(b)

Floating Rate Note Obligations Related to Securities Held The Trust enters into transactions

in which it transfers to Dealer Trusts (Dealer Trusts), fixed rate bonds in exchange for cash and

residual interests in the Dealer Trusts assets and cash flows, which are in the form of inverse

floating rate investments. The Dealer Trusts fund the purchases of the fixed rate bonds by issuing

floating rate notes to third parties and allowing the Trust to retain residual interest in the bonds.

The Trust enters into shortfall agreements with the Dealer Trusts which commit the Trust to pay

the Dealer Trusts, in certain circumstances, the difference between the liquidation value of the

fixed rate bonds held by the Dealer Trusts and the liquidation value of the floating rate notes held

by third parties, as well as any shortfalls in interest cash flows. The residual interests held by the

Trust (inverse floating rate investments) include the right of the Trust (1) to cause the holders of the

floating rate notes to tender their notes at par at the next interest rate reset date, and (2) to transfer the

municipal bond from the Dealer Trusts to the Trust, thereby collapsing the Dealer Trusts. The Trust

accounts for the transfer of bonds to the Dealer Trusts as secured borrowings, with the securities

transferred remaining in the Trust's investment assets, and the related floating rate notes reflected as

Trust liabilities. The notes issued by the Dealer Trusts have interest rates that reset weekly and the floating rate

note holders have the option to tender their notes to the Dealer Trusts for redemption at par at each

reset date. At January 31, 2008, Trust investments with a value of \$89,395,435 are held by the

Dealer Trusts and serve as collateral for the \$62,260,000 in floating rate note obligations outstanding

at that date.
