financial models that include stock option expense in their primary analysis of our financial results, our stock price could decline as a result of reliance on these models with higher expense calculations. Each of these results could materially and adversely affect our business.

Integration of past acquisitions and future acquisitions could disrupt our business and harm our financial condition and stock price and may dilute the ownership of our stockholders.

We have made, and may continue to make, acquisitions in order to enhance our business. In 2005 we completed the acquisitions of five private companies. Acquisitions involve numerous risks, including problems combining the purchased operations, technologies or products, unanticipated costs, diversion of management's attention from our core businesses, adverse effects on existing business relationships with suppliers and customers, risks associated with entering markets in which we have no or limited prior experience and potential loss of key employees. There can be no assurance that we will be able to successfully integrate any businesses, products, technologies or personnel that we might acquire. The integration of businesses that we have acquired has been, and will continue to be, a complex, time consuming and expensive process. Acquisitions may also require us to issue common stock that dilutes the ownership of our current stockholders, assume liabilities, record goodwill and non-amortizable intangible assets that will be subject to impairment testing on a regular basis and potential periodic impairment charges, incur amortization expenses related to certain intangible assets, and incur large and immediate write-offs and restructuring and other related expenses, all of which could harm our operating results and financial condition.

In addition, if we fail in our integration efforts with respect to our acquisitions and are unable to efficiently operate as a combined organization utilizing common information and communication systems, operating procedures, financial controls and human resources practices, our business and financial condition may be adversely affected.

Table of Contents

Due to the global nature of our operations, economic or social conditions or changes in a particular country or region could adversely affect our sales or increase our costs and expenses, which could have a material adverse impact on our financial condition.

We conduct significant sales and customer support operations directly and indirectly through our distributors and value-added resellers in countries throughout the world and also depend on the operations of our contract manufacturers and suppliers that are located inside and outside of the United States. In addition, our research and development and our general and administrative operations are conducted in the United States as well as other countries. Accordingly, our future results could be materially adversely affected by a variety of uncontrollable and changing factors including, among others, political or social unrest, natural disasters, epidemic disease, war, or economic instability in a specific country or region, trade protection measures and other regulatory requirements which may affect our ability to import or export our products from various countries, service provider and government spending patterns affected by political considerations and difficulties in staffing and managing international operations. Any or all of these factors could have a material adverse impact on our revenue, costs, expenses, results of operations and financial condition.

Our products incorporate and rely upon licensed third-party technology and if licenses of third-party technology do not continue to be available to us or become very expensive, our revenues and ability to develop and introduce new products could be adversely affected.

We integrate licensed third-party technology into certain of our products. From time to time, we may be required to license additional technology from third parties to develop new products or product enhancements. Third-party licenses may not be available or continue to be available to us on commercially reasonable terms. Our inability to maintain or re-license any third-party licenses required in our products or our inability to obtain third-party licenses necessary to develop new products and product enhancements, could require us to obtain substitute technology of lower quality or performance standards or at a greater cost, any of which could harm our business, financial condition and results of operations.

While we believe that we currently have adequate internal control over financial reporting, we are exposed to risks from legislation requiring companies to evaluate those internal controls.

Section 404 of the Sarbanes-Oxley Act of 2002 requires our management to report on, and our independent auditors to attest to, the effectiveness of our internal control over financial reporting. We have an ongoing program to perform the system and process evaluation and testing necessary to comply with these requirements. We have and will continue to incur significant expenses and devote management resources to Section 404 compliance on an ongoing basis. In the event that our chief executive officer, chief financial officer or independent registered public accounting firm determine in the future that our internal controls over financial reporting are not effective as defined under Section 404, investor perceptions may be adversely affected and could cause a decline in the market price of our stock.

Regulation of the telecommunications industry could harm our operating results and future prospects.

The telecommunications industry is highly regulated and our business and financial condition could be adversely affected by changes in the regulations relating to the telecommunications industry. Currently, there are few laws or regulations that apply directly to access to or commerce on IP networks. We could be adversely affected by regulation of IP networks and commerce in any country where we operate. Such regulations could address matters such as voice over the Internet or using Internet Protocol, encryption technology, and access charges for service providers. In addition, regulations have been adopted with respect to environmental matters, such as the Waste Electrical and Electronic Equipment (WEEE) and Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (RoHS) regulations adopted by the European Union, as well as regulations prohibiting government entities from purchasing security products that do not meet specified local certification criteria. Compliance with such regulations may be costly and time-consuming for us and our suppliers and partners. The adoption and implementation of such regulations could decrease demand for our products, and at the same time could increase the cost of building and selling our products as well as impact our ability to ship products into

Table of Contents

affected areas and recognize revenue in a timely manner, which could have a material adverse effect on our business, operating results and financial condition.

The investment of our cash balance and our investments in government and corporate debt securities are subject to risks which may cause losses and affect the liquidity of these investments.

At September 30, 2008, we had \$1,778.5 million in cash and cash equivalents and \$353.2 million in short- and long-term investments. We have invested these amounts primarily in U.S. government securities, corporate notes and bonds, commercial paper, and money market funds meeting certain criteria. Certain of these investments are subject to general credit, liquidity, market and interest rate risks, which may be exacerbated by U.S. sub-prime mortgage defaults that have affected various sectors of the financial markets and caused credit and liquidity issues. These market risks associated with our investment portfolio may have a negative adverse effect on our results of operations, liquidity and financial condition.

Uninsured losses could harm our operating results.

We self-insure against many business risks and expenses, such as intellectual property litigation and our medical benefit programs, where we believe we can adequately self-insure against the anticipated exposure and risk or where insurance is either not deemed cost-effective or is not available. We also maintain a program of insurance coverage for various types of property, casualty, and other risks. We place our insurance coverage with various carriers in numerous jurisdictions. The types and amounts of insurance that we obtain vary from time to time and from location to location, depending on availability, cost, and our decisions with respect to risk retention. The policies are subject to deductibles, policy limits and exclusions that result in our retention of a level of risk on a self-insurance basis. Losses not covered by insurance could be substantial and unpredictable and could adversely affect our results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

There were no unregistered sales of equity securities during the period covered by this report.

(c) Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs(1)
July 1 - July 31, 2008	1,315,981	\$23.15	1,315,981	\$1,225,067,380
August 1 - August 31, 2008	845,484	25.88	845,484	1,203,184,833
September 1 - September 30, 2008	15,792,677	24.60	15,792,677	814,623,284
Total	17,954,142	\$24.56	17,954,142	

(1) In July 2006 and February 2007, the Company's Board of Directors (the Board) approved a stock repurchase program (the

2006 Stock Repurchase Program). This program authorized the Company to purchase up to a total of \$2.0 billion of the Company's common stock. In addition, during March 2008, the Board approved a new stock repurchase program (the 2008 Stock Repurchase Program) which authorized the Company to purchase up to \$1.0 billion of the Company's common stock. This new program is in addition to the 2006 Stock Repurchase Program. During the three months ended September 30, 2008, the Company repurchased and retired 13,203,694 shares and 4,750,448 shares of common stock at an average price of \$24.52 per share and \$24.66 per share, respectively,
