#### Edgar Filing: PEABODY ENERGY CORP - Form 8-K/A

#### **Explanatory Note:**

Peabody Energy Corporation (Peabody or the Company) filed a Current Report on Form 8-K with the Securities and Exchange Commission (SEC) on October 17, 2007 (the Original Form 8-K), related to, among other things, the announcement by the Board of Directors of Peabody that it approved the spin-off of Patriot Coal Corporation (Patriot) from Peabody. The Company disclosed in the Original Form 8-K that it would incur transaction costs in connection with the spin-off but that Peabody determined that, at the time of the filing of the Original Form 8-K, it was unable in good faith to make a determination of the estimates required by paragraphs (b), (c), and (d) of Item 2.05 of the Form 8-K General Instructions. The purpose of this Current Report on Form 8-K/A (Amendment No. 1) is to amend the Original Form 8-K to provide such estimates, which were determined by the Company on November 5, 2007. Item 2.05. Costs Associated with Exit or Disposal Activities.

On October 31, 2007, Peabody completed the spin-off of its wholly-owned subsidiary Patriot, which was accomplished through a special dividend of all outstanding shares of Patriot to Peabody shareholders. In connection with the spin-off, the Company has entered into definitive agreements with Patriot that, among other things, set forth the terms and conditions of the spin-off and provide a framework for the Company s relationship with Patriot after the spin-off. A summary of certain important terms of these definitive agreements can be found under Item 1.01 of our Current Report on Form 8-K filed with the SEC on October 25, 2007, and is incorporated herein by reference.

We estimate that we will incur after-tax transaction costs of approximately \$150 million in connection with the spin-off of Patriot from Peabody. These costs are composed primarily of professional fees (approximately \$25 million), accelerated stock compensation related to certain Patriot employees (approximately \$12 million) and a loss related to a coal supply/purchase agreement (approximately \$100 million).

We estimate that after-tax costs in the range of \$125 million to \$135 million will result in future cash expenditures.
